Americans in Europe.
Whenever our citizens, visit their native country, in Europe, they create a certain interest. Their appearance and conduct, is entirely different, showing that the years spent in the United States gave them broader views. Here, everybody has a chance to work, and to elevate himself, to read the papers, to hear great orators, to be members of some organization. Our greatest men had a more practical than theoretical education, they studied in the school of life. Our workmen are far ahead of those in the old country, our products excel those of abroad.
The best example of this is Triner's American Elixir of Bitter Winter Wine. Although similar preparations are made in Europe, none have the fragrance, and medical action of Triner's. It is made of pure California grape-wine, and the best herbs and roots—a remedy as nature has prepared it. It acts as a specific in troubles of the stomach, liver and kidneys. By promoting the digestion it creates new, rich blood, the foundation of life and health.
