A young lady of this city entered a certain real estate office the other day on business, and just as she went in the son of the proprietor who had been there was coming out. After she went away, saying she would return later, the son sat down and wrote on a piece of paper, "Why in the hell don't you stay in your office?" and went away. Soon the old man came in and read the paper. Not long after the young lady returned and told him she had been there, when he turned over the paper and asked, "did you write this?" The young lady was considerably embarrassed when she saw what it was.

Jake Miller's luck in fishing is still continuing. Late Sunday evening he pulled out a channel catfish that weighed just a trifle over 60 pounds. It was carried up Main street by two men about 8 o'clock last evening suspended from a heavy pole borne on the men's shoulders. The fish's tail trailed on the ground, its gills touching the pole on the shoulders of the men. The big fellow was followed by a crowd of people to Lorenz Bros.' butcher shop, where the fish was weighed and purchased from Mr. Miller. The fish was caught in the Missouri river, near the Ed. Fitzgerald place.

"They talk about a woman's sphere. As though it had a limit. There's not a task to man and given. There's not a blessing or a woe. There's not a whisper yes or no. There's not a life, or death, or birth. That has a feather's weight. Without a woman in it."

One week from today, and then comes the big Woodmen picnic—if it don't rain.

Many of Groves' former friends looked on with a longing for something that was coming to them, but it never came.

Business has been prospering lately with Jake Miller, head of the Plattsmouth fish trust. At first Jake had to carry his fish up on his shoulders. When he landed a 75 pounder he had to hire another man to help him. Such is no longer the case. A little pony, a new harness and a second hand spring wagon have been purchased and now Jake comes to town with his fish in the wagon, himself on the seat and the little pony in the new harness proudly drawing it all.

Every time a freight train goes through town anywhere from two to a dozen small boys and young men may be seen hanging on the various cars and jumping on and off while the train is moving rapidly. Some day one of these boys will be carried home minus a couple of legs or an arm. The train crews and the police can't keep these boys off the cars. The parents must do it. They should do it for their own ease of mind and for their children's good. A sound licking administered now may save that boy a couple of very useful limbs.
