"Lord help the millionaire!" says a neighboring exchange. "There is Rockefeller, with no appetite; Morgan so restless he can't stay alone in one place; Carnegie has the long suffering dyspepsia, and the rest of 'em are dying with envy, because they're not as rich as the three of 'em! Bless the bacon and greens, and health, with the grace of God!"

Sheriff McBride left Wednesday for Lincoln with Ed Goff, the young fellow convicted together with a negro about a month ago of breaking into a box car. The negro was taken up to begin his four-year sentence a few weeks since. Goff's sentence is two years and he apparently is not as anxious to "get acquainted" at the pen as was his colored accomplice.

A gentleman informed us the other day that he had been a sufferer from rheumatism many years when a friend told him to eat from three to four lemons each week and he would get relief. As a result of following that advice he says he is not now troubled by rheumatic pains. We are not advising our afflicted friends to try the "lemon cure" but as it has proven beneficial in several other cases it is right in yours.

L. L. Kinnamon met with an accident late Friday evening at the new gas tank. The men worked till nearly nine o'clock. In the dusk it was hard to see where one was striking. Mr. Kinnamon aimed a blow with a heavy hammer. The hammer instead of striking the head of the rivet struck the thumb and forefinger of Mr. Kinnamon's left hand, bruising them in a painful manner. He will be kept from work for several days.

A girl's name is above price, dearer than her life itself. The knave who will tarnish it, is a fiend incarnate. And the girl who will so demean herself as to give a black hearted scoundrel an excuse to talk about her, is siller than a blind goose. The sensible girl lives, like Caesar's wife, above suspicion. Her modest, retiring gentle ways, refined manners and sweet, kindly disposition shield her from the vulgar tongue of the foul-hearted defamer of character.

John Wanamaker, referring recently to the advantages of advertising says: "The good, sensible merchant sticks to his proposition throughout the year, never withdrawing his announcement but constantly pounding away at the public. There is only one way to advertise, and that is to hammer your name, your location, your business, so constantly, so persistently, so thoroughly into the people's heads that if they walked in their sleep they would constantly turn their faces toward your store. The newspaper is your best friend. It helps to build up the town or community that supports you."

All that is needed to make a success of the anniversary celebration is a leader. Let some old resident start the ball rolling and there will be plenty to help it along. Now is the time to start it.

The decision of a Kansas City court that a girl may keep the presents bestowed upon her by a young man will cause a thrill of apprehension in the minds of those Romeos about Plattsmouth who are paying for diamond rings on the installment plan.

Our friend E. R. Todd is the first one to deliver new wheat to Heisel's mill. It is away above the average. Fifty-nine pounds to the bushel is said to be the average, but this runs to sixty-one. It is of an excellent quality and will rank with the best that has been raised in Cass county, and will average from thirty-five to forty bushels per acre.

Word comes from Mr. and Mrs. Robert Troop, who are living on their claim on the Rosebud reservation that climate does not agree very well with Mrs. Troop and she may return home soon. Their claim lies within a half mile of the town of Gregory, South Dakota, and is one of the choicest pieces of land from the big tract opened a year ago. Mr. Troop is figuring on opening a coal and feed business in Gregory.

There is one defect in the Slocumb law that needs fixing. A complainant can bring suit against a saloon man without putting up any bond for the costs. This is one cause for so many complaints. Suits are brought in many instances on spite work, the complainant knowing that he has nothing to pay even when he loses. The people pay the cost for the spite work, which should be saddled upon the shoulders of those who seem to enjoy such notoriety.

Weeping Water Herald: "The Herald is in receipt of a circular from the Associated Cyclists Clubs of America, asking the editor to write an editorial booming cycling. Here it is: 'Bicycles are manufactured by a number of companies. It costs about \$75 to get a good wheel worth \$25. The man that rides a wheel and finds comfort and health from the exercise would kick like a bay steer if his wife asked him to rock the baby or move the piano. The young man that can straddle the narrow leather saddle of a bicycle and ride twenty miles in record breaking time, requires a big rocker and three cushions under him to be comfortable when calling on his best girl. Bicycles are a mighty profitable thing for the seller, and require a little less fixing than an automobile, and if we owned one of each, would walk if the train didn't run.'"

## A MOST HORRIBLE DEATH

John Robinson, Accidentally Wounded on the Fourth of July, Dies From Lockjaw.

Racked by the horrible pains of that most terrible disease, tetanus, every muscle of his body tense and straining, tossed by convulsions, his jaws locked as though there was no joint, suffering the unceasing pains of lockjaw, John Robinson at last was released by merciful death at 7:30 o'clock last night.

