RUSSIAN CIRCUMLOCUTION

How Projects for Improvements in the Public Service Are Killed.

The reason why changes that are must festly desirable, that are in the direction of economy, and that apparently would injure no one, are not made in Russia is one of the most puzzling and exasperating things that are forced upon a traveler's attention. In every branch of the administration one is constantly stum bling upon abuses or defects that have long been recognized, that have been commented upon for years, that are apparently prejudicial to the interests of everybody, and that, nevertheless, con tinue to exist.

If you ask an explanation of an official in Siberia be refers you to St. Petersburg. If you inquire of the chief of the prison department in St. Petersburg be tells you that he has drawn up a "project" to cope with the evil, but that this "project" has not yet been approved by the minister of the interior. If you go to the minister of the interior you learn that the "project" requires a preliminary appropriation of money-even although its ultimate effect may be to save money -and that it cannot be carried into execution without the assent and co-operation of the minister of finance. If you follow the "project" to the minister of finance you are told that it has been sent back through the minister of the interior to the chief of the prison department for modification.

If you still persist in your determination to find out why this thing is not done, you may chase the modified "project" through the prison department, the minister of the interior and the minister of finance, to the council of the empire. There you discover that, inasmuch as certain cross-and-ribbon-decorated senators and generals, who barely know Siberia by name, have expressed a doubt as to the existence of the evil with which the "project" is intended to deal, a special "commission" (with salaries amounting to 20,000 rubles a year and mileage) has been appointed to investigate the subject and make a report.

If you pursue the commission to Siberia and back, and search diligently in the proceedings of the council of the empire for its report, you ascertain that the document has been sent to the minister of the interior to serve as a basis for a new "project," and then, as ten or fifteen years have elapsed and all the original projectors are dead, everything begins over again. At no stage of this circumrotatory process can you lay your hand on a particular official and say "Here! You are responsible for this What do you meanby it?"

At no stage, probably, can you find an official who is opposed to the reform or who has any personal interest in defeating it: and yet the general effect of the circumrotatory process is more certainly fatal to your reformatory project than any amount of intelligent and active op-The various bureaus of the provincial governor general's office, the chief prison department, the ministry of the interior, the ministry of finance, the ministry of justice, the council of ministers, and the council of the empire constitute a huge administrative maelstrom of ignorance and indifference, in which a "project" revolves slowly, month after month and year after year, until it is finally sucked down out of sight, or, perhaps, thrown by a fortuitous eddy of personal or official interest into the great

This being the case, it is manifest that a condensation upon a small proportion of these or a momentary adhesion by electric attraction would suffice to produce the optical effect called "haze" or "haziness."-St. Louis Republic.

It is guaranteed Pythagoras, the Greek philosopher, while to bring relief in every case, when experimenting on the vibrations of tight drawn strings, discovered that strings of certain lengths produced certain notes certain lengths produced certain notes. He then illogically connected the seven planets known at that time with musical notes for the reason merely that the radii of the seven release is which the control of the seven release in which the release is the release of the seven release in which the release is the release of the release is the release of radii of the seven spheres, in which, according to then existing notions, the planets were set, were of unequal length and therefore (?) produced different notes. These notes be dubbed the "music of the spheres." This music was not supposed to be caused by the friction of the spheres in the sockets in which they were set, as is now currently thought, but was produced by the vibrations of their unequal radii.-New York Recorder.
