f county superintendent of schools who does not hold a first grade teacher's certificate. Mr. Gregg moved that his bill he engroused for the third reading. Douglas of Rock opposed the bill, arguing that many of the countles in the western part of the state were without first grade cer tificate teachers and therefore, if this bill was passed, it would impose the necessity of importing persons for county superintendent. Bartow of Valley thought this was an argument for the bill. Spurlock of Cass made a forcible speech in favor of the bill, urging the importance of raising the educational standard. "Gregg's motion finally carried by a vote of 50 to 25. These bills were passed: Appropriating \$10,000 from the unexpended board and colthing fund of the Norfolk asylum to the maintenance of patients removed from that to the Lincoln asylum. CATTLE AGAIN DISEASED.

Foot and Mouth Epidemic Takees Fresh Start in Massachusetts. WASHINGTON - The foot and mouth disease has become serious again in Massachusetts and Dr. Salmon will return to Boston in a few days to investigate the situation.

BOSTON, Mass.-The recrudescence of the cattle disease in Massachusetts reported by the bureau of animal industry at Washington is in the towns of Needham and Medfield in Norfolk county, some twenty miles southwest of Boston.

The cases were reported to the state cattle bureau last week and a herd of thirty-nine pure bred Jerseys was slaughtered on Monday after condemnation, by Drs. Thompson and

Durfee, representing the federal authorities, and Dr. Austin Peters, of the state cattle commission.

WESTERN CANADA AROUSING GREAT INTEREST.

The Wonderful Yields of Wheat Attractlog Thousands.

Until the last five or six years but little attention was given to that vast area of grain-producing land lying north of the 49th parallel, and immediately adjoining the northern boundaries of Minnesota and Dakota.

The Canadians themselves were aware of the wealth that lay there, but being unable to fully occupy it, they have asked the Americans to assist them in converting the land from its virgin state to one that will largely supplement the grain-producing area of the North American continent and the response has been most liberal.

During the year 1901 upwards of 20,000 from the United States went over to Canada, being induced to settle there by the reports that reached them of the success of those who had preceded them during the previous years. This 20,000 was increased to 30,000 during the year 1902, and it is fully expected that there will be fully 50,000 during the present year. The work of the immigration branch of the Canadian government is not now being directed towards giving information as to the advantages of settlement in Canada as it is to extending an invitation to the Americans to follow those who have gone.

Those who have charge of the work point with considerable pride to the success of those who have been induced to take advantage of the offer of 160 acres of land free in Canada, and have no cause to hesitate in continuing the invitation. Many of those interested say there are no more free homesteads to be had in Canada, but the writer has most positive assurance from the Canadian government that there are thousands of such homesteads to be had, and in one of the districts now being opened up fully as good as the best, and it is probably the best.

The Canadian gove, nment has esablished agencies at St. Paul, Minn.;" Omaha, Neb.; Kansas City, Mo.; Chicago, Ill.; Indianapolis, Ind.; Milwaukee, Wis.; Wausau, Wis.; Detroit, Sault Ste. Marle and Marquette, Mich.; Toledo, Ohio; Watertown, S. Dakota; Grand Forks, N. Dakota, and Creat Falls, Mont., and the suggestion is made that by addressing any of these, who are authorized agents of the government, it will be to the advantage of the reader, who will be given the fullest and most authentic information regarding the results of mixed farming, dairying, ranching,
