## ROSEWATER LECTURES

### Business Manager of Omaha Bee Talks to Young Men.

#### THE MAKING OF A BIG NEWSPAPER.

#### Subject of a Very Interesting Talk of Over an Hour and a Half.

Mr. C. C. Rosewater, business manager of the Omaha Bee delivered a very interesting lecture to the members of the Young Men's Bible Class of the M. E. Sunday School, Monday at their room in the basement of the church. Mr. Rosewater's talk was on the subject of making a newspaper, and the speaker began with the paper material itself and discussed every phase of the business. He referred to the old time grade of paper made for our grand fathers, from rags, which he said would not compare with the paper made now, which was manufactured from wood. The wood necessary for the making of paper must be of a fibrous nature, and was chemically treated to soften it into pulp from which the white paper was pressed or rolled from. The ordinary print paper costs about 3 cents per pound, and the paper bill alone on the ordinary daily is a big item in the year, the bill of the Bee for a year running up to \$100,000.00. The next item of expense being the ink which was mostly made from lamp black. Then the labor of producing the paper which all figured into the expense account of making a paper.

The speaker next described the machinery required to produce the newspaper, after the material and workmanship had been gotten into shape. He described the original press used decades ago, and the modern rotary press of the present time, the rotary motion having been obtained to increase the speed of the press. The modern daily made in the larger cities, comes off of the press at an almost incredible number per hour. The print paper for the larger dailies like the Bee and larger papers comes in rolls. One of these rolls is started in to the rotary press which at one point prints one side of the paper, then passes on to another where the other side is printed. The roll is then passed into the folder which folds and cuts and pastes the papers and passes the completed newspaper into the box from which distribution is made to the subscriber. Mr. Rosewater then discussed the branches of the work which were

required, the business department, which was no small item in a successful plant. The bookkeeping was no small item, as each subscriber necessitated the opening of a separate ledger account, if there were ten thousand subscribers there were ten thousand ledger accounts to be kept track of. There was the editorial branch of the work which furnished opinions of the paper, and controlled the policy of the paper, this was probably the most important feature of every large paper, and required skilled writers to bring forth the work then the force of individuals, which has a man detailed for his own individual run. It was the city editors duty to keep tab on the reporters and in case any event occurred out of the ordinary to detail a man to get the news of the event. Mr. Rosewater discussed the money side of the business, stating that the subscriber list would not pay for the white paper but that it was necessary to have the subscribers to make the advertising in the paper marketable, that the money to pay the running expenses was derived from the advertisements in the paper.

One phase of the business mentioned by the speaker was the attitude of the public toward the press, many being of the opinion that the business was debtor to society in the community where the paper exists rather than the public being debtor to the newspaper. The speaker thought that every community was rendered better by a newspaper being run in it, and that the people were brought closer together by that means than any other. The lecture was well received, by the young men and all will be glad to hear Mr. Rosewater again. Mr. Rosewater departed on the night train for Omaha.

### BURLINGTON SEWER NOW COMPLETE.

#### Twenty Four Men Worked Five and a Half Months on Job.

K. W. Savgren and his force of men who have been employed for the past five and a half months constructing the big sewer across the Burlington yards to connect with the large storm water city sewer, completed their work today. The concreting was done Friday evening, and the filling in process has been carried on since. Some idea of the expenditure on the part of the company can be had when one is informed that 320 yards of re-enforced concrete has been laid by the men and the work has been pushed with all speed possible to get the concrete in before the frost comes out of the ground, as the bank would cave off badly from the softening of the earth. The sewer has been made to last forever and a day. Foundation pilings were driven every four feet and on these the 147 feet of concrete sewer 8 by 7 feet constructed.

