JOHN C. WATSON, of Nebraska City, has been interviewed by an Omaha paper and is credited with making He following assertion All I what is an opera house, an

coric street railway and a new stillery. That's all I am working or, and Nebraska City wants them. t am not in politics. I am not supporting anybody, and I am not out for congress; my prophecy is, however, that Mr. Bryan will not be his own successor. Among the probable winners are Church Howe. Judge Chapman and Judge Pond.

"But I am not in it as far as politics are concerned. I want, as do others, an electric street railway, an opera house and other business both sides of the rives he as in-

THE postmaster-general's annual alarm. report, just made public, shows that the usual annual deficit in the finances of the department is gradually but surely disappearing. It amounted for the last year to only a little more than \$6,000,000; and that, too, in spite of the fact that the revenue suffered a loss of over \$1,000,000 owing to the passage had a tail like a whale.-Lincoln of the anti-lottery bill; and the esti- lournal. mates for 1803, which have been prepared for the information of congress, show that the service which, as is clearly indicated by the report, has been made to improve even at a lower cost, will fuly 1, 1893. The increase of the the United States. revenue last year, in spite of the loss on the transportation of lottery mail, is only \$5,000,000.

HOME GROWN SUGAR.

With regard to sugar, the efforts of this department afford much encouragement for a home grown sugar product. The result of the work of the experiment station established in the interest of beet sugar may be regarded as eminent by stisfactory, and with regard to sorghum. I have been a great sufferer from ACTIVE WORK FOR RUSSIAN RELIEF.

Governor Thayer and Labor Commissioner Ludden are actively at work in securing the proposed train load of corn to be sent to the famine sufferers of Russia. From dozens of points in the state responses are coming to the proclassian of the gravernor and Members of the gra

The cooks col 1,489 tieross and 75,031 tubs of and in the kitchen and on the table disappeared from view the tremendous amount of 256,591 'nbs, 38,384 firking and 87,846 boxes of batter. A huge heap of crackers must have been swallowed along with the 226,459 big boxes of

During one year Philadelphia consumed nearly 3,500,000 bushels of grain, including nearly 1,500,000 bushels of corn, 877,508 bushels of wheat, 98,425 bushels of rye, 1,056,300 bushels of barley and 203,600 bushels of mait. Out of these 877,508 bushels of wheat were manufactured 195,000 barrels of flour, and from this flour were baked 52,650; 540 loaves of bread. Most of the flour used by the bakers and the good house wives is shipped from the northwest, al-ready barreled. This manufactured into bread would easily swell the total to nearly 150,000,060 loaves, or their equivi-lent to a certain extent in rolls, buns

Philadelphia eats daily an enormous barbecue of 510 calves. 1,410 sheep, 1,510 hogs and 7,550 poultry, besides a huge banquet of at least 6,000,000 oysters, 525,528 eggs, 856 barrels of apples and 9 carloads of potatoes.—Philadelphia Rec-

Wrecked by a Mirage.

A mirage in the Carribean sea was the cause of the total loss of the new American barkentine Steadfast, while bound from Port of Spain to Philadelphia. When the Steadfast sighted the lofty peaks of St. Croix the atmosphere assumed a peculiar light color, and it became impossible to detect the sky from the island, everything assuming a similar shade and color resembling the cirrostratus clouds, hiding the entire lower portion of the island. The peaks and ncontain appeared to be twenty miles

The tops of the mountains seemed to be inverted, the tall cocoanuts appearing to grow from the sky to the earth. The augar grinding mills were pouring their smoke downward, and the workmen working upside down. The Steadfast was kept under easy sail and perfect control. Everything went well until a grinding sound was heard, and a sudden tremor went through the ship. The vessel crashed over the reefs and was soon fast on the rocky shore, where her wreck still remains. The mirage made the island appear twenty miles away.—Boston Transcript.

The Cost of Italian Opera.

Talking of money reminds me that Signor Vianesi says he left the Paris opera, where he has been conductor for the last four years, because the salary was not large enough and the work too exacting. He received \$2,400 a year for ten months' work, and very hard work at that. He comes to America and gets \$8,000 for seven months. Mr. Abbey's salary list is a formidable one. Miss Van Zandt gets \$1,000 a performance, Miss Eames, \$800; Lasalle, the French baritone, \$500; Mme. Albani, \$600, and five other singers from \$400 to \$500. costing \$2,000 a week.

The expenses of giving opera with such a company cannot fall below \$5,000 a performance, so that even at five dollars for a parquet seat, the price for the coming season, Mr. Abbey may not make a fortune. The average cost of the German performances at the Metropolitan last season was \$2,600.-New York Epocia.

The Wedding Flower.

The flowering of the "Wedding Flower," at Kew this year, is an event of more than ordinary interest, both to botanists and horticulturists. It is the giant not only of the genus Iris, but of the whole natural order to which it belongs.

It is found wild only in a small island off the east coast of Australia, thousands of miles distant from the habitant of any other Iris. While all other Irises may be grown out of doors, or with a little protection in winter, this one is happy only when treated to subtropical conditions. Its value in horticulture is due as much to its stature and elegance of foliage as to the size and beauty of its numerous

A College President's Chase-Harvard men who attended chapel one morning last week were very much surprised to see President Eliot pursuing one of the students as the men were leaving the building. Those in the immediate vicinity heard a very short but animated conversation. "Young man," said the president to the individual in question, who turned around surprised, "young man, excuse me, but you have my list." It was indeed true. In the confusion of leaving the chapel the student had picked up the wrong hat and was making away with the president's best tile.—Boston

the schools; but not in a way to be of much practical benefit and are never illustrated by living examples which in many cases might easily be done. If some scholars, who had just contracted a cold, was brought defore the school, so that all could hear the dry, loud cough and know its significance; see the thin white coating on the tongue and latter, as the cold developed, see the profuse watery expectora-tion and thin watery discharge from the nose, not one of them would ever forget what the first symptoms of a cold were.
