

# Durability Is the Point

## On Which We Wish to Lay Special Emphasis

The entire work on a Case engine is put on with a view to make it more durable. The spring mounting on a Case engine is not only theoretically correct, but has proven thoroughly efficient on engines doing all kinds of road and contract work and plowing. The tractibility of one of these engines is more than any other engine of the same rated horsepower. The traction wheels of the engines are built-up steel wheels, which take more time to construct than the cast iron wheels, but can be repaired, while cast wheels cannot. This part of the engine is subject to severe usage and their construction should claim the closest attention of purchasers. The Case traction engine is superior in every respect to any other engine for the hill climbing that must be done here. The large wheel base, boiler mounting, double gears, more equal distribution of weight on front and rear axles and their great power make the Case the premier puller up hill or on the level and over all conditions of roads. The 10x10 inch cylinder simple traction engine is rated at 20 horsepower and is the one in more general use than any other size or make of traction engine. This engine has a wide range of uses such as grading, pulling stumps, saw-milling and well-drilling.

It sells for.....

### \$1,700.

#### PROPER CARE OF THE INSANE.

City of Gheel, in Holland, Takes Care of These Unfortunates as Its Guests.

One of the most remarkable places in Europe, of which no tourist on pleasure bent ever takes notice, is the "City of the Insane," by which name Gheel, near Antwerp, has been known for generations. About 1,500 men and women, afflicted with insanity in all its forms, live there, and have a happy being as the "guests" of the inhabitants, who know by experience how to treat the unfortunate ones. In the streets, in the places of amusement, the cafes and workshops these patients may be found, and nowhere is there the remotest suggestion of restraint apparent. The board ranges from 240 to 2,400 marks a year, and, no matter how small the amount may be, the patient is always the favored member of the family. He has the first right to the most comfortable chair, and the head of the table belongs to him. He receives the most attention, and this he learns to appreciate and to endeavor to maintain by living down his illness. Even the children know how to treat the demented people. The dangerous ones are sent to another settlement and to institutions. It is wonderful how considerate careful and kind the simple people are toward their charges, and a peep into the community would probably terrify physicians who had never heard of and could not appreciate the good which is being done in this "City of the Insane."

#### Loquacious Britons.

As a nation and as individuals we are suffering from acute verbosity. Everybody talks too much, says far more than is necessary, and a great deal more than is wise.—Lady's Pictorial Magazine, London.

#### Analysis of Argument.

"Dar is two kinds of arguments," said Uncle Eben, "dem in which you is tryin' to enlighten somebody an' dem in which you is tryin' to fool somebody."

#### A Fashion Note.

"Ecclesiastical' gown's the thing," says a writer on the modes. For ladies, of course, who make a religion of following the fashion.—New York World.

#### A Toast.

To Eve, who, recognizing the value of a higher education, secured it for herself and her descendants, while Adam thought only of tickling his palate.—M. A. Watson, in Judge.

#### Fear of Microbes.

Microbes are agents of disease and death. When they were discovered and when their character was exposed science made a big step forward. Microbes taught men not only how to cure disease, but how to avoid and even how to prevent it. But into life they brought a new terror! Now the question is how to guard against this terror. For all fairly healthy persons there is just one thing to do. Ignore the existence of microbes altogether! Don't even stop to think of them, save in emergencies, which, to the layman seldom arrive. Human beings have no reason to be in continual fear of microbes. The way to be immune from their influence is by not caring a snap of the finger about them, and by observing the ordinary rules of wholesome living. Eat and sleep regularly. Take exercise. Keep in fresh air. And devote a few minutes each day to deep breathing. Microbes hate healthy people as the devil hates holy water.

#### Another of Lillian's Victims.

He was telling of his lifelong love for Lillian Russell. "It was when I was two years old," he said, "that I first fell in love with her. I saw a beautiful picture of her on a cigar box, and I have never recovered. I never really saw her, but I have been in love with her from that day to this."

They looked at him earnestly, for while he wore no beard he appeared to be somewhat past his first youth at least.

"How old are you?" they asked him presently.

"I am 26," he said.

#### Seeing Is Believing.

Isaac (who has just recovered from typhoid)—"Doctor, you have charged me for four weeks' calls; I will pay for only three weeks!"

Doctor—But I called on you every day for four weeks, Mr. Isaac!

Isaac—Vell, dere was one week I was delirious and I didn't see you come in!—Life.

#### His Motive.

A.—That old villain has gone and married his cook. I wonder at it, for her cooking is miserable.

B.—That's all right. He has now got her out of the kitchen, and hopes she will hire a cook that will suit him.

#### First Wire Hairpin.

The wire hairpin was first made in 1545 in England. Prior to that wooden skewers were used.

