Safe As a Bank

By investing your money in CASE machinery it is as safe as if it was in a bank. Take a CASE steel separator for instance, it is fire-proof, weather-proof and water-proof, something that cannot be said for the old fashioned wooden separators and which eliminates all the common risks. The threshing business is easily conducted and pays a handsome percentage on the investment. As to the threshing qualities of these machines they are unsurpassed, as many grain growers in Cass county will testify. If you are interested write me and I will furnish names of satisfied users of CASE machinery in Cass county and other particulars of interest.
