THE PRESIDENT'S THANKSGIVING PROCLAMATION.

By the president of the United States of America: A proclamation. It is a very glad incident of the marvelous prosperity which has crowned the year now drawing to a close that its hopeful and reassuring touch has been felt by all our people.

Now, therefore, I, Benjamin Harrison, president of the United States of America, do hereby appoint Thursday, the 26th day of November present, to be a day of joyful thanksgiving to God for the bounties of his providence, for the grace in which we are permitted to enjoy them, and for the preservation of those institutions of civil and religious liberty which He gave our fathers the wisdom to devise and establish and us the courage to preserve.

In testimony whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington, this 13th day of November, in the year of our Lord one thousand eight hundred and ninety-one, and of the independence of the United States the one hundred and sixteenth.

By the President: JAMES G. BLAINE, Secretary of State.

THE GOVERNOR'S THANKSGIVING PROCLAMATION.

Now, more than ever have the people of Nebraska most convincing reasons for lifting their hearts in gratitude to the Supreme Ruler of the universe for the untold blessings they have enjoyed during the year which is now drawing to a close. The disastrous effects of the drought which afflicted some portions of the state a year ago have been followed by the sunshine of prosperity. The windows of heaven were opened; the rains came and now the earth has responded with a most abundant increase; the labors of the husbandmen have been most lavishly rewarded; the fields have been almost weighed down with grain—the trees with fruit—the granaries are now full to repletion; now vigor and energy have been infused into department of human efforts; joy sits in the hearts of the people where there was a lamentation a year ago; general health prevails and peace reigns within our borders.

It is most becoming, as well as the performance of a sacred duty, that all should manifest in a public manner their appreciation of and their gratitude for these priceless blessings.

Now, therefore, I, John M. Thayer, governor of the state Nebraska, do hereby designate Thursday, the 26th day of the present month, as a day of thanksgiving and praise to the Most High for His fatherly care over us and for His tender mercies.

I most earnestly request all the people of this commonwealth to abstain from all secular employment on that day and assemble in their several places of public worship and offer up thanksgiving and songs of praise to His holy name.

In accordance with this beautiful custom families will be reunited, social and fraternal influences will prevail and the hearts of all should be made glad.

I beg those with an abundance not to forget the poor and needy

own bounty. Let all the people rejoice.

In testimony whereof I have hereunto set my hand and caused to be affixed the great seal of the state.

Done at Lincoln this 14th day of November, in the year of our Lord one thousand eight hundred and ninety-one, of the state the twenty-fifth and of the independence of the United States the one hundred and sixteenth.

By the Governor: [SEAL] JOHN M. THAYER. JOHN C. ALLEN, Sec'y of State.

THE COUNCIL'S DUTY

Since the position of chief of police is virtually vacant now it becomes the duty of the city council to select a man who is qualified to execute the laws by which he ought to be governed.

This is a duty the council cannot shirk unless they will allow the community to look out for itself and they do as they please. No personal prejudice ought to enter into their minds while they are figuring on a man. But what can they expect of any one so long as they demand him to give his whole attention to this duty and work for fifty dollars a month.

Wages that are earned behind the plow in the ditch and on public works anywhere. The salary must be raised before they can expect to elevate the standard of their police force. There are plenty of willing men but few that can fill the bill when the interest of the city are at stake.

It is not necessary to select a man who will work ruin to any institution that has been sanctioned by the ordinances of the city to continue for a specified time so long as the law is not grossly and repeatedly violated but it needs a man who has that honesty of conviction and determination of purpose, that he will strike terror into the dens of iniquity. Reuben W. Hyers, W. T. Coie or I. H. Dunn are men competent to be entrusted with this responsible duty. The mayor can be instrumental in doing much good and putting the city's moral condition on a good footing, but he must have the unbiased assistance of a competent police force, or his efforts avail but little.

