World's Fair Notes.

An Ohio world's fair commissioner has estimated that the exhibitors from his state will open upwards of \$5,000,000 in the preparation of their exhibit for the exposition.

The California building at the fair will be an imposing structure of the "old mission" type, 116 by 50 feet, with a dome and costing about \$75,000. It will be surrounded by a hedge of Monterey cypress.

Denmark will spend about \$5,500 in showing as a leading feature of its World's fair exhibit, a Danish dairy, complete and in operation. The dairy interest is one of the most approved methods and mechanical appliances are utilized in the dairies of that country.

Vermont will have a building at the exhibition without drawing on the state appropriation for the cost of its erection. One hundred substantial citizens have guaranteed \$100,000 for that purpose, each one pledging himself to pay \$100.

Michigan's building will measure 100x140 feet and be three stories high. It will be constructed of Michigan material, which the furnishing will be donated. Though but \$20,000 of the appropriation will be devoted to its erection, it will in reality be a \$50,000 building.

Italy will make no governmental display at the exposition. The king, however, has recognized the fair, by appointing a commission, and minister of state, Rudini, has informed Vice President Bryan and Director Higinbotham, that the government will encourage individual exhibitors in every way possible. He even intimated that the government would pay for the transportation of exhibits. Mr. Higinbotham reports that there is throughout Italy much enthusiasm over the exposition and that the painters, sculptors, and manufacturers of artistic wares are hard at work on intended exhibits.

NEBRASKA PROHIBITIONISTS HAVE A RED HOT TIME IN THEIR CONVENTION.

LINCOLN, Neb., March 3.—The prohibition state convention to elect delegates to the national convention which meets in St. Louis June 3, met at Red Ribbon hall yesterday afternoon and evening. The convention may be described as one immense wrangle. The following delegates were elected: Charles Watts, A. Roberts, Mrs. L. D. King Lincoln; C. D. Stromis, T. P. Wigton, Mrs. Belle Bigelow, Mrs. Mary Hitchcock, Fremont; Ada M. Bittenbender, H. E. George, Lincoln; Mrs. C. M. Woodward, Seward; L. W. Moody, Omaha; A. T. Wolfenberger, C. E. Bentley, Lincoln.

The great fight came in the evening over the election of the two national committeemen. C. E. Bentley and T. P. Wigton were nominated, whereupon Mrs. King of Lincoln moved to substitute A. T. Wolfenberger in place of Bentley. The air was soon blue. Mr. Roberts of Lincoln got up and roundly scored the actions of Wolfenberger during the last campaign. He accused him of drawing a salary when the rest of the brethren were home working for the cause for nothing. Others followed in the same line. The gist of the charges was that Wolfenberger had done more for his own interests than he had for the good of the cause.

Mrs. King made a red hot speech on behalf of Wolfenberger, and others of the same sex. After a red hot time, in which every body got mad, a call of the counties was demanded, which resulted in a complete victory for Bentley and Wigton. The other business done was unimportant.

The Vincents.

Exchange. This excellent company began a week's engagement in our cosy opera house Monday night in the beautiful play entitled "Father and Son" and the operetta "The Bonnie Fishwife," and to say they pleased the large audience is putting it mild. Felix A. Vincent gave a fine representation of the porter, the last scene being especially fine. Eva Vincent in both plays was at her best, the singing and Scotch dialect catching on immensely. Last night Eva Vincent gave a grand impersonation of Lady Isabel in "East Lynne," bringing tears from the large audience at will.

This well known company will open Monday evening in "Father and Son," and "Bonnie Fishwife." In second act of "Father and Son" jewels and robes costing a small fortune will be displayed. Lovers of beautiful gowns should not fail to visit the opera house Monday evening. Prices 10, 20 and 30 cents. All ladies will be admitted free Monday night if accompanied by a paid reserved seat ticket.

FOUND DEAD.

Captain Donovan, an Old and Respected Citizen Found Dead at Neon To-day.

Word was brought to the city about 1:30 p. m. by Chas. Harris that a man was lying dead in the creek at the corner of Oak and Fifteenth streets. The coroner was at once notified and repaired to the spot.

There a ghastly sight met the gaze of the large crowd gathered on the bank. With his head and shoulders on the south side of the creek, lying partly on the left side and his feet on the north side of the creek was the lifeless form of Capt. Donovan.

The unfortunate man was found by Thomas Janda about 1 o'clock this afternoon while looking along the bank of the creek for eggs. Mr. Eli Sampson says that at about four o'clock this morning someone came to his house and knocked at the front door, saying that he was lost and wanting to know which direction to go to get to town. Mr. Sampson says that the hired girl told him to go one block north and then go east, he also said the girl thought that from the talk on the outside of the house there were two men.

If captain Donovan was the party that inquired which way he should go to get to town, he turned and went directly south instead of going north. After leaving the house he must have followed the side walk as far as it went then crossed the road and walked straight way into the creek, although no tracks could be seen and where he had reached the creek.

It was plainly visible on the banks where he had been struggling to out, he would get partly to the top of the bank and slide back. He was covered with mud from head to foot, and it is supposed that he died from exposure and exhaustion.

