Lars Nelson had us guessing last week. Just before going to press he telephoned us of a new baby at their house that day, a boy, and it so appeared under the head "born." Later Lars and Mrs. Nelson, who were in town, started for home, and the thought occurred to us how Mrs. Nelson could be in two places at the same time. Well, to straighten it out, they adopted a little baby boy that was brought here last week, an orphan, and Mr. Nelson was so pleased that after laying in a supply of nipples, etc., he telephoned the good news to the paper for publication. years from now maybe we can tell the good people the same story and they'll believe it.

Young Plants

Every farmer knows that some plants grow better than others. Soil may be the same and seed may seem the same but some plants are weak and others strong.

And that's the way with children. They are like young plants. Same food, same home, same care but some grow big and strong while others stay small and weak.

Scott's Emulsion offers an easy way out of the difficulty. Child weakness often means starvation, not because of lack of food, but because the food does not feed.

Scott's Emulsion really feeds and gives the child growing strength.

Whatever the cause of weakness and failure to grow—Scott's Emulsion seems to find it and set the matter right.
