

Sieze an Opportunity

Of getting a threshing rig now, so you can get in on the winter wheat threshing, and while you are about it get a GOOD rig. The trouble with a good many threshermen is that their rig is of inferior grade, consequently they are not making the profit they should. To make a threshing rig pay you should have a CASE machine that is fire-proof and weather-proof. It is a machine that you can depend upon and it will make you money. The J. I. CASE Separator is a fast and clean separator, practically all wood and cast iron parts have been replaced with structural steel and galvanized sheet steel. The structural steel is of open hearth quality which is many times stronger than cast iron. This material is expensive, but it makes a machine that is indestructible through ordinary wear. The J. I. CASE Traction Engines will give you a good deal more power than it is rated at. Its hill climbing qualities are unsurpassed. Engines did not used to be built with a view of pulling loads, but in the Case Engine the weight is evenly distributed and with the double gears, and large wheel base it is easily the peer of any other machines of its kind on the market. A medium sized job thresher and a 15 h. p. engine would cost you about.....

And How Few Do!

Man's chief wisdom consists in knowing his follies.—Rochefoucauld.

And the Proper One.

The road leading to justice is the easiest.—Frost.

Pessimistic.

"Well, what be you kickin' about now?" queried the cross-roads store keeper. "You sure have good crops as the prices are good enough, I reckon."

"Tass," rejoined the old farmer, "w' er traps air good, but if I sell now th' prices air bound t' go up, an' if I wait fer 'em t' git higher they air bound t' git lower; so I can't help losin' enny way yew figger it, by grass!"

Essential to Matrimony.

The inhabitants of the Green Islands, in the China sea, are largely engaged in diving for sponges. No girl there marries until she has shown skill in bringing sponges from the depths. In some of the islands the father of a marriageable daughter bestows her upon the most successful diver—he who can stay under water and bring up the biggest load of sponges.—Woman's Life.

Rats' Cold Weather Retreat.
Many animals snuggle together for warmth in bitter weather—as the squirrels and the rats. Those who go rattling in hedges and dells in the winter know they may try a dozen freshly-made burrows without finding a rat—when suddenly from a single hole the rats will come pouring out in a stream of frenzied fur. Twenty or more rats will be together in one hole.

They are clever enough to block up a hole on the windward side—to keep out the draught—so that when a rat-hole is noted, newly stopped with soil, turnip leaves or grass, here is almost certain indication that rats are within. Like the squirrels they store food for winter—and the keeper may find it more difficult to secure his potatoes from frost than from the attack of the most numerous of his furred foes.

To Overcome Colds.

A French doctor has had great success with scattering boils by applying at the first sign of inflammation compresses wet with equal parts of tincture of arnica, tincture of iodine and spirits of camphor. Continue until the trouble seems to be passed. If with the compresses one drinks sulphur water or redclover blossom tea it will help to scatter the boils and overcome the tendency.

Real Attractiveness.

A magnetic personality is often more powerful than ability, and is often, very often, placed in the balance against it. It is therefore advisable to exert oneself to the utmost to cultivate that wonderful charm to the highest degree, and she who has it not is not so much to be pitied as blamed, for it is, more or less, within the reach of all.

A Time Charge.

A benevolent New Yorker recently employed two girls to do a special piece of work in his office. When it was completed he found that one girl, being expert, had done a great deal more than the other one. Being uncertain what he ought to pay them he decided to leave that question to them. The expert girl set her price and, to his amazement, the other girl charged considerably more.

"How is that?" he asked. "Miss Swift charges me a great deal less than you do for the same amount of work."

"Certainly," reasoned Miss Young. "It took me a great deal longer to do it than it did her. I ought to be paid for my time, oughtn't I?"

The benevolent New Yorker reflected, murmured something about her manifest qualifications for the plumbing business, and finally compromised with them both by a sagacious deal in candy.