SHERMAN'S PERFDY

The attitude which Sherman has been assuming in the matter of Eickhoff's citizenship is at once laughable and disgusting. It reminds one of the few vagabonds who on a memorable occasion in time of war tried to cut down the enemy on a bridge spanning a narrow but very deep pass at the bottom of which there was a restless and turbulent steam which swept everything into oblivion that fell into its way. These foolish men stood there and brandished their weapons defying the enemy that was calmly looking on, occasionally the van guards would fire into their ranks at first disabling the weakest, but they still kept up the attack until only one big burly fellow remained in the centre of the bridge feebly pushing ahead, his few friends now unable to give assistance begged him to come back but all he would do was to shake his stubborn head. The army from which he had escaped came up and sentinels were sent out to reclaim him. They raised the flag of truce and even before his very feet tore up the plank that might not fall into the hands of the enemy which knowing the circumstances refused to sacrifice him until he had found his own doom. Now it remains to be seen when the legal progress is followed out in instating Mr. Eickhoff in the office of county treasurer whether or not Sherman will fall through the plank which his own party drew from under him that he might not go any further.

DICATOR FONSECA has given up to the inevitable. The popular uprising was so great that he was compelled to resign from the presidency.

The sewing machine has opened a wide field for the employment of more women by making sewing so cheap that the poorest shop girl may have a dozen tucks in her skirt if she wish them.

The creature having the greatest number of distinct eyes is the chiton, a species of mollusk, in the shell of which has been found as many as 11,000 separate mobile eyes.

The largest farm in Georgia is owned by Colonel J. M. Smith, who has 16,000 acres in Oglethorpe and Madison counties. His annual profits amount to \$31,000.

An elegantly dressed woman late entered a Paris jeweler's shop and asked to see some valuable gold pins. While she was examining them a man began playing a barrel organ before the door. The music seemed to annoy the lady, and stepping to the door she threw a piece of money to the man and told him to go away, which he did at once.

On returning to the counter she said that none of the pins suited her, but that as some compensation for the trouble she had given, she would buy a brooch. She accordingly chose one, paid ten francs for it, and was leaving the shop when the jeweler missed a diamond pin of great value from among those she had been examining. He accordingly stopped his customer, who seemed highly indignant, and insisted on the jeweler's wife searching her, which was done, but no pin was found.

The jeweler sent his sister to watch the woman, who was seen to enter another jeweler's shop, and was pretending to make a purchase when the organ grinder made his appearance. As soon as he began playing she again threw him some money and ordered him to move on, but the person who was watching her perceived that with the money she had given the man a piece of jewelry. This was at once made known to the police, who arrested both, and found on the man several articles of stolen jewelry.—Paris Figure.

A Woman Haried by Two Husbands.

Some years since a young woman named Gardner married in Scotland a man named Zadron. They quarreled and separated, and the woman afterward married a man named Smith. But a short time elapsed before separation took place in this case also, and a third marriage was contracted with a man named Bowhill. The parties, however, did not reside long together, the woman from that time forward living alone. Tuesday she poisoned herself, the body being found in bed the next morning.

At the coroner's inquest, when a verdict to that effect was returned, it was stated that Zadron had not been found, but Smith and Bowhill were in attendance. The latter produced his certificate of marriage and claimed the certificate of death. After discussion a compromise was arrived at with taking the coroner's certificate, and the two men agreeing to share the cost of the funeral, while it was arranged to bury the woman in the name of Zadron, alias Smith, alias Bowhill.—London Standard.

Buying Coal.

Householders who may never have acquired the habit of laying in a winter's supply of coal in summer or fall, and whose regrets for failing to do so are heard with the regularity of the annual advent of cold weather, may stop replying. It is true economy to buy little coal at a time. Coal men will tell you that this fuel rapidly loses in quality. The gases pass off by exposure or something of that kind, and with them the heating power diminishes. There is one thing, however, that is a necessity in making the most of this kind of thrift. The coal bought in small quantities should be taken from fresh shipments. There is no profit in buying coal that may have lain for weeks in a yard. It should come fresh from the cars in order to get the best service out of it.—New York Times.

Glass Filling for Teeth.

