Greenwood Wins Another

Malcolm Team Meets Defeat on the Greenwood Diamond Last Saturday.

Greenwood added another scalp last Saturday, to her belt when the home team copped the long end of a 3 to 2 score with Malcolm as victim. The game was loosely played, the terrific heat making snappy work an impossibility, a total of fourteen errors being charged up to the players. At the end of the fifth inning the score stood 3 to 0 and it looked as if the local bunch had a walk-a-way but a single, an error and a hit batsman sent a man around in Malcolm's half of the sixth while two errors and a base on balls filled the bases with visitors in the first half of the ninth. Craig lost control and hit the next batter forcing in the second run and the bases were still filled with no one out. On the batted ball the infield worked a neat double play and the Greenwood twirler settled down and fanned the next batter for third out, thus stopping what had appeared to be a winning rally for the visiting team.

The score:—
R. H. E.
Malcom 0 0 0 0 1 0 0 1 2 1 9
Greenwood 0 1 0 1 1 0 0 0 3 5 9
Batteries; Greenwood, Craig and Hanson; Malcom, Gans and Broderick. Struck out; Craig 5, Gans 7, Base on Balls; Craig 3, Gans 1, Wild Pitch; Craig 1, Gans 1. Hit by Pitcher; Craig 2. Double-play Craig to Hanson to Kelly.

The Greenwood team with a number of substitutes in the line up went to Cresco for a game on Sunday and came home with the score 6 to 3 in favor of Cresco. The locals tried out a new

pitcher, Charles Helm. He was able to hold out for one inning and during his stay on the slab the Cresco team connected with his left handed offerings for a total of six runs. That ended the "Swede," Jame going and the latter succeeded in holding his opponents to one solitary hit for the remainder of the game.

The score:
Greenwood 2 1 0 0 0 0 0 0—3.
Cresco 6 0 0 0 0 0 0 0—6.

Has Operation Performed

Clyde Adamson recently had an operation performed by Dr. E. D. Cummins to straighten the little finger on his left hand. About a year ago he had the little finger badly crushed and it has since caused much trouble in working as it stayed bent. Clyde has not much hopes of getting the finger in normal condition, but he thought he would try it and possibly overcome the necessity for amputation.

Mr. Bauer Improves Residence.

John Bauer, sr. is having some extensive improvements made to his residence property on Vine and 7th streets making a full two story building out of the house. Tom Isner has a contract for the work and this insures a careful and up-to-date completion of same. Tom says the building will be a "Bungalow in style and will be one of the most modern and comfortable in the city when finished. Plattsmouth is certainly on the boom in the improvement line and Mr. Bauer is to be commended for his share in the good work.

Miss Helen Ptak left Thursday morning for Orleans, Nebr., where she will visit for several days with her aunt.

Great Crowds At Circus

Many People Here Plan to See Barnum & Bailey at Omaha.

Plattsmouth will be well represented at Omaha on July 13, when the Barnum & Bailey greatest show on earth exhibits there on that date, for a great many of our citizens have already expressed themselves as having made up their minds to attend. A glance at the list of wonders to be seen with this big show would lead one to believe that the limit in tremendous size as well as number of novelties to be seen has finally been reached. Barnum & Bailey presents this year under their city of 14 acres of tents more things new than have been offered by all other shows in years. "Jupiter, the balloon horse," Karoly's troupe of 16 Hungarian coal black stallions, the musical elephants, celebrated Konyot troupe of equestrians, seven troupes of foreign acrobats, four troupes of aerialists and hundreds of other arenic novelties all go to complete a circus performance that has never been equaled. The big menagerie has been augmented by the addition of many new strange beasts and is larger than all the zoological garden in this country combined. The street parade so gorgeous and so tremendous in size, beggars description and in all is a fair index to the wonderful performances that follow.

Solicitors Wanted.

The NEWS-HERALD is in a position to use a couple of good solicitors either all or part of the time. We have a good proposition—one you can make some money with. Please write immediately, or call at the office.

Watches, \$1 to \$50 at Crabill's.

A Model Telephone Exchange

Improvements Made by the Bell Company on a Big Scale.

The Nebraska Telephone Company is now located in their new offices over Falter & Thierolf's clothing store. When the people of this city and Cass county become acquainted with the completeness and promptness and efficiency of service, they will doubtless appreciate what the Nebraska Telephone Company has done and are doing in the improved service given. In building the exchange in this city, the entire plant has been built according to the best known methods in telephone engineering. The old method of stringing hundreds of wires about the city has been supplanted by a complete new cable system extending to almost every portion of the city. In the business portion of the city cable terminals are used on the buildings, and insulated wire is used thus reducing the danger from electrical storms, as well as the inconvenience to the patrons, which has heretofore followed such storms, to the very minimum. In placing their phones in residences the company do the wiring and use a lightning protection approved by the Underwriters Association, thus giving the best possible protection from lightning.

