Yesterday was certainly a red letter day for the republicans of the United States, and as the results come in from different sections of the country, this becomes more and more apparent. Every candidate on the ticket with the exception of Bennett, for commissioner, has been elected by good, safe majorities.

The state central committee claims that McKinley has carried the state by 5,000 to 10,000 and this is also conceled by many prominent democrats. While three or four days will be needed to ascertain just what did happen. it is enough to know that Bryan's ma-

reading.

Rev. Irl Hicks in Word and Works twenty-sixth verse, and also the entire

jority of 13,576 four years ago was wholly demoralized, if it was not actually changed to a deficiency. Notes of the Battle.

It was a veritable landslide. Many things happened yesterdayeven the fusionists will admit that. J. R. Denson was elected assessor in the Fourth ward by a plurality of fourteen over his opponent, Henry Ofe. Bryan carried but four precincts in Cass county, and it will take

them several days to get over the surprise this bit of intelligence gave them.

George K Staats, who ran for assessor on the republican ticket in the Third ward, received a plurality of seventeen votes over his opponent, C. S. Twise.

C. E. Heebner of Weeping Water, Jesse Davis and R. A. Case of Nehawka, A. E. Lake of Murdock and F. A. Cremer of South Bend brought in the election returns from their respective precincts today.

In one of the wards a voter handed in his ballot with only a pen scratch on the margin. Of course, this ballot was thrown out. Another voter placed a cross after the name of the republican candidate for assessor in his ward -slighting the rest of the ticket.

A telephone dispatchreceived from republican headquarters late this afternoon stated that the republican state ticket was absolutely safe, and that McKinley stood an excellent chance to carry Nebraska by a majority of several thousand. Stand up for Nebraska!

One prominent democrat, it is said, wagered \$100 that Bryan would be elected, after reading the fake dispatch sent out yesterday afternoon by Metcalf of the World-Herald, stating that Bryan carried New York by a majority of 150,000. It is safe to say that this democrat will not listen to fusion predictions in the future.

Second ward republicans feel highly elated over the fact that they elected two Williams-McKinley and William Weber-the latter receiving a majority of eighteen over his opponent, Peter Ruffner. The latter has heid the fort as assessor in that ward for eighteen years, and Mr. Weber had a hard man to defeat. It is said Mr. Ruffner received a number of votes as preference for United States senator, and if he makes the race Rose water's chances will go glimmering.

Would Help the Farmer.

The local correspondent of the State Journal sent the following to that pa per today upon the request of some of the republicans of this city:

American moose there and entered into correspondence with the Canadian government. The authorities of Ottawa premised to assist the project and with the help of C. C. Chipman chief commissioner of the Hudson

Bay company, thirteen baby moose, none of them more than a few weeks old, were got together in the Lake Manitoba country. These were handreared for six or eight months on chopped food, fresh fruit, vegetables, etc., special care being taken to get them sufficiently tame for the long

voyage that was before them. The railroad company from Portage la Prairie to the Pacific coast was about 1,600 miles, and they were embarked on board the steamship Aorangi for a sea voyage of a month to the Antipodes.

Four very fine specimens of Newfoundland caribou were recently sent from St. John's to the National Zoological parks at Washington. They were shipped by United States Consul taneous combustion, and it is all Carter at St. John's on board the supplied.

A WINDOW GARDEN.

Rules for Taking Care of Plants in the House.

Nine-tenths of the windows used for window gardening are too crowded for the plants to look well or do well. Turn a new leaf right now by throwing away every poor or insignificant growth. Better to buy new stock in the spring than to turn your precious window space into a hospital ward for sickly plants. Keep the plants immaculately clean. Wash the leaves once or twice every week. A plant's lungs are in its leaves. Showering the foliage washes the dust out of the pores, refreshes the plant and imparts vigor. Besides this, clean plants do not harbor insects, the greatest foe of the indoor garden, and the hardest to fight. Loosen the crusted earth at the top of the pots. The roots need air and in soft, pliable earth they get it by capillary transmission. A hard top crust seals the soil up as though in a jug. Neither air nor water finds free entrance through it. Plants in hard soil often suffer from lack of moisture at the roots, though water has been given every day. Slide the shades up to the top of the upper sash; take down the curtains at the plant windows and let God's invigorating sun shine in. Sunshine to a plant is what gold is to a Klondike miner. In extremely cold weather stay the watering pot. Plants need little water

CULM BANKS AFIRE.

Coal Dust Near Wilkesbarro Burning for

Twenty-Five Nears. is curious stud, and seems to be an abundance of it. Peo-

ple who travel through the mining regions always inquire about the great mountains of coal dust that rise i every direction, some of them 200 fee in height. These piles of culm ofte catch fire either by accident or spon impossible to extinguish them. At steamship Sylvia, bound for New night the red glare is visible all over York. They were caught when quite the valleys. Near Wilkesbarre a cuin young by George Nicholls at Deer bank has been burning for 25 years. Pond and were so docile that they Various attempts have been made to would follow Nicholls about like dogs. quench the fire, but it is just as bright Orders were recently received at Que- and vigorous today as it was a quarbec for live beavers for Bronx Park, ter of a century ago, and the company New York, but as the capture of these | having abandoned its efforts to put out animals is at present prohibited there the fire, feeds it regularly by dumping it may be some time before any can be fresh cuim upon the flames. If this was not done the fire would eat its way into the great bank and ultimately break out in several places; but as long as the surface fire is fed with fresh fuel it does not burrow into the heap. Formerly culm was considered dead waste, but some years as the furnace was invented in which it co be utilized for steaming purpower after water has passed over it and foreign substances washed wit. Therefore, more of the mining companies have erected washeries at their culm piles, and many manufactoring establishments have come into this neighborhood solely because they are able to

use it as fuel .- Chicago Record. Hops Grow Wild in English Counties.

It is a somewhat remarkable fact that the hop, although only cultivated in a few districts in a few English countles, yet grows freely in a wild condition in very many places. It is a perennial, flowering in July and August, and to be found in bedges and thickets. The plant is only cultivated. for instance, in the northeastern portions of Hampshire, and about Petersfield, and even there it does not cover 3,000 acres in all. It grows and flourlshes, however, in a wild state all over the county, including the Isle of Wight. -London Express.
