the Car In Such a Manner as to Throw Him Under the Wheels-The Bone In the Right Limb Crushed Above the Ankle-Other News.

This morning while working in the tioning. lumber vard at the Burlington shops Louis Olson met with an accident that will make him a cripple for life. He was carrying a heavy timber past some cars that were being hendled by the switch engine and in some way the timber struck the car in such a manner as to throw him down under the wheels. The sharp iron flange of the car wheels passed over one limb above the ankle and severed it almost entirely, crushing the bone in a frightful ly happy over small things. Adults are

Chairman Post Confident

Chairman Post of the republican state central committee is more confident than ever that the McKinley electors as well as the republican state ticket will have a substantial majority in Nebraska next November. Chairman Post was busily engageu with his voluminous corr spondence today when a News repor called at headquarters. In answe. an inquiry he said; "I am more con Lient than ever that McKinley and the state ticket will carry Nebraska by a good round maj ority. The free silver sentiment in Nebraska reached high water mark some time ago and the tide is now clearly and unmistakably turned our way. Two weeks ago I said Nebraska would go republican ar today I am stronger in that opinion than before. While there are republican defections in some counties they are more than offset in others by republican gains from democrats and populists. Long before the campaign is ended Nebraska will not be regarded as doubtful by even the opposition. Every indication points to republican success and as the campaign progresses these indications will become more pronouuced and stronger.

London's Public Houses. The public houses explain a great many of the miseries of the miserable locality. There may be some teetotalers, but there are not many, and there are

almost as few drinkers who are always moderate in their libations. The curse While Carrying a Heavy Timber It Struck of bitter beer, raw Scotch whisky and "tuppenny" gin rests heavy on the place. At night, however, when all was in pitchy darkness, the crab surprised the naturalists by lighting up the tank so that all the other sea creatures, great and small, occupying the same tank could be ted flashes of lights which enabled the experimenters to read small print, even though otherwise they were in total darkness.—St. Louis Republic.