The labor alone of constructing this piece of work has cost the com-

## MERRILY WEDDING BELLS RING AT WEeping WATER

### The Home of Mr. and Mrs. John Domingo the Scene of a Happy Marriage.

#### LARGE NUMBER OF RELATIVES AND FRIENDS JOIN CONGRATULATIONS

#### Miss Laura Domingo and Mr. Homer Johnson United in the Bonds of Wedlock.

On Wednesday evening February 23, 1910, Miss Laura Domingo and Mr. Homer Johnson were united in marriage at the home of the bride's parents, Mr. and Mrs. John Domingo three miles north east of Weeping Water, in the presence of nearly 100 friends and relatives.

Promptly at eight o'clock Miss Verna Ward sang sweetly, "I love you truly." Following this the bridal party, led by Rev. Andrew pastor of the Congregational church of Weeping Water entered to the strains of Lohengren's Bridal March, played by Miss Maggie Johnson. The bride was attended by Miss Ellenora Domingo who acted as brides maid and the groom by Will Jameson as best man. The ceremony was performed under a white arch daintily covered with smilax. Rev. Andrew in his characteristic pleasant and impressive style spoke the vows which united these young people after the congratulations and best wishes had been offered by all present, the guests withdrew to the dining room where refreshments were served in two courses by several young ladies.

The tables were decorated with fern leaves, the bride's table, in the north room had in the center a large vase filled with pink roses and small tables in the dining room each had a

vase of carnations. Miss Bertha Jameson presided at the punch bowl.

Miss Verna Ward sang several solos throughout the evening which were enjoyed very much by all.

The bride was gowned in white silk and carried a bouquet of bride's roses. The bride's maid wore a very pretty dress of light blue silk and carried a bouquet of white carnations.

The groom wore the conventional black.

Mr. and Mrs. Jameson were the recipients of many beautiful and useful gifts as tokens of loving esteem by friends and relatives.

The bride has grown to young womanhood in Cass county and has been a successful teacher for three years. She is a very capable young lady and is admired and loved by a large circle of friends who join in wishing her a wedded life of much happiness. The groom has always lived in the vicinity of Weeping Water. He is a young man of ability ambitious and faithful and commands the respect of all. May their love for each other grow stronger with each succeeding year.

Mr. and Mrs. Jameson departed Thursday morning for Ord, Nebraska for a weeks visit with relatives. They will live on a farm two miles north of town.

pany not less than \$5000.00 and the material about \$3000.00 making an investment for the railway company of \$8000.00 which adds to the value of their plant to that extent. This is an improvement the company had planned for sometime and will greatly facilitate the escape of the storm water from the avenues, as the sewer just completed takes the place of two smaller ones lying side by side extending from the end of the city's large sewer to the bottom east. Formerly the trash would accumulate where the sewer forked and cause stoppage of flow and over flow at the upper end of the big sewer. This trouble will be averted now and the new improvement by the railway company will be much appreciated by the residents of Plattsmouth.

### George Kopiskie Injured.

Yesterday afternoon, at the Burlington Stock yards in this city, Geo. Kopiskie, a son of Mr. and Mrs. Kopiskie residing on Winterstine hill was seriously injured, while performing a stunt of tight rope walking.

The acrobat, instead of using a rope improvised a 2 x 4 scantling, raised to a height of seven feet from the ground and was making the journey across the chasm, for the amusement of a score or more of bystanders, when the timber broke at a knot in the stick and precipitated the young man to the ground, inflicting serious injuries.

He lighted on his hip and the sudden shock caused the boy to become unconscious for a brief time. The bystanders picked him up and laid him on a flat car and sent for Dr. J. S. Livingston, before the Dr. arrived he had revived somewhat, but again fainted away while the Dr. was examining him. No bones were broken, but the young man was badly bruised, he was taken to his home where he was made as comfortable as possible.

### Does Advertising Pay.

A short time ago, an advertisement was inserted in the news papers, for help wanted, and within a remarkably short space of time Plattsmouth had gained as citizens, three desirable families, who never would have moved this way but for the advertisement.

and devoted father, relative and friend, and the community, in which he lived, an honored and upright citizen, and be it further,

RESOLVED, That the Mayor and City Council of the City of Plattsmouth tender to his son and to his relatives in their bereivement their deepest sympathy, and be it further, RESOLVED, That a copy of these resolutions be spread at large upon the minutes of this body and that a copy thereof be given to our friend and associate, D. O. Dwyer.

