Every Two Minutes

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

SCOTT'S EMULSION

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

One Hundred Years Old.

According to the Plattsmouth correspondent of the Omaha Bee, Grandma Davis celebrated her one hundredth birthday yesterday at her son's southeast of Plattsmouth, where she makes her home. Only a few days ago she came to town, walked about the streets and went into the stores with quite elastic steps. The furrows of time are written upon her brow and cheeks, but she is not much gray and stoops slightly. She has a rough, tolling life of it, much of the time working out of doors, sometimes husking corn in the fields, sometimes driving to town on a wagon piled high with wood to sell. She has raised three families, her own and two of her son's children, their wives having died, and later the children of her grandchildren.
