Mr. and Mrs. S. W. Reithlefsen Tell of their Trip to the Old Country.

CONDITIONS SEEM TO BE VERY UNSETTLED

English Workmen Getting Very Small Wages.

Mr. and Mrs. S. W. Reithlefsen of Portland Ore., who have for the past few days been visiting in the city, guests at the home of P. F. Goos, having formerly lived in the same portion of Germany from which Mr. Goos came, departed for Manning and Defiance, Ia., today where they will visit for some time, ere departing for their home in the west. They will also visit at a number of places between here and there after starting. While at the Burlington station Mr. Reithlefsen in conversation with a representative of this paper said that they had just returned from an extended trip to the old country, where they had traveled and visited old time scenes, especially in Germany but where he had not been for over a half century. This couple departed in the early summer for the east and arrived in Hamburg on the third of July last having spent the time since then there. In speaking of the conditions prevailing, Mr. Reithlefsen said that in Hamburg there were people moving in every direction and apparently as busy as bees, business being plenty, the people prosperous and money plenty.

The opposite he said was the case in England where he also visited and only recently. In the latter place he said business seemed to drag and money to be scarce with not sufficient employment for the people, a great many of whom were out of employment and many in poor circumstances. Many have immigrated to Canada where they find conditions much better. There was instances in England where workmen were punily getting \$1.25 per week. This may be a light on the conditions which is having the making or the unmaking of the "English Budget."

Mrs. Anna Goos and daughter Miss Emma were passengers to Omaha this morning where they will visit for some days at the home of relatives in that city.

BAUER CASE IS SETTLED.

Matter of Much Litigation Has at Last Been Settled By the Court.

ESTATE IS NOW VALUED AT OVER \$72,000.00.

Plaintiff to Have One-Half of the Estate in Controversy.

The case of probating of the will of the late J. H. Bauer, of near Wabash, and the settlement of which has been contested for a number of years, has finally been disposed of.

When a mere child Mrs. Will Peterson was adopted by the deceased and a promise was made to the father, that at the time of death, he would will the child one-half of his estate. At the time of death a will had been made in which the entire estate was given to J. A. Bauer, a son, for life, and then to go to his three children, thus leaving out Mrs. Peterson, who had lived for thirty-eight years with the deceased. Mrs. Peterson filed bills for services, which were resisted by the heirs, and the matter was finally carried to the supreme court, which disallowed the claims. In the evidence adduced there was testimony to the effect that a contract was made with the father of the then child that one-half of the estate would be given at death to Mrs. Peterson. The court said, "Why do you not sue on your rights in the matter." This was done and finally found its way into the supreme court, with the decision that she was entitled to one-half of the estate, and ordering the lower court to so make disposal of the case.

The amount of the estate during the time has been \$3,291.50 while the income of the farm was \$4625.00 making a net revenue and leaving a profit of \$1,333.50. This with the farm is now divided making the estate which is composed of hundred dollar land, to be worth, something over \$22,000.00. The case was begun in 1903 and has been in litigation for six years. Two of the attorneys, who have since become members of the supreme court, one being Jesse L. Root, formerly of this place, were barred from sitting on the case as they had been interested parties as attorneys.

"Tired at Three O'clock?" "No Sir! I Use the Monarch"

IF typewriters were machines run by mechanical means instead of human hands, you would find that, with a given amount of power, a Monarch could be run at a higher maintained speed than other typewriters.

Run by "girl power," you find that the Monarch is run at a higher all-day average speed than other typewriters, and without a "tapering off," from fatigue toward the day's end. Both these truths are due to the fact that

MONARCH LIGHT TOUCH

lightens the draft, uses power more economically. Eliminates the waste of energy that typifies the heavy-touch machines. This in turn means increased production per machine and decreased cost of typewriter work per folio.

The Monarch Light Touch and the Monarch Rigid Carriage are exclusive Monarch features, every other important feature of the modern typewriting machine, such as Back Space Key, Two Color Ribbon Shift, Contained Tabulator, etc., etc., will also be found on the Monarch. Let us give you a demonstration of Monarch Light Touch and other Monarch advancements.
