

**A feeling of dullness, Angor, and depression means that your liver isn't doing its part. That means impure blood, to begin with, and all kinds of ailments in the end.**

But you can stop them in advance. Dr. Pierce's Golden Medical Discovery invigorates the liver, purifies and enriches the blood, and rouses every organ into healthy action. It prevents and cures all diseases arising from a torpid liver or from impure blood. Dyspepsia, Indigestion, Biliousness, Scrofulous, Skin and Scalp Diseases—even Consumption (or lung-scurf), in its earlier stages, will yield to it.

The makers of the "Discovery" claim for it only what it will do. They guarantee that it will do it. It fails to benefit or cure, in any case, they'll return the money. Nothing else that claims to purify the blood is sold in this way; which proves, no matter what sales may offer, that nothing else can be "just as good." Therefore, don't accept a substitute.

For Vice-President  
**WHITELAW RIED**  
of New York.

GOVERNOR FLOWER said: "Mr. Cleveland can not carry one side of New York." Three days afterward he remarked: "It is a splendid ticket and will receive my cordial support."

THE present house has placed over 500 Confederate war claims on its calendar for favorable consideration, and only ninety bills have been reported in behalf of Union soldiers. This contrast tells a story that needs no comment.

TEXAS lands go a begging at \$1.25 per acre. Georgia, with her glorious climate and fertile soil, has hundreds of farms that can be bought for \$3 per acre. What can be the reason that Illinois, Iowa and cold Dakota land should be worth from \$25 to \$80 per acre and no richer than that in Georgia and Texas? There must be some cause for it.

MR. STEVENSON denies that he was a member of the Knights of the Golden Circle. Then he goes a step farther and plunges into an abyss of absurdity by averring that he never knew what the Knights of the Golden Circle were, anyway. Why can't a democrat candidate stop at the limit of credibility? The fellow who, being of sound mind and a grown man at the time of the rebellion, never knew what the Knights of the Golden Circle were, doesn't exist. O Adlai, what made you say it?—Lincoln Journal.

SO LONG as a governor and a president can each pardon robbers, forgers, thieves, swindlers and murders, we do not see why congress cannot pardon the people for thus being robbed by their old party machinists, by issuing a full legal tender greenback money sufficient to pay the entire national debt, for which interesting drawing United States bonds have been given in exchange for greenback money taken in payment for these same bonds as they were sold.—Advance Thought.

DO YOU WANT A COOK BOOK?  
The Omaha Weekly Bee is offered for the balance of the year together with Mrs. Jane Warren's cook book of over 100 pages for fifty cents.

Besides this there are several pages of useful table figures.  
This book is easily worth the price asked for it and the Bee, but the publishers desire to have the paper more thoroughly introduced, hence this liberal offer. Send orders to THE OMAHA PUBLISHING CO., Omaha, Neb.

PROTECTION AND INVENTION.  
Free traders tell us that our wonderful industrial growth is due to our inventions and labor-saving machinery.  
As usual, they put the cart before the horse.  
It is our American system of protection that creates and develops industries, giving our masses work and wages, comforts and homes, education and an ambition.  
This stimulates inventive genius, and when new devices are planned and perfected there is use for them at once.  
Thousands of pairs of boots and shoes are daily made in Massachusetts by machinery, giving employment to thousands of workmen at good wages.  
We export largely to England, where labor is much cheaper than in this country.  
The United States leads in inven-

tions, three times as many patents being granted here as in Great Britain.  
During our free trade period, from 1846 to 1860, the total number of patents granted was 26,234.  
From 1861 to 1875 the number granted was 127,345, and from 1876 to 1889 the number was 236,955.  
The greatest number issued in any one year prior to 1862 was 4,819, while now we issue annually from 25,000 to 30,000.

The result is the cheapening of the product, increased consumption and greater demand for labor at good wages.  
Protection does not make geniuses, but it does make the opportunity, it improves the mind, stimulates the intellect and rewards the inventor.

Wherever the influence of a protective tariff has been the greatest, there invention has progressed most rapidly. The result is saving in cost of production and greater prosperity for the masses of the people.

Wedded Over Her Mother's Grave.  
The most unique marriage ever performed in Baltimore took place Monday within the boundaries of Green Mount cemetery over the graves of the parents of the bride. The groom was Colonel Hendrick von Stamp, ex-minister of Denmark to the United States, a knight of the Order of Dannebrog, and the bride was Miss Mildred Hammond, daughter of the late General Hammond. Six carriages were occupied by the wedding party, but the vehicles were supposed to be a funeral cortege as they slowly moved through the cemetery. When the Hammond lot was reached the graves were strewn with flowers and the wedding was quickly performed, the bride standing upon the grave of her mother and the groom upon the grave of the bride's father. The bride is of one of Maryland's oldest families, being a remote descendant of President George Washington. She is forty and the groom forty-four years old.—Baltimore Letter.

The Human Journey of a Lathing Nail.  
About fifty-four years ago Washington Megahan, contractor and builder of this place, was working at his trade, that of a plasterer, in Blair county, when he accidentally swallowed a lathing nail. He was very much alarmed about the accident at the time, but as he felt no evil results from the extraordinary diet, in the course of two or three weeks he had forgotten all about it. Recently, however, Mr. Megahan has felt a peculiar sensation in the palm of his left hand, and one day last week he was able to feel the outline of a small nail, and then it was that he remembered having swallowed the lathing nail fifty-four years before. The nail is rapidly working its way through the flesh of his hand, and when it has worked up under the skin Mr. Megahan will have a physician remove it.—Somerset Herald.

One Year's Work.  
At the twentieth anniversary festival of the Provident Surgical Appliance society in London, Dr. Bond in the course of his speech said that he knew of only one case dealt with by the society in which any dissatisfaction was given. A young woman was fitted with a Roman nose, but the boys of the college, noticing the change, made her life unbearable. She besought the society to help her, and was supplied with a pretty little retronse nose so attractive that all her companions were made envious, and several offers of marriage were insured. Dr. Bond's society last year distributed no fewer than 6,223 artificial arms, legs, teeth and noses.—London Letter.

Stopping a Customer En Route.  
A Maryland farmer who was waiting for the train to leave for New York was accosted by Detective McDevitt, who finally learned that the gentleman from the rural districts was going to New York with \$400 in his pocket to buy "green goods." The farmer said that the agent of the green goods man would meet him at Summerville. McDevitt sent the farmer back to his family and saved him the loss of his money and the expenses of his trip. He says that men may be seen at the depots every day on their way to deal in green goods.—Washington Star.

An Electric Launch.  
An electric launch on exhibition at the crystal palace, London, is thus described: The Lily, as she is named, is 28 feet long and has a beam of 5 feet 6 inches, a depth of 2 feet 10 inches and a draft of 2 feet. The electrical equipment consists of a two horse power motor, supplied with a current from thirty "Epstein" cells. Her weight complete is 2,500 pounds, she will hold from twelve to fifteen passengers, and with one charging will run at her full speed of seven miles an hour for five hours.

Run Down by an Island.  
Captain George W. Torrey, of the fishing schooner Alice, reports that his boat was almost run down by a floating island in the Pacific ocean off Cape Flattery. The captain and crew went on it and made partial exploration. There was a hut and a small farm on the island and other signs of habitation, although there were no signs of life.—Seattle Letter.

Australians have had bitter experience of the mischief which rabbits are capable of doing, and now they seem likely to have trouble of a similar kind from the introduction of foxes.

A sore throat troubled John Haines, of Danville, Ills., and he lost his voice in consequence of it. After a few days he coughed up a brass pin and his voice was restored.
