

BLACKWELL'S BULL DURHAM
SMOKING TOBACCO.
PUREST. MOST RELIABLE.

If old King Cole the merry old soul,
 Had lived in this great age of ours,
 He would have called for BULL DURHAM
 To smoke in his pipe,
 And been merrier under its powers.

Thousands of Smokers
 The Millionaire in his palace,
 The Laborer in his cottage,
 The Swell on the street,
 The Sailor on his ship,
 Comfort-lovers everywhere,
Prefer Bull Durham.
 Blackwell's Durham Tobacco Co.,
 DURHAM, N. C.

CATARRH
THE POSITIVE CURE.
 ELY BROTHERS, 66 Warren St., New York. Price 25c.

La Grippe.
 No healthy person need fear any
 dangerous consequences from an
 attack of la grippe if properly
 treated. It is much the same as a
 severe cold and requires precisely
 the same treatment. Remain quiet
 ly at home and take Chamberlain's
 Cough Remedy as directed for a se-
 vere cold and a prompt and com-
 plete recovery is sure to follow.
 This remedy also counteracts any
 tendency of la grippe to result in
 pneumonia. Among the many
 thousands who have used it during
 the epidemic of the past two years
 we have yet to learn of a single
 case that has not recovered or that
 has resulted in pneumonia. 25 and
 50 cent bottles for sale by F. G.
 Fricke & Co.

La Grippe Successfully Treated.
 "I have just recovered from a sec-
 ond attack of the grip this year,"
 says Mr. Jas. O. Jones, publisher of
 the leader, Mexico Texas. "In the
 latter case I used Chamberlain's
 Cough Remedy, and I think with
 considerable success, only being in-
 bed a little over two days, against
 ten days for the first attack. The
 second attack, I am satisfied, would
 have been equally as bad as the
 first but for the use of this remedy,
 as I had to go to bed in about six
 hours after being struck with it,
 while in the first case I was able to
 attend to business about two days
 before getting down. 50 cent bot-
 tles for sale by F. G. Fricke & Co.

The population of Plattsmouth
 is about 10,000, and we would say
 at least one-half are troubled with
 some affection on the throat and
 lungs, as those complaints are, ac-
 cording to statistics, more numer-
 ous than others. We would advise
 all our readers not to neglect the
 opportunity to call on their drug-
 gist and get a bottle of Kemp's Bal-
 sam for the throat and lungs. Trial
 size free. Large bottle 50c and \$1.
 Sold by all druggists.

Every Month

An Indian Republic.
 Two distinguished visitors to Wash-
 ington recently were T. M. Buffington,
 president of the Cherokee senate, and E.
 C. Bondinot, of the Cherokee Nation.
 Both are half breeds of commanding
 stature. Their mission was to ratify, as
 representatives of the nation, the sale of
 the Cherokee strip to the government.
 In speaking of the civilization of the
 Cherokees Mr. Bondinot said: "Few peo-
 ple in the States realize that we have a
 little world practically among ourselves,
 and one of the most complete govern-
 ments in existence. Our land is most
 fertile, and we raise all the grains of the
 west, and also cotton and tobacco. We
 receive about \$150,000 interest from the
 federal government, and with that we
 support ours. We have our own con-
 gress, the house of representatives hav-
 ing forty members, and our senate, of
 which Mr. Buffington is president, eight-
 een. Our laws are printed in both En-
 glish and Cherokee. We have had a
 written code for seventy years.

"We have our judiciary, composed of
 minor courts as well as district and su-
 preme. All proceedings, however, are
 carried on in the English language. The
 system of public schools is unsurpassed,
 as we have 103 public and two high
 schools or academies. The scholastic
 population is between 4,000 and 5,000,
 and the statistics show that about nine-
 tenths attend regularly. There is an
 orphan asylum, and all orphans are
 taken there and kept until old enough to
 shift for themselves. Of course we keep
 the girls longer than the boys unless we
 find good homes for them. Our chil-
 dren in the schools and the asylum are
 taught industrial pursuits also. Our
 percentage of criminals is very light."

An Ingenious Knitting Machine.
 A parallel knitting machine is a recent
 invention, designed to produce various
 forms of garments, such as corsets,
 trousers, combination garments, gloves,
 stockings, etc., in various patterns and
 colors, and of wool, silk or cotton, with
 or without interwoven rubber thread.
 In this ingenious mechanism the needle
 beds are formed of permanent and re-
 movable straps of steel, separated by
 flanges or projections and clamped in
 position in the frame of the machine by
 means of set screws. The jacks are
 formed on a bar, to correspond with the
 width of the needle space divisions, and
 the cams are mounted upon a plate,
 being lifted out of action as the cam
 carriage travels along the slide bar by
 stops and a slotted plate.