Mr. Thomas Janda says that he was awakened about four o'clock this morning by the barking of his dog, and that he got up out of bed and dressed and went out into the yard, but as he could not hear or see anything he went back to bed.

It is reported the captain had been drinking hard for the past two or three days, and it is supposed that while under the influence of liquor he had started for home and lost his way which finally cost him his life.

The deceased leaves three children, Miss Flora, who is teaching school near Ashland, George Donovan, who is travelling auditor of the U. P., with headquarters at Bois City, Idaho, and one son in Lincoln.

The deceased was a member of the masonic lodge of this city and the funeral will be under their auspices.

An inquest will be held tonight.

Killed at Schuyler.

The dead body of George Washington Whiteball, a colored man, was found by Walter Moore a Union Pacific employee early this morning, lying near the switchhead on the main line. He lay on his back on the end of a long switch tie, as though deliberately placed there. At the right of his left ear cutting back to ward the right ear was a wide open gash, five inches long and on the iron upright of the switch were blood and brains, showing plainly what had inflicted the wound. Dr. Worteshek, coroner impelled a jury to investigate. It is supposed that he jumped from the east bound night freight train and fell striking his head on the switch.

The republican city central committee meets tomorrow night at the office of A. N. Sullivan at 8 o'clock. The committeemen are as follows: J. I. Unruh, first ward; P. D. Bates second ward; O. C. Smith, third ward; J. N. Summers, fourth ward; and the committeeman from the fifth ward is either Harry Coolidge or Joe Lloyd.

LORE ABOUT HORNS.

Some of the Appendages Which Some Animals Carry on Their Heads.

"Here are a good many queer things to be told about horns," said Osteologist Lucas to a Washington Star reporter. "Take the horn of the rhinoceros, for example. It is nothing more than a protuberance composed of agglutinated hair. You cut it in two, and, examining its structure under the microscope, you find that it is made up entirely of little tubes resembling hair tubes. Of course these are not themselves hairs, and the structure is the same. The horns of the African rhinoceros sometimes grow to the length of four feet. From them the Dutch Boers make ramrods and other articles. You may remember that the handle of the ax used by Unslapogans in 'Alban Quatermain' was a rhinoceros horn. In old times rhinoceros horns were employed for drinking cups by royal personages, the notion being that poison put into them would show itself by bubbling. There may have been some truth in the idea, inasmuch as many of the ancient poisons were acids and they would decompose the horny material very quickly.

"Several species of rhinoceros, now extinct and only found in fossil state, used to exist which had no horns at all. The name, meaning as it does 'horned nose,' is rather a misnomer in their case. Several kinds of rhinoceros in Africa have two horns, one behind the other, but the extinct rhinoceros, known as the dyceratherium, had a pair of horns on its nose side by side. Many of the giant reptiles of long ago had enormous horns. The great lizard known as the triceratops had a big horn over each eye and a little one on its nose. The dinocerans and the tinocerans, gigantic mammals of the tertiary epoch, had three pairs of prominences on their heads which are believed to have supported horns. However, the material of which horn is composed quickly decays, being largely composed of gelatine and other animal matter, so that these appendages are apt to be found absent when the fossil bones of beasts which had them are found.

"Some fishes have horns which are actually outgrowths of bone on their heads. The box-fish which inhabits the warm waters of the globe—a little fellow six or eight inches long—has horns an inch in length. Birds have horns also sometimes. The horned screamer, which is related to the duck, has a single horn attached to its skull, springing from a cartilaginous base and curving upward. It is really a modified feather, though a true horn.

Plenty of reptiles have horns. Lizards are very commonly provided with them. There are chameleons with three horns, like the ancient triceratops. Horned toads have a sort of crest of four horns on the back of their heads. There is a small African snake which has two horns. No horned tortoises now exist, but a fossil specimen was found while ago on Lord Howe's island in the southern Pacific, which had four horns on its crest and resembled a cross between a horned toad and a snapping turtle. Doubtless you have often heard of human beings with horns. Such appendages in their case are abnormal developments of bone.

La Grippe Successfully Treated.

"I have just recovered from a second attack of the grip this year," says Mr. Jas. O. Jones, publisher of the leader, Mexico Texas. "In the latter case I used Chamberlain's Cough remedy, and I think with considerable success, only being in bed a little over two days, against ten days for the first attack. The second attack, I am satisfied, would have been equally as bad as the first but for the use of this remedy, as I had to go to bed in about six hours after being struck with it, while in the first case I was able to attend to business about two days before getting down. 59 cent bottles for sale by F. G. Fricke & Co.

I feel it my duty to say a few words in regard to Ely's Cream Balm, and I do so entirely without solicitation. I have used it more or less half a year, and have found it to be most admirable. I have suffered from catarrh of the worst kind ever since I was a little boy and I never hoped for cure, but Cream Balm seems to do even that. Many of my acquaintances have used it with excellent results.—Oscar Ostum, 45 Warren Ave., Chicago, Ill.
