His speech shows that he is going ahead of his party in this matter as far as it will permit him to lead it but more important than that is the situation in which it leaves the republican congressional committee in the pending campaign.

Representative Babcock, chairman of this committee, is reported to be at his wits end. His treasury is empty and there is no prospect of it being filled. Great financial, transportation and other corporate interests that have thus far supplied the money needed in republican campaigns have closed the lids of their cash boxes with a snap in the faces of the collectors of republican funds.

After the failure of the effort to get Senator Hanna interested in raising a large campaign fund this year, stories of mysterious origin began to appear in various republican papers that Mr. Hanna was to resign as chairman of the republican national committee, and would be succeeded by Governor Wigthrop Murray Crane of Massachusetts.

These stories are believed to have been inspired for the purpose of coercing Senator Hanna into leaving his pleasant home in Cleveland, neglecting a very important political situation in Ohio and putting his friends all over the country on the frying pan in order to raise money in support of policies to which they are opposed.

At last accounts Senator Hanna was still in favor of having Chairman Babcock run the campaign in all of its details. He, like Mr. Roosevelt, is a hard man to coerce.
