Mr. Morton deried that silver was secretly demonetized in 1873 and quored history and records to prove that it was demonstraed in 1853. He asserted that the free coinage of silver would drive gold out of the United States and directby affect every farmer and laboring man in the country. He dealed that there was a denumal for more money and asserted that the people of Nebraska had \$50,000,000 on de posit outside of the cities of Lincoln and Omaha. Free courage of sitver, he said, would Mexicanize the United States.

But if Mr. Morton's roast of Bryan was severe his lashing of General Van Wyck and the people's independent party was merciless. He asserted that the decline in the value of farm products in this if so country was due to the working Is of the homestead law, which had transformed the wilderness of western prairies into productive gardens, to the trebled area of farms within the past quarter of a century, to the vast improvements in farm machinery by which one man could now produce as much as six, twenty-five years ago. The demand for products has not kept pace with the supply, and the * 20 values of farm products have decreased on account of these things The profits have not disappeared 214 T they have simply been transferred 7: 10 from the producer to the consumer until today the world is betterand oftener fed than ever before in its history.

The success of the alliance party this fall, asserted Mr. Morton would drive eastern capital from the state

and irreparably injure the credit of the state. It would mean absolute death to the last interests of the state Mr. Morton also madeapersonal assault on Sexator-Van Wyck, explaining how the later had secured his land in Otoe county. He challenge hany triends of the independent candidate to point to a single line of law in favor of the propie that had been supported by Van Wack.
