Are You Going To Alberta?

Harvesting and Threshing in Progress—Can See What Land is Producing.

Tuesday, August 3, is the date of the next excursion to "Sunny Southern Alberta," Canada. This will be the best time of all the year for prospective purchasers to look at Alberta land as small grain will just be ready for cutting and thrashing. One can see at a glance exactly what the climate and soil will produce. Crop prospects in this famous wheat belt have not been better in 20 years, which means that the price of land there will continue to advance in price.

About 30 or 40 farmers, business and professional men of Cass county have already made purchases in Alberta. Land-seekers from some 15 or 20 states are flocking there by the thousands, most of them buying a quarter section or more before they return. Six years ago this land sold at from \$2 to \$5 an acre; today, it is selling at from \$12 or \$15 up to \$50 an acre.

The Canadian Pacific R. R. Co. advanced the price of its lands 20 per cent on July 15 and further advances are sure to come as the home seekers continue to rush into that country.

If you cannot possibly get away to go on Aug. 3, you can go on the next excursion day, which will be August 17.

Alberta grows the best wheat to be found, the yield being from 30 to 55 bushels per acre. Oats yield from 60 to 100 bushels and barley, 40 to 80 bushels. You can purchase first class dry land within 2, 3 or 4 miles of a market at \$18 an acre and irrigated land at \$30 an acre. Where can you buy land at that price that will grow such large crops?

TERMS: One-tenth down and balance in nine equal annual payments.
