

WISE TALKS BY THE OFFICE BOY

Josh Wise says, "Some men sneer at women's shopping but when women shop they don't have to eat cukes to degum what they've been buying." Speaking of cukes I think we carry the smoothest line of spices that ever came over the sea. You know some spices are all drawn out of one barrel so it's a good idea to represent each part of a spice, such as cinnamon, clove, nutmeg, pepper and mustard. This saves a lot of trouble for the user, because they don't have to use a different pepper for different very kind of spice, but of course this is all done away with now, when you buy spices at our store you get almond shells or some kind of hulls flavored with nuts and other things, and mixed with other crumbs or any other dope to make it go farther. Handle Davis, Wright Co's spices and flavoring extracts, cranberry, Sour Cider, Celery, Lettuce, Bananas, Nuts, Figs and Dates, Raisins and Currants, Candied Citron, Oranges and Lemons, Curtis Bros. Co.

A deal was closed on Monday by which Winfield Swan became the owner of another fine 80-acre farm northeast of town, known as the Hargus farm formerly owned by Henry Ruhman, who sold it some time ago to Bruce Stone of Nehawka. JOHN BAUER

CHIEF NATIONAL RANGE

Although this range may have an exterior appearance resembling the Ranges exhibited in other stores in the city, and therefore does not appeal to you, as a subject of special attraction. We assure you that it is decidedly different from all others in construction, containing those particular features which make it the best Range ever offered to the user. The firebox is so constructed that the heat will radiate into the oven at the same moment a fire is started. Consequently, soon as the fire has attained the necessary 250 degrees of heat, the oven also will register the same temperature; therefore, it is ready to bake. The results of this direct action will have a telling effect on the coal pile, saving nearly half the fuel used in ordinary stoves. The fire back lining is guaranteed for 5 years use. The front section of the top can be suspended, making a convenient place for broiling or toasting. A special cover or lid on top is arranged for cooking oat meal, milk, rice, etc., without fear of scorching. The body is made up of three distinct walls, which retain all heat into the stove. If you will call at my store and examine this Range, you will admit there is no other to equal it at prices that will meet your approval. I have some special bargains in express wagons, child and Misses Rockers, bookcases.
