Entered at the postoffice at Plattsmouth, Nebraska, as second-class matter.

DEMOCRATIC COUNTY TICKET.

For Treasurer
WILLIAM D. WHEELER.
For Clerk
W. E. ROSENCRANS.
For Judge
HARVEY D. TRAVIS.
For Sheriff
JOHN D. MCBRIDE.
For Superintendent
CLIFTON S. WORTMAN.
For Register of Deeds
W. O. SCHEWE.
For Coroner
E. B. CRAIG.
For Surveyor
A. BAXTER SMITH.
For Commissioner
JOHN P. THACKER.

THE people of Cass county are assured that the county treasurer's office will be rightly run with the re-election of W. D. Wheeler. Take no chances with a new man.

THE democratic ticket is one that every voter of Cass county can support, knowing that they are competent, honest and well fitted for the positions for which they are candidates. Their records as citizens and as officials are before the people.

W. E. ROSENCRANS, candidate for county clerk, is making many friends by his affable manner in interviewing the voters. "Rosey" is just what is claimed for him—a genial, whole-souled gentleman—and one in every way fitted for the important position for which he is a candidate.

JUDGE TRAVIS is some better today, and he hopes to be out in a few days. His sickness has prevented him from attending to the duties of his office, and also to see many of his friends throughout the county. The judge is still confined to his room, but his present condition is very favorable for complete recovery.

JOHN P. THACKER should be elected commissioner because he will make a good one. He was reared on the farm, and knows the needs of that class of people. The idea that some people have that a farmer can't make good county commissioner is all bosh. They are the class that should be interested in having one of their number on the board. They should be represented on this board by all means.

IN voting for those on the democratic ticket you are voting for men, everyone of whom has resided in Cass county long enough to become acquainted with the voters and for them to know as to the qualities of each and every one. Several on that ticket were born and reared in the county, while the balance have lived in the county from fifteen to thirty years—at least long enough for the people to know them by reputation.

E. B. CRAIG of Greenwood is just the man to fill the office of coroner. He is a business man who is known for his excellent qualities at home. He is a fair and square man, and will prove so as coroner of Cass county. In accepting the nomination, he stated that wherever he was called to hold an inquest, if he had anything to say in preparing the body for burial, that work will be given to the local undertaker, if there be one, or to the nearest one thereto.

EVERY person who has had business with the sheriff knows that John D. McBride has performed the duties of the office in a manner most creditable to that official. No night has been too dark, no road so long, no storm too fierce to deter him when duty called for his services. His knowledge regarding the service of court writs has enabled him to handle important papers in his office without making a blunder, thus winning for him the approbation of the attorneys and judges on the bench. But over and above all this, John D. McBride is a man among men.

WE got rain when it was needed, we got sunshine when it was necessary for the growing crops, we got frost, just a little in due season, and we have got the biggest crops that ever grew out of doors. Stand up for Nebraska.

IF Mr. Crowe, of Omaha, can fix things with the other fellows, he can go on the lecture platform and earn the money to pay Cudahy in a few months. Mr. Crowe is in great demand. His life and experience is worth relating.

SENATOR BURKETT's friends and his organs are apologizing for the appointment of Tucker of Tecumseh as judge of Arizona. No explanation is necessary. Mr. Burkett had no right to endorse a man he did not know.

IN bidding farewell to his Sunday school class, John D. Rockefeller told his scholars that they should lead the life that he would lead if he had life again before him. It is a whole lot easier to tell people to "do as I should have done, rather than as I have."

ONE half of the available time of each session of the legislature is devoted to making charters for Omaha, and the courts are occupied a great share of their time, declaring the provisions inoperative. Omaha under its brand new charter is unable to employ a police force.

THE register of deeds law passed by the last legislature as part of the biennial elections legislation has finally gone up to the supreme court. It is only a question of time when every bill of that series will have to have the judicial stamp on it to tell whether it is good or no good.—Omaha Bee.

JUDGE TRAVIS' extended and varied practice, covering a long period of years and his two years experience in the county judge's office fits him especially for a trial judge, and his exceptional business abilities fit him particularly for handling the probate department of the office. Indeed this branch of the county judge's work is of the greatest importance, requiring not only a careful lawyer, but an official well qualified in the details of office work.

IT gives the Journal pleasure to refer to the democratic ticket. It is a ticket that all voters should delight in supporting, and those who desire to see the affairs of Cass county in the hands of competent officials, will support. Take the ticket from top to bottom and you cannot place your finger on one that is not a model citizen, and highly respected by all. It is a ticket that should be elected because it is made up of men in whom the people who know them have the utmost confidence.

THE ring candidate for county superintendent has a two-year certificate good in Cass county only. Superintendent Wortman has a professional certificate, good in ninety counties. This ratio—one to ninety—the Journal believes represents the difference in ability, qualities of leadership, and general fitness for the office between the two men. It should mean that every voter who believes in the motto, "the best is none too good in school matters" would vote to give Prof. Wortman a second term. Let every lover of good schools speak a good word for Wortman.

THE Lincoln Star says that we have plenty of money, over \$30 per capita. But what makes us rich is not the volume of money in the country, but because the people of the west have the stuff to exchange for money. It is not the money tied up in banks that makes the country prosperous, but the money in the hands of the people. During the panic of thirteen years ago, the banks were full of money, but they were afraid to let it out, for reason that the people had nothing to exchange for it, and there was no certainty that the banks would be able to get the money back. It takes more than a high per capita of money in the country to give things an air of prosperity.