Persons who object to the conspicuousness of gold filling when it is placed in the front teeth may now have their dentists use a substance which resembles the teeth so closely in color that its presence can be detected only by a close and careful examination. This new filling is a kind of glass and is the invention of a German. It was put on the market only a short time ago, but it has been used enough to prove that the idea is a capital one. The glass comes in the form of a sand, which is made of nine different tints. These lines range from a bright white through various yellows to a kind of pale pink. Generally a set of teeth will have about the color of one of the kinds of sand, but to have the two exactly the same it may be necessary to mix two shades.—New York Tribune.

Damages Asked for Taking Cold.

John H. Taylor, of Nashville, Ind., while traveling on the Wabash railway from St. Louis to Stanberry in October, 1889, contracted a cold through the negligence of the railroad company in not having the car properly heated. The cold culminated in an attack of rheumatism, which has crippled him for life. For this he brought suit against the company for \$10,000 damages. Judge Goodman, in the circuit court, sustained a demurrer to the evidence of the plaintiff. An appeal will be taken to the supreme court.—Cor. St. Louis Republic.

Males Is a Great State.

Down in Deer Isle the other evening the village barber asked a young lady to attend a hop with him. The young lady very properly went to get her mother's consent. Her mother took her one side and told her she could go if she would get the barber to agree to do her (the young lady's) father's barbering this winter fore. We have not heard what arrangement has been made, says the correspondent who tells the story, but think everything was all right, for the girl went.—Bangor Commercial.

October fairly outdid itself in the Vermont mountains. The crimson foliage, the balmy temperature, the hazy atmospheres, all have combined to make the last three weeks of the month the most delightful experienced there for many years.

A recent eruption on the sun's face was photographed and lasted for fully fifteen minutes. Its angular height showed it to be a disturbance causing the vapors to ascend fully 80,000 miles.

How to Succeed.

This is the great problem of life which few satisfactorily solve. Some fail because of ill health, others want of luck, but the majority from insufficient grit—want of nerve. They are nervous, irritable, changeable, easily get the blues and "take the spirits down to keep the spirits up," thus wasting money, time, opportunity and nerve force. There is nothing like the Restorative Nervine, discovered by the great specialist, Dr. Miles, to cure all nervous diseases, as headache, the blues, nervous prostration, sleeplessness, neuralgia, St. Vitus dance, fits and hysteria. A POPULAR FAMILY.

JENNIE: "How is it, Kate, that you always seem to 'catch on' to the last new thing? By what I say, you always seem to get ahead of me." KATE: "I don't know; I certainly do not make any exertion to get ahead of you."

JENNIE: "Well, during the last few months, for example, you have taken up painting."

without any teacher; you came to the room when Miss Lagary deserted her Delaware class so suddenly, and so ostentatiously, and so surprising in grace under your instruction; I heard you telling Tommy James last evening how his child made mistakes in copying his lesson; you seem to be up on all the latest 'fads,' and know just what to do under all circumstances; you entertain beautifully; and in the last month you have improved so in health, owing, you tell me, to your improved eating conditions. Where do you get all of your information from in this little out-of-the-way place?—for you never go to the city?"

KATE: "Why, Jennie, you will make me vain. I have only one source of information, but it is surprising how it meets all wants. I very seldom hear of anything new but what the next few days bring me full information on the subject." Jennie: "No, Miss Jennie! And a great treasure it is to us all, for it really furnishes the reading for the whole household; father has given up his magazine that he has had for years, as he says it only gives more and better information on the subjects of the day; and mother says that it is that that makes her such a famous housewife. In fact, we all agree that it is the only really family magazine published, as you have said for samples of all of them, and find that one is all for men, another all for women, and another for children's only, while this one suits every one of us; so we only need to take one instead of several, and that is where the economy comes in, for it is only \$2.00 a year. Perhaps you think I am too vain in my praise; but I will let you see ours, or better still, send it cents to the publisher, W. Jennings Demorest, 15 East 14th Street, New York, for a sample copy, and I shall always consider that I have done you a great favor; and may be you will be cutting us out, so you may have the reputation of being the best informed family in town. If that is so, it is Demorest's Family Magazine that does it."
