JUDGE TENNELL, of Texas, is correct in saying that the alien land law of that state is in harmony with the national democratic platforms of 1884 and 1888.

more of their products, in turn, and we are not paying as much for them as we did before by about \$65,000,000 a year. The wisdom of the measure has been vindicated in a direct and palpable way.

THE eight-hour law passed by the legislature last winter has contributed more to unsettle business, and occasioned more comment on the part of our people than any law enacted for some time.

We believe that it is an injustice to the industrial interests of our state to force upon our industries a law of this kind, when states all around us adhere to the old practice.

Then again, our state is too young and not sufficiently advanced to hazard its interests on a law of this kind.

We believe that the law was never passed by the alliance legislature for the benefit of the laboring class, but as a bid for their votes for the alliance ticket.

There is nothing in the constitution or laws of the United States, or of any state or territory thereof, that says one man may get rich and another shall not.

THE present talk about the alleged impossibility of establishing the tin plate industry in this country is the same kind that was heard when we proposed to manufacture our own steel rails.