THE city council of Omaha again "sit down" on the Independent Telephone franchise last night. Maybe the members of that august body know what they are doing, but we seriously doubt it. In southeast Nebraska there is fifty Independent 'phones in use to where there is one of the Bell. Under this condition it seems folly for the council of the metropolis of Nebraska to deny the Independent admittance to a point where nearly every merchant in this section buy their goods. We will say, and say it without the fear of successful contradiction, that twenty-five of these country merchants use the Independent 'phone to one that uses the Bell, and yet the wholesale dealers, who should be in direct touch with them, will sit back on their oars and allow the city council to "down" a proposition that is of such vast importance not only to the patrons, but also to the wholesalers from whom they buy their supplies. Do the wholesale people of Omaha want to lose this trade through negligence? If they don't they should whisper a word of wisdom in the ears of those unwise "henchmen" of the Bell Telephone company who are working a detriment to the business interests of Omaha. They should get a move on them by petitioning the city council to order an election in which the Independent company may get "a fair shake."

JUDGE TRAVIS has been a resident of Cass county for many years. His qualifications are well known to nearly every voter. He has been a practicing lawyer ever since he came here. He has the confidence and respect of all with whom he has transacted business, and a better or more efficient public servant never occupied the county judge's bench. He should be re-elected because he deserves to be.

FREMONT TRIBUNE: By the way, have the members of the Nebraska legislature who insisted on asspic declaration from Mr. Burkett as to his position on the president's plan of railroad regulation before they would elect him senator, turned in their annuals in response to the declared sentiment of the party in state convention? It is a poor rule that will not work both ways.

IT TAKES experience to make a good superintendent of schools. That's the reason the voters will be wise in re-electing Prof. Wortman. A new man at the head of the public schools of Cass county means a disorganization of the present excellent system of which those who are interested in the schools are so well pleased.

A RELIGIOUS publication asked William Jennings Bryan recently to write an article on "the price of a soul" to be published. After he had written the article the paper refused to publish it unless he would eliminate a paragraph relating to Rockefeller. He would not eliminate the paragraph and the copy was returned to him.

E. B. CRAIG of Greenwood, democratic candidate for county coroner, was in town Tuesday making votes. Mr. Craig who was a candidate for the same office two years ago made a good run and stands a much better chance for election this time. He is a man in every way qualified for the place.—Eagle Beacon.

CUSTER COUNTY BEACON: The populists, while in control of the state, paid the running expenses of the state government and cut down the state debt \$700,000. The republicans have had control a little over four years and the state debt has increased \$700,000, and this too under much higher levies.

ARE the farmers of Cass county interested in taxation? If you are just ask the republican candidates when they ask you to vote for them, who is responsible for the \$2,000,000 state debt, and why the railroads are not compelled to pay their share of the taxes?

KEEP it before the voters of Cass county—that never before in the history of the county, was there a better ticket placed before the people for their suffrages than the democratic county ticket.

W. E. ROSENCRANS is the democratic candidate for county clerk, and was in town during the fair but was so busy with his "fence" and shaking hands with his many friends that he couldn't come up to see us. He is doing some tall hustling that is making Barton and others rather shaky. If he gathers in the "fruit" he will make one of the best clerks Cass county ever had. He is bound to get those few votes Marshall adopted to his own use and then some, after which he will land with his family at Plattsmouth and take up his pen and write some. In his home in Elmwood no citizen is more highly esteemed.—Nehawka Register.

REPUBLICAN candidates in their rounds over the county should tell the farmers why their taxes are so high, and how the state administration came to increase the assessment roll from a valuation of \$165,000,000 to \$305,000,000. And they are not telling the "dear farmer" how it comes that the state debt has been piled up to more than \$2,000,000. It would be just as well for the republican candidates to explain these matters of interest to the tax-burdened farmers when they solicit for their votes.

PROF. WORTMAN will put in the balance of the week in visiting schools and return home Saturday. Superintendent Wortman's whole thought is in the success of the schools of Cass county. The system that he has inaugurated is a grand success and the best evidence of this fact is that a big majority of the school boards and teachers agree with him. Not only this, but they are a unit in expressing the fact that he has made the most efficient superintendent the county has ever possessed.

PAUL MORTON has arranged to bring with him the major portion of ex-President Cleveland's cabinet and Mr. Cleveland on the 28th. He will also bring a large number of eastern friends. It is not known whether they will come on special cars attached to regular trains or on a special of their own. Mark and Joy Morton will also bring with them a large number of friends from Chicago and other eastern points on that day.—Nebraska City News.

THERE are many good reasons why Judge Travis should be elected. The principal one is that he knows the intricacies of the office better than he did two years ago. Another is his excellent qualities as a lawyer, who fully understands the law in all its branches. He has shown himself so well fitted for the place that the voters will wisely conclude that he should be retained for another term.

THE people of Cass county are apt to look more to the fitness of men in the selection of county officials this fall than to the party to which they belong. That is one thing to be said to the credit of the voters of Cass county—they are independent in their voting.

It is generally admitted that no treasurer the county has ever had has given the office closer personal attention than Treasurer Wheeler. This is why he is going to be re-elected. The people desire the public business looked after with care.

THERE was no frenzied finance in the Lawson wedding and no strenuousness in the original toast contributed by Mrs. Julia Ward Howe.

JOHN MCBRIDE has made an excellent official, and many voters of Cass county believe in "letting well enough alone."

ANY old chump can be a crank. It takes a man to see things as they are, and to take hold of the right end of the stick.

BE CHEERFUL. It makes you feel better, and it imparts a comfortable feeling to those around you.

JACK FROST has not hurt anything or anybody but Yellow Jack, and he has no friends.