The new Switch Board is a very perfect piece of apparatus, and is the latest model being equipped with many improvements which could not be purchased one year ago. This switch board is manufactured by the Western Electric Company, and is so built that any number of instruments may be added by simply putting in additional sections of the switch board without disturbing the part already installed. It is a very sensitive piece of apparatus and by a system of signals the operator at the board is shown how much time is consumed by the parties talking and which one hangs up the receiver first. This a great improvement in the operating service, and a very great convenience to the subscribers. In case you want to talk with two or more parties in succession you are not compelled to hang up the receiver, and ring and ring, and then stop and swear and swear and ring some more, but as soon as the party you are talking with hangs up the receiver the operator at the switch board gets the signal and is ready for your next call. The old system of turning a crank to ring central is out of date, all that is necessary to call central is to take the receiver down and place it to the ear quickly which gives a signal at the central switch board.

The Storage Battery is located at the central office, and has all the latest improvements and is protected from any possible accident by a number of devices. The terminal room is equipped with a wire chief's testing apparatus by which difficulty on the wires can be accurately determined and located.

A more complete and up to date telephone plant cannot be found anywhere than this city now possesses, and everybody will appreciate its splendid service.

Handkerchief Shower.

A handkerchief shower was given at the home of Miss Emma Falter, Thursday afternoon, in honor of Miss Ella Margaret Dovey, whose approaching marriage to George Falter has been made public.

An elegant four course luncheon was served during the afternoon, the table being decorated in white, the center piece consisting of two large white hoops bound with white satin ribbon. These surrounded a large ring decorated with crimson rambler roses. At each place at the table appeared the handkerchiefs which were gifts of the guests to the bride-to-be, and these attached to the ring by streamers of white ribbon by which the guest of honor could obtain possession of them.

White wedding bells were used for place cards, with the name of the guest in one corner and two tiny red hearts in the other, pierced by an arrow. Those present to enjoy the occasion were Misses Ella Margaret, Helen, Florence, and Catherine Dovey, Stanfield Jones, Gladys Sullivan, Gretchen Donnelly, and Mesdames, H. S. Austin and Rea Patterson. Misses Lucille Gass, Kathryn Windham and Elizabeth Falter assisted in serving luncheon.

For jewelry, watches, rings, silver-ware, clocks, and cut glass see Crabill.

The Loco Disease of Live Stock in The West.

The so-called loco disease of horses, sheep and cattle has been for many years a source of serious loss to stockmen in the west, who have generally attributed it to certain weeds eaten by the stock. Investigations by the United States department of Agriculture have not only confirmed the supposition as to the poisonous effect of these plants, but have resulted in the discovery and identification of barium as a definite poisonous element in them. Feeding experiments establishing the fact that the plants are responsible for the disease were carried on under field and corral conditions by Dr. D. Dwight Marsh, while the discovery of barium was made in the laboratory by Dr. A. C. Crawford.

The loco weeds are a class of leguminous plants of which the principal ones are the purple loco weed (Astragalus mollissimus) and the rattle-weed (Aragallus lamberti.) One or both of these prevail to a greater or less extent over an area including all or parts of Montana, Wyoming, North Dakota, South Dakota, Minnesota, Nebraska, Kansas, Colorado, Utah, Arizona, New Mexico, Texas and Oklahoma.

The characteristic symptoms of the disease are a slow, staggering gait, rough coat, staring, vacant look, and emaciation. The affected animals have hallucinations, cannot be led or backed, show more or less lack of muscular coordination, gradually lose flesh and die. The affection comes on in a slow and cumulative manner, and there is no possibility of animals becoming immune by continually eating the plants.

The proverb "An ounce of prevention is worth a pound of cure" applies to this disorder. Although good results can often be obtained by the treatment of locoed animals, the most effective way of dealing with the trouble is to keep animals from eating the loco plants. Wherever practicable the weeds should be exterminated from the range or pasture, and the best way of doing this is simply to cut them out. This method, however, while often practicable on land under private control, cannot very well be applied to the public range. In many cases much can be accomplished by keeping animals away from the loco-covered ranges during the time when feed is short, as they are much more likely to contract the habit at such a time. It may sometimes be profitable to feed them for a short time, in order that the loco-eating habit may not be formed.

After animals have become affected the first essential in their treatment is to place them where they cannot eat the loco weeds. They should be given plenty of nutritious feed, and so far as practicable, feed with laxative properties, such as green alfalfa. Some may recover under this treatment without recourse to medicine. With most animals, however, recovery is hastened by medicinal treatment.