#### Self-Evident.

If you're willing to make the best of it, you're not likely to get the worst of it.

#### NEVER A MAN TO BE ENVIED.

Philadelphia Writer's Idea of Status to Be Accorded Bachelor in Society.

The bachelor is punished already, not only in losing the joys of a home, but being an object of contumely. So long as bachelors are willing to put up with all the losses they sustain in celibacy far be it from the majesty of the law to impose further penalties. It was Cicero or a man of his day who remarked that it was onerous for a man to get along with a wife, but impossible to get along without one. The bachelor is not a man—only a more or less imitation of one—sometimes a very poor one. He thinks he has a good time in escaping all the major responsibilities of life, but he is deceiving no one but himself. As an example and a warning he has his uses in society. As an individual he is apt to find that he is eating only apples of Sodom. The man who deliberately remains a bachelor is already punished enough. Let him alone in his misery until some nice girl comes along and carries him off. And we may remark that no man is a bachelor of his own initiative—no matter how much he may think so. He is simply a human derelict whom the women have examined and passed by. The bachelors are the disjecta membra of society when no woman will have. That is awful and it is enough.—Philadelphia Inquirer.

#### Proposals and Arguments.

I will confess that I attach much more importance to men's theoretical arguments than to their practical proposals. I attach more importance to what is said than to what is done; what is said generally lasts much longer and has much more influence. I can imagine no change worse for public life than that which some prigs advocate, that debate should be curtailed. A man's arguments show what he is really up to. Until you have heard the defense of a proposal you do not really know even the proposal. Thus, for instance, if a man says to me, "Taste this temperance drink." I have merely doubt, slightly tinged with distaste. But if he says, "Taste it, because your wife would make a charming widow," then I decide. I would be openly moved in my choice of an institution, not by its immediate proposals for practice, but very much by its incidental, even its accidental, allusion to ideals. I judge many things by their parentheses.—From the Forum.

#### Statistics.

Of the 1,001 young women who fainted last year, 998 fell into the arms of men, two fell on the floor and one into a waterbutt.—Life.

#### Guarding Against Earthquakes.

All great crises have stimulated the creative faculty of mankind, and earthquakes have, of course, earned a full share of attention. The most original notion in this connection was put forth by a genius who quite satisfied himself that if houses were provided with wheels or rollers they would move about backwards and forwards during an earthquake and escape disaster.

#### Hollanders Heavily Taxed.

All told, a Hollander pays about 12 per cent. of his yearly income for taxes. He is taxed for his business income, for the interest he collects, on his house rent, his furniture, on six fireplaces and all the stores in the house by rents or owns, on his horses, bicycle and servants. On an income of \$2,400 a year he pays \$285.

#### Mortgage on a Cat.

A mortgage on a cat is not often heard of. However, the other day there was filed in the recorder's office a chattel mortgage the consideration of which was \$20. The property on which the money was secured was described as a "cat called John."—Columbus Dispatch.

#### Precautions Against Rats.

The owners of grain godowns and warehouses in Calcutta are compelled by municipal regulation to pave with concrete to prevent the ingress of rats, which, it is believed, will aid materially in the extermination of this active distributor of the plague germ.

#### No Price Limit.

If a young man develops a first-class business ability he needn't bother about a fortune. His professional talents will find employment at rates which will make the possession of a fortune superfluous.—Saturday Evening Post.

#### Didn't Mean Anything.

"One can't help knowing," said a dandy, "when one is good looking. Why, I got off at a small station the other day in the country, and I must confess that I attracted a great deal of attention."  
"It doesn't mean anything," said his friend. "Why, when I get out of the Grand Central station I meet a crowd of men who yell 'Hansom! Hansom!' at the top of their lungs."

#### In the Lion's Den.

First Martyr (to second ditto)—Well, old chap, there's one consolation—there won't be any after-dinner speeches.—The Sketch.

#### Immense Cuban Cabbages.

Cuba grows 20-pound cabbage heads.

## Rich Roast Beef.

After all there is nothing so good as a good ROAST cooked well. We have the knack of cutting and tying up a roast that makes it cook well and taste well. Send orders in by either phone.

## Kunsman & Ramge

## For Hot Fires Get Egenberger's Coal!

Sure satisfaction every time you light a fire if on top of the kindling is ebony fuel from our yards. It's heat and light giving and slate-free when it leaves the mines, screened and cleaned again here and served to you full weight and with celerity of delivery. Order any way that suits you. Both telephones.

## J. V. EGENBERGER

## Fireless Cookers

We handle the National fireless cooker, and guarantee it to give entire satisfaction. Now that the hot sultry days are coming it will pay you to investigate this. New and second hand gasoline stoves and refrigerators. A large stock of dining room chairs at specially low prices, running from \$5 to \$10 per set.
