### Had a Lively Spin

Last evening while coming down the steep hill near the electric light plant, known as Winterstein hill, with a load of electric light poles, C. R. Burdick and George Sharp, had an exciting time with the team which tried to and finally did run away. The hill being steep and no way of holding the wagon off the horses, they became unmanageable, and ran away barely missing striking an aged lady who was just then crossing the bridge, and breaking away from the wagon turned and ran back up the hill and were in the act of plunging over the high bank on the Burlington tracks, when the young man secured the lines and stopped the fractious animals. The damage was slight but the excitement great.
