DENVER, Aug. 2 - Eastern Colorado. western Nebraska and Kansas are just now in the threes of a grasshopper plague, the worst on record for lifteen August 23 Is the Date Fixed On for the years. Crops are being devastated and Muster-Out General Otts Sends for the farmers are being driven to dis-Lieutenant Russell-Offers Him a Com- traction by the inroads of the pest, according to reports received at the

> State Horticultural department this In fact, the gra-shoppers are doing so much damage that the entomolo gists of the three states have decided to hold a meeting to devise a plan to combat them. Prof. L. Bruner, state entomologist of Nebraska, arrived at Denver at noon from the affected dis-

tricts and after a consultation with Mr. Shute, secretary of the horticultural board, left for Fort Collins, where he will consult with Prof. C. P. Gil lette, the Colorado entomologist, and S. J. Hunter, the Kansas authority of bugs, on some method of getting rid of the pest that is now making life a burden in the rainbelt country.

"I have seen the grasshoppers thicker in that section, but not often,' remarked Prof. Bruner. "They are as numerous now as the farmers can stand and unless something is done at once to check them the loss to crops will be tremendous. At our meeting we shall recommend the general use of kerosene hopper-dosers by the farmers in their fields and will also urge plowing up the edges of alfalfa patches, stroyed. We have several other schemes on foot which may serve to check the pest to a great extent."
