HARRISON and Morton is the way
the head of the republican ticket
will read this fall.

WHAT a cabinet Hill will have!
Reports have it that he has already
engaged "250 statesmen for his cabinet."

BOIES is the only "good western
man" who stands a ghost of a show
at Chicago and it is only for vice
president.

BOYD played Hill to the queen's
taste yesterday. He took a club and
knocked down and dragged out the
obstructionists—to his program.

ONE of the most pitiable sights
in the convention was the drawn
and Haggard expression on Editor
Sherman's face when the convention
sat upon Billy Bryan—eloquence,
silver question and all.

A MAJORITY of nineteen in the
democratic convention at Omaha
yesterday had heard from Ohio on
the silver question and the lesson
of experience of cheap money as a
vote-producer was not lost on them.

"THE young man eloquent" was
loudly applauded by the delegates
at Omaha and the anti-silver men
got the votes. The democratic-al-
liance scheme for capturing the
electoral vote of this state by

GOVERNOR BOYD may not be a
Lill man in the presidential con-
test, but he has shown himself an
apt student in the New Yorker's
tactics. He will teach the kickers
who is governor of the party and
engineer of the machine.

A GOOD many are complaining
that winter is hanging on and that
it ought to be gone, but if you will
just stop to think you will see that
it is not strange that winter can't
get away when its backbone was
broken only a few weeks ago.

BRYAN undoubtedly spoke truth-
fully yesterday when he said, in pre-
senting his little silver resolution,
"I am here on a painful duty." It is
generally a painful duty for a young
man eloquent to volunteer to be sat
down upon in the house of his
friends.

UNDER the reciprocity sign the re-
publicans will conquer in the elec-
tion of 1892, for it is that policy that
has given the Cuban market for
flour to the United States after it
had been held by Europe for many
years past.

WILL there be a square backdown
in Chicago? The Atlanta Constitu-
tion prints the financial planks in
the democratic platforms of 1890 as
they were adopted in twenty-two
states of the south and west. All of
them declare for the free coinage of
silver. How will "the fat prophet"
look treading on those "twenty-two"
planks?

NEW TARIFF DOCUMENTS.
Three admirable documents have
just been issued by the American
Protective Tariff League.

No. 10, "Farmer and the Tariff" is
a complete revision, of an article
which proved very popular in 1888.

No. 53 is entitled "Free Trade Eng-
land and Protection United States."

No. 54 embraces the reports of the
minority of the ways and means
committee on the bill to put wool,
binding twine and cotton bagging
on the free list. The document
publications of the League now
embrace fifty-four numbers all of
which will be sent to any address
for fifty cents.

Gen'l Sec'y, 132 West 23d Street,
New York.

REDUCTION IN THE SILVER OUT- PUT.

The reports of the closing of silver
mines are so numerous that a
marked falling off in the output
seems to be inevitable. A govern-
ment inquiry made a year or two
ago showed that in some of the
mines silver could be produced for
50c or 55c an ounce, and that, there-
fore, any price above this would be
a profit. It is evident, however, that
in the majority of mines the cost of
production is much greater than
this. The lowest price yet touched
in the market was a fraction below
86c, and the rate has hovered around
the 87c or 88c mark most of the time
in the past two or three weeks. Yet
even these prices appear to wipe
out the margin of profit for many
localities, a is shown by the ac-
counts of the suspension of work.
Even in many of the larger mines
production has been restricted and
wages reduced.

There is a chance to cut down sil-
ver production materially without
bringing it below the output of a
few years ago. In 1890 the coinage
value of the United States product
of this metal was \$38,450,000. It was
\$48,000,000 in 1884, \$51,000,000 in 1886,
\$59,200,000 in 1888, \$64,600,000 in 1889,
\$70,400,000 in 1890, and according to
the estimates, it reached \$75,000,000
in 1891. The output, as indicated,
has been growing rapidly in recent
years. The prospect of favorable
legislation in 1899 and 1900 was
probably the cause of the great in-
crease in those years, and the bul-
lion deposit act on the latter year,
which largely increased the pur-
chases of the metal by the govern-
ment, sent the production of 1891 up.
About forty per cent of the silver
output of the world is now obtained
in the United States, and the ratio
has been growing continuously for
years past.

The drop in prices is bringing
about a curtailment of the output,
and this, in turn, will relieve the
pressure on the market and ulti-
mately send prices up. Thus the
rates of two or three years ago may
be re-established. And this is the
only practicable method in sight to
bring this end about. The same
forces which fix prices of wheat, iron
and textiles operate in the silver
market. Supply in silver has been
growing far more rapidly than de-
mand in the past few years, and
the old equilibrium must be
brought back or else prices cannot
be advanced. Demand is not likely
to be materially increased in the
near future, therefore a reduction in
the supply offers the only effective
remedy. International monetary
conferences are talked of, but relief
from this source is not likely to
come soon, although it will probab-
ly come sometime. Meantime the
"let-up" in production, if it should
take on the proportions which the
most recent reports from the min-
ing regions indicate, can hardly fail
to strengthen the market and ad-
vance prices, for a time at least, or
until supply again outruns demand.

TARIFF PICTURES.

During June, 1891, just before the
tin plate clause of the McKinley
bill went into operation, there were
enormous importations of tin plate
to postpone the effect of the law on
the tin plate importers as far as
possible. The total value of the
June importations showed an aver-
age of 355

cents a pound. In February last
the importations were valued at an
average of 293

cents a pound, a decline of 62
cents a pound. As the duty was
raised on July 1 from 1 cent a pound
to 2.2 cents a pound, an increase of
1.2 cents, the price has already de-
clined more than one-half the in-
crease in the duty. Why? Because
the American supply of tin plate is
increasing.—New York Press.

CONGRESSMAN BRYAN boasts that
he always has the courage of voting
his convictions, but when it came to
voting on the two delegations from
Douglas county yesterday in the
democratic convention, he refused
to vote for fear of offending some
one. So the convention left him out
in the cold, sat down on his free sil-
ver plank and refused to send him
as a delegate to the national conven-
tion.

According to the census of 1890,
Chicago takes rank, by virtue of her
population of 1,098,576 people, as the
eighth largest city on the globe.
Most of us desire, at one time or
another, to visit a city in which so
many persons find homes, and
when we do, we can find no better
line than the "Burlington Route."

I feel it my duty to say a few
words in regard to Ely's Cream
Balm, and I do so entirely without
solicitation. I have used it more
or less half a year, and have found
it to be most admirable. I have
suffered from catarrh of the worst
kind ever since I was a little boy
and I never hoped for cure, but
Cream Balm seems to do even that.
Many of my acquaintances have
used it with excellent results.—
