We believe it would be a good idea for all the farmers who are in the creamery business to have their herds looked after at least once every twelve months.

Dates of Corn Show

The National Corn Association has selected December 6 to 18 at the dates for the National Corn Exposition of 1909. It will be held at Omaha.

In selecting the dates named, the National Corn Association has explained that the plans for smaller corn shows in all parts of the country made it impossible to hold the national show on any other dates than those selected during the first weeks of December. To hold it earlier would not permit the state shows to get their prize corn ready and shipped to the national show. When it is taken into consideration that Illinois alone holds 10,000 school district corn contests, some idea of the immense amount of preparation necessary for the state and national shows, may be gathered. The state shows do not close before Thanksgiving week and more than one week is required to get the prize corn and grains to the big show at Omaha.

To hold the National Corn Show later would conflict with numerous conven-

tions and meetings, while a week earlier would conflict with the International Live Stock Show, an exposition which co-operates with the National Corn Exposition.

The management of the Exposition has been advised of dates chosen and Omaha business men will increase their subscriptions to \$100,000 to promote the show of 1909, which will be much larger than the one of 1908.