At the bottom of each bed rollers carry-
 ing Jacquard cards are mounted upon
 rocking arms, these cards being caused
 to act upon the projecting tails of the
 needles by levers and slide bars operated
 by cams on the shaft. Two or more
 swiveling bobbins are used for producing
 change of colors and stripes, the num-
 ber of swivels being determined by a
 pattern chain. Rubber thread is insert-
 ed by an additional thread carrier and
 stops.—New York Telegram.

Restaurant Dummies.
 An invention to lighten the labors of
 hotel and restaurant waiters has been
 perfected by Thomas E. Thompson, of
 Chicago. The invention has some points
 in common with the parcel railways now
 in use in the large dry goods stores and
 is to consist of a train of slow moving
 cars, which, starting in and operated
 from the kitchen, will make the circuit
 of the dining room at a walking pace.
 The cars, which will be constructed in
 two tiers or shelves, will be two feet
 long by eight inches wide and will carry
 a tray made to fit them.

The waiter, on taking a guest's order,
 will place a tray on the moving train,
 whence it will go direct to the kitchen
 to be filled and then returned by the
 same route. When used in lunch coun-
 ters the train can be arranged to run un-
 der the counter within easy reach of the
 waiter. The motive power will be elec-
 tricity, and the inventor claims that his
 machine will insure prompt service and
 cause a great saving in help.—Philadel-
 phia Ledger.

Moving Buildings Across a River.
 A block of houses at Lawrenceville,
 Pa., was recently moved across the Al-
 leghany river to Pittsburg. The under-
 taking seemed to be difficult, but it was
 accomplished successfully. The build-
 ings were first taken off their founda-
 tions, and turned by jacks and blocks to
 a position at right angles with the river.
 Half a dozen sand flats or floats were
 then lashed together and tied up to the
 shore. On each float three towers of
 blocks were built to the height of about
 eighteen feet, heavy scantlings were ad-
 justed to the river bank, and by means
 of ropes, rollers and pulleys the row of
 houses was moved onto the block founda-
 tion aboard the floats. Tugboats were
 next brought into service, and in due
 time the buildings were towed across
 the Alleghany and disembarcked at the
 new site.—New York Post.

A Lively Election.
 According to the Buenos Ayres Herald,
 elections in Argentina are exciting af-
 fairs. At the recent election at Buenos
 Ayres policemen armed with swords and
 revolvers were placed at all the street
 corners, the polling places were occu-
 pied with strong detachments of police,
 and policemen armed with rifles were
 posted on the roofs of adjoining houses.
 The fire brigade, fully armed, was con-
 centrated in the central police depart-
 ment and the troops of the garrison were
 massed just outside the city. Every
 citizen elector was armed with a re-
 volver, and the political clubs swarmed
 with men armed with rifles and re-
 volvers.

The electoral college of 1892 will be
 composed of 441 members. There will
 be 356 representatives in the next house.
 The basis of representation is one mem-
 ber for each 173,000 of population, or a
 majority fraction thereof.

Mrs. Mary Stately, aged seventy-
 seven, of Portsmouth, O., who has been
 toothless for a long time, is developing
 a third set of natural teeth. She has now
 on her lower-jaw two fully developed
 teeth.

Great Feats of Strength.
 London has been entertained lately by
 feats of strength that are certainly re-
 markable and probably unsurpassed in
 modern times. First there was a man
 named Sandow, who was an enormously
 powerful man; he was succeeded by
 Sampson, and he in turn by an Irish
 American named Sullivan. Curiously,
 the three names begin with the letter S,
 which is also the initial of "strength,"
 and of the Greek word for strength
 (sthenos). Sullivan, the latest comer,
 is thirty years of age, stands 5 feet 8 1/4
 inches in height, and weighs 168 pounds.
 His appearance presents little that is un-
 usual in the way of muscular develop-
 ment, and his biceps are neither very
 large nor wonderfully rigid. It is in his
 neck and jaw that his strength chiefly
 lies, and the majority of his feats are
 such as bring this peculiarity into special
 prominence.

