THE question arises, have big nations any rights that little nations are bound to respect? Bulgaria refuses to apologize to France and Chili goes on stoning the United States navy.

It is reported that there are a million head of cattle being fed and fattened for the spring market in the state of Kansas. Farmers think they can get more for their grain in that way than hauling it to market.

THE city of Des Moines is trying to secure the democratic national convention, but she will not get it for two good reasons. First, because she is a state that will give a plurality of at least 25,000 to the republican ticket, and second, because it is a prohibition state.

A HINT has been thrown out that the nickel congress will cut down the appropriation for It d ans education as a means of retrenchment and reform. This is a sad mistake for the Indian problem can only be solved by education and the appreciation should be doubled instead of cut down. Millions expended in teaching Indian youth the English language and civilized trades and industries do more toward ultimately disposing of the Indian question than millions wasted in war-fare upon the remnants of the once actors and actresses, and many dinners heart remedy in the world. It cures fare upon the remnants of the once powerful tribes.

THE republican members of the senate committee on sea coast defenses recommend an appropriation of \$100,000,000, of which \$10,000,-000 is to be available the first year and \$9,000,000 a year thereafter. Although it appears to be a perfectly reasonable measure and one demanded by the unprotected condition of our harbors and seaport towns, the democrats dissent from Hunan unsafe. When, during the rethe report and denounce it as recklessly extravagent. The democrats have not yet learned that this is a proclamation in which he promised the billion dollar country.-Omaha

THE DODGING POLICY.

The statement of Col. Springer with regard to the course of the democratic party on the silver question may be considered authoritative. He occupies the position of leader of the house, and is certainly familiar with the views and purposes of those who have control of the party's interests. Personally, he says, he would make it "a great international question" and settle it upon broad and definite lines. But in matters of legislation, he hastens to add, experience has taught him that the object most desirable can not always be accomplished, and it often becomes necessary to take what can be attained at the time. In the present case, he goes on to dec'are, there is really nothing attainable, because it is impossible for the two branches of congress and the president to agree upon a silver bill of any kind, Therefore, he thinks the subject Strange to relate the snake freed itself should be practically ignored dur- from the wheel and attacked Guy in the ing the present congress. He holds, in other words, that his party is exempted from the duty of asserting its opinions and trying to carry them out by the fact that it controls only one house of congress. The general theory is that a party is bound to do its best under all circumstances, but Col. Springer has discovered that responsibility exists only where there are ample facilities for accomplishing final results.

democratic leaders propose to over four months.-Cor. Chicago Tribdodge the silver issue and every other troublesome question that may arise. The house will not attempt any important legislation, if they can prevent it. They fancy mantled narrowly by a fringe quite that it will be better to do nothing thick to the very edge, then you may be than to make a mistake; and their excuse will be that it was uscless to try to beat a republican senate and Scribner's. president According to such logic

a party should not take part in an election where it is certain to be defeated, but should stand back and being a very poor way to recommend the principles and objects and the course suggested by Col. Springer in the present instance must be similarly regarded. There is no reason why the house should refuse or neglect to take action upon any subject simply bebility can not be shifted by that trial and they will be of the same that the house will proceed without reference to anything but the obligation to do all that lies in its power for the promotion of the general prosperity and welfare. The expedient of pleading that a republican majority in the senate relieves legislation upon difficulty questions will not answer the purpose. There are two sides to all current issues, and the democrats will have to take one or the other.-Globe-Democrat.

crement Scott Coming to America. A private letter from London brings the information that Clement Scott, the dramatic critic of the London Telegraph. is to visit America this winter. Mr. Scott is one of the best known first nighters in the English capital. He is stout, gray haired, has a gray mustache, wears eyeglasses and is rated the best authority on the drama in England. He has many friends, but an army of enthal that is claimed. Electric Bitters emies. He has made and unmade man; will cure all diseases of the liver playrights and actors. His dramatic and kidneys, will remove pimples, column is still regarded as the standard | boils, salt rheum and other affecauthority, and his article is nervously awaited after the performance of a new play. His judgment is usually good. He finds a good deal of fault, but is lavish in praise for good work.

A nice paragraph from him will sometimes mean five pounds more a week on the salary of some deserving actor or Fricke & Co's drugstore. actress who is little known and not appreciated, and his condemnation of a new play is usually the end of the venture. Taken all in all, he is regarded as eminently fair and just. He has never used his position to injure any one. What he has done has been from conscientious motives.

A Chinese Governor.

Tshang Yao, the governor of the province of Shantung, who died recently, was one of the highest dignitaries of the Celestial empire. He had a highly adventurous career. Born in lowly position, he was obliged to flee in his youth on account of having murdered the tormentor of an old man. He became a robber and soon stood at the head of all the brigands who made the province of bellion, the chief town of the province was threatened, the governor issued a hand of his daughter to the man who would save the town from the enemy.

beat off the attack of the rebels, and led home on the next day, as a reward for his bravery, the almond eyed beauty. Then he made rapid progress. He was not able to read or write, but was of great integrity, and died poor as he was born. He was called by his people, on account of his charity, Tshang, "the blue sky." It is said, however, that he

A Snake Attacks a Wagon.

The following snake story is evolved from a Texas exchange: Thursday even-ing last while Judge A. McFarland and his son Guy were driving homeward they | girls eloping with negroes, tramps saw a large snake lying in the road. The judge attempted to kill the snake by crushing it with the wheel of his gig, but instead of "bruising the serpent's balanced; usually subject to nead-head" the judge's wheel passed over its ache, neuralgia, sleeplessness, imtail. Instantly the snake coiled itself around a spoke, and at every turn of the show a weak, nervous system for swiftly revolving wheel made vicious which there is no remedy equal to strikes at Guy's face.