Mr. Robinson lived on the old Cummins' farm, west of town, where he was employed as a laborer. On the Fourth of July last he was engaged in examining a small pistol, with which one of his sons was celebrating. Accidentally the pistol was discharged, the powder of the blank cartridge burning the third finger of the right hand.

He went at once to a doctor and had the wound dressed. All seemed to be going well and not wishing to lose any more time than necessary he went to work again last Saturday. The hand pained him some but he bore it for he felt that he must work. Sunday the pain grew worse. Monday morning he walked down to the office of Dr. Schildknecht.

The physician asked him how he felt. He replied that his hand felt all right. It had ceased to pain him but he said the tendons at the nape of the neck were drawn and his jaws felt somewhat stiff.

The doctor sent him home at once, Tuesday morning a message came to go and see him. The doctor at once recognized the awful symptoms of the deadly tetanus. He knew the man was doomed by the one disease before which medical science is powerless.

Mr. Robinson realized his condition. He said he had \$1,000 insurance in the A. O. U. W. paid up to the 25th of this month.

A number of Mr. Robinson's friends went out yesterday among them being W. W. Coates, by whom he had been employed at various times. Mr. Smith was sent out by the lodge.

The last scenes were most pitiful. The wife and five children wept and refused to be confronted while in the other room the tortured man struggled to keep back the cries of pain seeming to know that it was the last blow misfortune could deal him.

His mother had been sent for and arrived here from Hamburg, Iowa, before he died.

Bob Sherwood, W. W. Coates and others spent the morning gathering provisions for the immediate needs of the family. They were in destitute circumstances. It seemed they were so not through any fault of their own. Mr. Robinson was industrious. He had no bad habits but fate seemed to be against him. All he undertook went wrong. He was handicapped even in doing common work by deafness.

Mr. Robinson was born in Atchison county, Mo., in 1863. He was married 15 years ago in Hamburg, Iowa. His wife and five children survive him. The body will be taken to Hamburg this afternoon for burial.

## TOO YOUNG TO DOUBLE UP

A Youthful Nehawka Couple Refused a License at Council Bluffs, Iowa.

In the Council Bluffs department of the Omaha Bee of this morning appears the following:

"A youthful looking couple giving their names as A. L. Stahl and Mae Fulton and their residence as Nehawka, Neb., applied for a marriage license yesterday afternoon. The young man gave his age as 21 and the young woman gave hers as 19. Deputy Clerk Roy Hardesty started to make out the license, but the more that he looked at the prospective groom the more he suspected that he was not as old as he claimed to be. Calling Clerk Battey he confided his suspicion to him and Mr. Battey asked the young man to step into his private office. There, as Mr. Battey said afterward, he talked to the young fellow like a 'Dutch uncle' and the young man finally broke down and admitted he was but 19 years of age. When the young woman found that no license could be issued without the consent of the parents of the prospective groom she was very much disappointed and it was evident she had considerable difficulty in restraining her tears. The young man told Mr. Battey that he would go home and get his parent's consent and return in a day or so to secure the license. Whether the young woman is here awaiting his return or whether she accompanied the young man back to Nebraska, or whether they went elsewhere to try and secure a license, is not known."

### A Peculiar Accident.

Mamie Walker, aged twelve years, of Concord, Neb., was speeding a cream separator when her hair became entangled in the revolving machinery. The wheels had been given such momentum that before they could be stopped a large portion of the scalp had been torn from the young girl's head. So quickly was the injury inflicted that the victim had only time to give one piercing scream of agony before her head was frightfully mutilated and insensibility came on. When found by her parents, Mr. and Mrs. J. M. Walker, she was lying bleeding beside the separator. Happily a physician was near by and sewed the torn portion of scalp back in place. He thinks the child will recover fully, with the exception of bad scars.

### Oh, Yes, It is Easy.

Did you ever count the words in a column of newspaper print? There are about two thousand words in a column. Suppose you sit down and write a thousand words on some subject, and then another thousand on another until you have written eight or ten thousand. Try it and see if it is right easy. Keep that gait up for a month. Then chase a local item all over town, and after you have gotten the facts all right, condense them in a few lines—an hour's work that can be read in a few seconds. Do this for a dozen items that seem insignificant after they are printed, but which you know are important; then have the items criticised and inaccuracies pointed out to you when it is too late to correct them. Oh, yes, it is easy.

### In Honor of Miss Weil.
