## CITY DADS WERE BUSY

Many Business Matters  
Transacted at Meeting  
Last Night

PLANS FOR THE PAVING  
PRESENTED BY THE ENGINEER

Numerous Repairs on Streets Ordered  
Chief of Police May  
Get a Raise.

(From Tuesday's Daily)

Last evening, for the first time in three weeks, the city council held forth in their regular business session with two of the councilmen's positions of honor vacant. The meeting was quite a lengthy one and a long list of bills were allowed. After the calling of the roll and reading the minutes of the last meeting, a petition was read from Gering & Company, asking that they be granted a druggists permit. A communication from the clerk of the district court was given, notifying the council that a supersedeas bond had been filed for the appealing of the case to the supreme court. After considerable chaffing as to whether the council had the power to grant such a permit while an appeal was pending, a motion by Mr. Bookmeyer brought a unanimous decision in favor of the granting of the permit.

A communication from Justice Little was read asking that a small amount of grading be done on Oak street between Sixth and Seventh which met the approval of the city fathers. A communication was presented, signed by Messrs. Schlater, Beeson, Dwyer, Dovey, Gering, Leonard and Holdman, for the permission to install a private sewer from Main pipe at 6th and Vine extending 2 1-2 blocks north. The permission was granted and a resolution to that effect was presented and carried. The report from the chief of police showed eleven arrests had been made during the past month. The mayor laid stress on the statement that he wished a list made out of all occupation taxes not paid up by the next meeting in order that action may be taken to make the delinquents come to time at once. Reports from different departments were made including fire company and police judge reports. A motion went through ordering the street commissioner to file papers showing the value of the material used in the street work and the locations where the material was put in. A report from the Streets, Alleys and Bridges committee showed H. C. McMaken's bids to be the lowest on permanent cement walks and crossings and, on a movement of Mr. Weber he was given the city's work for the coming year. Mr. Kurtz of the cemetery committee brought before the council the fact that the appearance of the cemetery was being ruined by the work of gophers and ground squirrels and he urged that some means be taken at once for the extermination of the pests although he did not frame up the matter as a motion. The Cemetery committee is now looking for some Pied Piper or poison expert who is willing to rid the grounds of the vermin.

Mayor Sattler expressed himself in favor of the raising of the salary of the office of chief of police and referred the matter to the police committee who, if they think it, are to have the city attorney draw up an ordinance boosting the pay check of the head officer.

Under the head of new business, a representative of the Omaha engineering company presented a set of blue prints and specifications for the new brick paving, which were complete with the exceptions of the grading details. The different surfaces were presented in three different classes:

Class A: Vitrified brick surface, 4 inch cement base, 1 1-2 inch sand filler, joints sand filled; price \$2.10 per yd.

Class B: Vitrified brick surface, 5 inch cement base, 1 1-2 inch sand filler, joints sand filled; price \$2.25 per yd.

Class C: Vitrified brick surface, 4 inch sand base, 2 inch common brick filler covered with 2 inch sand filler, sand filled joints, price \$2.00 per yd.

The latter, however, will not be considered as the council's resolutions call for cement base. There were two classes of curb described:

Class A. 20 inches deep, 6 inches thick, price .55 per ft.

Class B. 24 inches deep, 6 inches thick, price .60 per ft.

270 feet of curbing were reported

to be in place at present that would hardly stand being reset, as they are of soft lime stone which will crumble if moved. 252 feet can be reset at a cost of 12c per lineal foot. 230 feet of oak headers will be needed at the ends of the paving, no estimate on cost. From the topography it was shown that the cuts and fills will about balance each other and no great amount of work will be necessary to put the street in readiness for the paving. The plans and specification were referred to the proper committee with instructions to report at the next meeting. The city attorney will be consulted as to the legal detail of the work and will probably be present at the future meetings of the body.

Numerous repairs were ordered about the city. In the First ward an oak crossing was ordered at Walnut and Sixth streets. From the councilman of the second ward, came the request for a ditch at Eighth and Vine streets and repairs on the Tenth street bridge, which were ordered and the street committee was given power to act in the extending of a permanent walk under the viaduct. Culvert repairs were ordered for the Third ward and numerous other repairs requested were referred to the Streets, Alleys and Bridges committee. Among the improvements ordered for the Fourth ward was a fill at Rock and Silver streets and a small amount of new tiling. The grading for a permanent walk at Marble and Lincoln avenue and the construction of a permanent walk to replace the delapidated one now in use at the city park were left to the proper committee which will report at a future meeting. The clerk was ordered to notify the county commissioners of the bad condition of their Granite street bridge. For the Fifth ward, orders were given for grading and tiling on Cass and Lincoln avenues and several sewers, which are clogged, are to have attention.

The proposition presented by Mr. Gravett, a representative of the Red Men for the securing of the principal business streets and special police for the Fourth of July met with no opposition on the part of the city dad

### Burlington Notes.

Yesterday was pay day at the shops and the salaries aggregated a much larger amount than they had for several months. The departments are all running on good time now and the force is a little above the average which accounts for the increase in the pay roll. The streets were gay during the evening hours with hundreds of shop men who were cashing their checks and making heavy purchases, and everything was kept in a most orderly condition.

Contractors in charge of the construction of shop buildings at Havlock have told shop men that part of the buildings may be occupied by the railroad company some time in July. It is said that machinery for the big shops has been ordered and that it will be placed just as soon as the shop buildings are ready, and some of the old machinery will be used from the old erecting shop.

The new concrete smokestack which has been erected at the power house has been complete for some time and the concrete has dried and turned white.

### Offices Looking Bright.

The office rooms of Doctors T. P. and J. S. Livingston are being brightened up by coats of new paper and a few daubs of paint. The surgical room in the rear of the building was recently replastered, after a portion of the ceiling had become loose. The private office of the physicians is being coated a dark green with a lighter ceiling and border, the main room in a dark brown and the hall in buff and tan. The papering of the rooms is a big undertaking even though the rooms are not large. They are filled with desks and cases which necessitate much elbow grease in moving.

## Barclay's Restaurant

THE PLACE  
TO EAT

Everything neat and clean and a good place to go for your SUNDAY DINNER. Board by the week. Lunch counter in connection.

Open All Night

Center of Block Between 4th and 5th Sts.