As a result of its experiments the Department of Agriculture suggests the following treatment: For cattle, strychnine in doses of three-twentieths to four-twentieths of a grain daily, administered hypodermically. For horses, Fowler's solution of arsenic in half-ounce doses daily in the drinking water or in the grain. This treatment should be continued for at least a month. To correct the constipation which is almost universal in locoed animals, magnesium sulphate (Epsom salt) may be administered as a drench in 2-ounce doses. Epsom salt may also serve to some extent as an antidote to the poison produced by the weeds. Beneficial results have also been obtained by giving horses daily a drench containing 2 ounces of Epsom salt with 10 drops of diluted sulphuric acid, and by giving cattle tri-weekly 3 to 4 ounces of Epsom salt with a proportional increase in the quantity of diluted sulphuric acid.

As the foregoing treatments are in the experimental stage, the Bureau of Animal Industry, Washington, D. C., would be glad to receive reports of results from their use.

New Millinery Store At Havelock.

Misses Mary and Kate Curtiss, formerly of Plattsmouth, have entered into partnership with their sister, Mrs. E. C. Garrison, of Havelock, in opening a first class millinery store. Mrs. Garrison has had a small millinery parlor for a few months past and has recently rented the Kenny building, on Indiana avenue and is expecting to open on a larger scale Aug. 15. All the parties were formerly Plattsmouth girls.

You get quality and your money's worth at our fountain. Gering & Co.

New Drug Store Is Opened

Weyrich & Hadraba Commence Business most Auspiciously

Weyrich & Hadraba will open their new drug store on Main Street Tuesday, June 29, for the inspection of the public, and there is no doubt that the new firm will receive such a welcome as is fitting to the energy and enterprise shown by these two plucky and experienced young pharmacists, who have spared neither time nor expense in establishing the neatest and most up-to-date store in the city.

Emil and Joe were both reared in this city, are known to be thoroughly educated in their line, have the confidence and best wishes of the entire community, and success will deservedly result from their efforts.

The NEWS-HERALD calls the attention of its readers to their advertisement on another page of this paper, in which you are invited to be present at the opening of the new drug store, where everything is new but the men. Don't fail to drop in and note the splendid fixtures all made to match, in golden oak, also the new front with the upper portion of prism glass, which makes the interior lighter than the outside. The modern sanitary fountain itself is worth a trip of inspection and will satisfy the most critical that here is the coolest place in town to get a cold and refreshing drink of soda.

That one of the boys intends to always be present at the store insures courteous and expert service at all times.

The interest and welfare of the public requires a visit of investigation to this excellent new store.

Omaha vs. Plattsmouth

Plattsmouth 0 0 0 0 2 0 2 2 0—6
Omaha 0 2 0 1 0 0 0 1 0—4

The above shows the score in innings of a very interesting game of base ball between Plattsmouth and the Fraternal Union base ball team of Omaha, Nebr., Saturday afternoon.

The teams were very evenly matched the score running closely throughout the game.

For the home team McCauley pitched all except the first two innings, Richey holding down the box in those, while Jensen performed likewise for Omaha. They were all on their mettle and but five hits were taken off Richey and McCauley and the Plattsmouth hitters secured eight off of Jensen.

The backstops for both teams did excellent work. McCreariz, shortstop was unfortunate in getting his finger hurt but he continued the game with but two errors one of which was the indirect cause of a score for Plattsmouth.

The basemen all played errorless game with the exception of Gould who fell down twice.

The fielders all played their positions well, especially Beal for Plattsmouth, who captured several difficult flies.

Fitzgerald made a corking two base hit in the fifth which brought in a score from second.

The Omaha players seemed to be a trifle weak at bat but made a number of very smooth plays in the field, one a double from third to second to first being especially brilliant. One of the pleasant features of the game was the absence of roughness and rag chewing. The next game here will probably be on July 5 as the home team plays at Louisville on July 3rd at the celebration. The boys hope to secure Manley for the 5th.

Dance.

Be sure to be at the dance to be given at Jenkins Hall July 3rd. Afternoon and evening. Music by Jacob's orchestra of Omaha. Geo. Berger. Alfred Geanzemer. Fritz Lutz. Managers.

Sings at Hastings.

Mrs. Morgan of Plattsmouth, who is visiting in the city with her brother, W. W. Street, delighted a large audience at the Christian church Sunday evening with a vocal solo, an arrangement of "Rock of Ages." Mrs. Morgan has a voice of splendid quality, rich and full and her solo was greatly appreciated—Hastings Republican.

JOKING?

No, we meant every word of it.

If you buy a suit any time before the Fourth costing from \$10 to \$15 we will make you a present of a \$1.50 box of guaranteed socks. If the suit costs from \$15 to \$25, the present will be a \$2.50 hat, and if you choose something costing more than \$25, the value of the hat will be \$3.00. All goods are marked in plain figures and no monkey business. Of course, it is understood that this is a cash proposition.