At an exhibition given in London he
 fastened a chain to a 56-pound weight,
 and the other end being gripped be-
 tween his teeth, swung himself around
 and around until the twirling chain as-
 sumed a nearly horizontal line. The
 feat was repeated with the weight
 doubled, and as the performer, with
 both hands to his hips and using every
 sinew in his frame, swirled around and
 around the audience wondered with
 anxiety what would happen if one of
 the links should fly asunder. The most
 remarkable feat, however, that Sullivan
 performed was the lifting of an elephant
 by his teeth. It was a "baby," 'tis true,
 but it weighed about 1,800 pounds and
 was lifted a clear three inches from the
 ground, its whole weight pendent from
 the jaw of the man above.

Sullivan was not successful in an at-
 tempt to break a chain with his arm,
 having injured this limb on the previous
 night. He succeeded, however, in prov-
 ing that his prowess was not entirely
 confined to feats with his teeth by lift-
 ing a barrel of water, weighing 560
 pounds, with the middle finger of his
 right hand.—Harper's Young People.

A Rare Find in Baltimore.
 A few days ago Mrs. Andrew Reid,
 Jr., of Mount Vernon place, who is a
 native of France, and whose brother is
 an artist in Paris, made one of the rich-
 est art discoveries that has ever come to
 light in Baltimore. Mrs. Reid is a great
 lover of art and knows a good picture
 when she sees one. For a long time she
 has been in the habit of hunting through
 secondhand stores for old paintings.
 Several days ago, by chance, she walked
 into a store on North Charles street.
 There she saw a dilapidated looking old
 picture, which represented the head of a
 French peasant. At first she did not
 pay much attention to the picture, but
 went on to examine the other old things
 in the store. By chance she returned to
 the picture, and it struck her as being
 a remarkably fine piece of art work. She
 turned it over and looked on the back,
 and there was the artist's name. Before
 her was one of the most valuable pictures
 in Baltimore.

She immediately called the dealer and
 asked the price of the picture. He stag-
 gered her by asking twenty dollars. She
 paid the price, took the picture home
 with her, and now it cannot be bought
 for less than thousands.
 It was a rich find, truly, as there are
 only two other pictures in Baltimore by
 the same artist. The picture is by Jean
 Baptiste Greuze, and on the back of it
 is "Jean Baptiste Greuze, 1725 to 1808."
 Mr. William T. Walters owns one of the
 pictures, for which he paid a big price,
 and Mr. Leonce Robillon owns the other.
 Mr. Walters viewed Mrs. Reid's picture
 yesterday and pronounced it genuine.
 He says it is worth thousands of dollars.
 —Baltimore American.

Old Bones Seized.
 During the recent storm the heavy
 surf washed away several feet of the
 beach between Sandy Hook and Sperma-
 cetti Cove, N. J. In one place where the
 sea had a clean sweep fifteen feet of the
 beach was upturned, and a big pile of
 human bones was exhumed. A number
 of bullets were found among the skele-
 tons. Spanish coin 100 years old and a
 number of brass buttons with the num-
 bers 4 and 0 were also found in the
 mass. It is known that both American
 and British soldiers were encamped on
 Sandy Hook at various times during the
 Revolutionary war, but there is no rec-
 ord of any burying ground ever having
 been there. The bones and other relics
 have been seized by relic hunters.—New
 York Letter.

A Divorce from a Dead Man.
 A very peculiar case is reported from
 Paterson, N. J., where a woman desires
 to get a divorce from a dead man, or
 rather to get her marriage set aside.
 Her first husband enlisted in the war
 and was killed. She married again, and
 at the death of her second husband she
 ascertained that her second marriage
 deprived her of the benefits of the law.
 Subsequently she learned that her sec-
 ond marriage was bigamous, husband
 No. 2 having a wife living at the time
 of his marriage to her. This marriage,
 she thinks, can be set aside as null and
 void, and then she will be able to pro-
 cure a widow's pension.

High Prices for Old Silver.
 One of the most remarkable sales of
 old silver ever held was at Edinburgh
 lately. It included pieces belonging to
 the late Earl of Dunmore and the ser-
 vice of St. Martin's abbey in Perthshire.
 Several pieces were bought on commis-
 sion from New York. The highest price
 ever obtained for old silver, eighty dol-
 lars an ounce, was given for an early
 Italian double handled cup and saucer,
 \$420 being the price. The highest price
 heretofore had been fifty dollars an
 ounce.—London Letter.

A Valuable Sunken Boat.
 An effort is to be made to raise the
 old British treasure ship Hussar, which
 was sunk near Hell Gate, Nov. 25, 1780.
 She is said to have carried \$4,000,000,
 but all efforts to raise her have been
 frustrated by the heavy tides and cur-
 rents that sweep through the sound.—
 New York Letter.