James Williams..... 2.25  
Anton H. Kobeek..... 58  
H. C. McMaken..... 4.50

### Gilbert Curtis Out Today.

Gilbert Curtis, a former carrier of the News, who accidentally shot a 22 calibre rifle ball through the great toe of his right foot, a week ago was able to be on the street today. His foot is entirely disabled and the young man has to use crutches to get about at all. The accident occurred while he was cleaning his gun, he allowing his thumb to slip off of the hammer, while it was back. The ball passed entirely through his toe inflicting a painful wound. A doctor was called and the injured toe properly dressed.

### Now He is Father.

George Falter has been hanging around his house today and the neighbors have been treated to some very extraordinary stunts upon the part of the heretofore staid and dignified young business man. So remarkable were some of his actions that the neighbors became some what alarmed as to his sanity until they learned that it "was a boy" and the young father had to do something in the way of celebrating. The mother and child are said to be getting along nicely and the News extends congratulations.

### CITY COUNCIL MET LAST NIGHT

#### Transact Important Business for the City Paving Interests.

The city council met last evening in regular session and although the grist of business transacted was not large, it was very important. After reading and approving the minutes of the previous meeting communications brought forth the petition of the property owners to the number of forty or more adjacent to the streets about to be paved, being Vine, from Fourth to Seventh and Fourth and Fifth from Vine to Main. Almost all of the property owners interested have signed the petition and the matter was laid before the council in the regular way last evening. With very little discussion the petition was referred to Streets, Alleys and Bridges committee for such action as the committee and city attorney may take toward the drafting of an ordinance to be submitted to the city council next meeting.

The committee appointed by the mayor to draft resolutions of condolence appropriate to the loss of Council man Dwyer, whose father died recently reported the following: Which were adopted unanimously.

### RESOLUTIONS:-

WHEREAS, It has pleased Almighty God, in his infinite wisdom, in ruling this great universe, to remove from this mortal existence, Dennis Dwyer, Sr., father of our fellow citizen and associate, D. O. Dwyer, and

WHEREAS, In his death, the Mayor and City Council of the City of Plattsmouth, Nebraska, realize the great sadness, which has been cast upon his son and our associate, D. O. Dwyer, and upon his family, and grieve with the son and the relatives of this good man, therefore be it

RESOLVED, By the Mayor and Members of the City Council of the City of Plattsmouth, Nebraska, that in the death of Dennis Dwyer, Sr., his son and his family have lost a loving

## SHOT A CONDUCTOR

### Conductor H. C. Johnson is Held up on Lincoln Viaduct.

#### GETS TWO BULLETS IN HIS BODY.

#### Injuries However are Not Considered of a Serious Nature.

H. C. Johnson a Burlington conductor who lives in Lincoln, was shot twice Sunday evening when returning from his run shortly after nine o'clock. He was crossing the O street viaduct when a man walked up to him and demanded his money. Not waiting for Mr. Johnson to respond, he fired twice one bullet striking the conductor in the arm and the other in the neck.

The man then grabbed Mr. Johnson's grip and ran over the viaduct toward West Lincoln, while Mr. Johnson made his way to the Western hotel at the east end of the viaduct and called for assistance. The wounds are not considered danger us.

The police were at once notified and trains were watched for the purpose of catching him. A report from Crete stated later in the evening that a man had left the train at that place answering the description of the party and officers were on his track.

The valise taken from Mr. Johnson contained nothing of value, and the man was in too much of a hurry to wait for Mr. Johnson to give him his money.

### Moves to Walthill.

John Wyatt departed for Walthill this morning going via team over land. Mrs. Wyatt left for the same point on No. 15 this morning, they having shipped their household goods and farming machinery to that place Saturday. Mr. Wyatt has been a resident of Cass county and vicinity for the past thirty years, and will engage in farming near Walthill in the future.
