

Home Made

Have your cake, muffins, and tea biscuit home-made. They will be fresher, cleaner, more tasty and wholesome.

Royal Baking Powder helps the house wife to produce at home, quickly and economically, fine and tasty cake, the raised hot-biscuit, puddings, the frosted layer-cake, crisp cookies, crullers, crusts and muffins, with which the ready-made food found at the bake-shop or grocery does not compare.

Royal is the greatest of bake-day helps.

ROYAL BAKING POWDER CO., NEW YORK.

Union

From the Ledger.

Mr. and Mrs. J. W. Cogdill are rejoicing on account of the arrival of a nice new daughter, born Tuesday, November 7.

R. W. Brown, the veterinary surgeon, came in from South Dakota Wednesday evening and will remain here several weeks.

Robert Trook, who has been very sick with typhoid fever, is reported to be improving, and it is hoped he may soon be out again.

Mr. and Mrs. W. M. Sikes are the happy parents of a fine new daughter, born Wednesday, November 1, but we failed to get mention of it last week.

Mrs. E. J. Gamble, a sister of Mrs. H. W. Lloyd, arrived Monday night from Meadville, Pa., to make an extended visit here and in other parts of this state.

Mrs. Fred Clark departed yesterday for Fairbury, Neb., at which place Mr. Clark has a good position on the Rock Island railroad, and they will make their home there.

Geo. W. Brown, of Superior, representing the Chicago Telephone Co., was in town Monday to inspect the Union company's equipments, finding them in first class condition and giving good service.

Kelly McGee, who has been employed in this vicinity the past eight months, departed Monday night for his home at Dunnegan, Mo. He made many friends while here, and we all wish him success.

A Great Deal of Truth.

The following clipping was handed the Journal by a Plattsmouth bachelor and as "them's our sentiments," we take pleasure in reproducing it: "Because a girl has not married young, and is approaching the age where, if single, she will be put into the 'old maid' class, is no proof that she is not good and nice, but rather is an evidence that she knows her own worth; that she has good sense and a proper appreciation of life, and will not 'hitch up' with just anybody who might propose. We have a few such in our vicinity, and they are jewels, worth their weight in gold. In this locality, as elsewhere the best are not the easiest obtained, but lucky is the worthy young man who is accepted."

Elmwood

From the Leader-Echo.

W. A. Royer has sold his eighty acre farm near Eagle. We understand Mr. Royer expects to buy further west.

The L. F. Langhorst family was released from quarantine today. Julius Langhorst and family will be out tomorrow.

School reopened again yesterday. All of the diphtheria cases are getting along nicely and no new cases have been reported.

Harry McLaughlin returned Tuesday from his sojourn of several months in Colorado, where his health was greatly benefited.

The business men and citizens of Elmwood and vicinity chipped in and purchased a fine invalid wheel chair for Dean Hulsh. It arrived this week and Dean is able to use it nicely.

Mrs. J. W. Gamble was called to Lincoln Wednesday to attend the funeral of Grandfather Eaton, who was accidentally killed Monday evening by a train in the Burlington yards at Lincoln.

Ole F. Carr and Miss Blanche A. Swacker were united in marriage at eleven o'clock, Wednesday, November 8, at the M. E. parsonage in Elmwood. Rev. J. G. Standaard performing the ceremony. Mr. and Mrs. Carr left that afternoon for Unadilla for a

week's visit at the home of Mr. Carr's mother. They will be at home to their friends after November 15th in the Dr. Stockert residence property. The many friends of the happy couple unite in wishing them a long life of happiness and prosperity.

G. B. Burhans Testifies After Four Years.

G. B. Burhans, of Carlisle Center, N. Y., writes: "About four years ago I wrote you that I had been entirely cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick dust sediment, and pain and symptoms of kidney disease disappeared. I am glad to say that I have never had a return of those symptoms during the four years that have elapsed and I am evidently cured to stay cured, and heartily recommend Foley's Kidney Cure to anyone suffering from kidney or bladder trouble." F. G. Fricke & Co.

Louisville

From the Courier.

Fred Ossenkop is making arrangements to give a Thanksgiving ball in the Tapper building.

In Eight Mile Grove precinct it is said the vote of Tuesday fell short almost one hundred. Corn gathering comes ahead of election with the farmers down there.

The village board met last Thursday evening. Aside from the usual number of claims against the village there was returned to the administrator of the S. P. Metz estate a little over \$400 unearned license fee.

Commissioner Banning was in town Monday evening. He stated that he expected to secure a meeting of the county commissioners of Sarpy and Cass counties in Louisville sometime this month to agree on a plan for the repair of the Platte river bridge.

Ollie Ellis underwent an operation for appendicitis Thursday and is now doing nicely. His mother accompanied him to Omaha and will remain with him until he is out of danger. The operation was performed by Dr. Allison at the St. Joseph hospital.

John Gorder is working diligently on a new invention which he proposes to attach to a bicycle to run on the railroad. Mr. Gorder's business calls him so frequently to Sarpy county that he has studied out this new device so that he may cross the railroad bridge at will and on about notice.

The mammoth cottonwood trees at the foot of Main street along the Burlington yards have been cut down on account of their branches interfering with the semaphore lights. They were old land marks having been set out by the first section boss to be stationed here the same year the Burlington extended its line west of the Missouri river.

Pirating Foley's Honey and Tar.

Foley & Co., Chicago, originated Honey and Tar as a throat and lung remedy, and on account of the great merit and popularity of Foley's Honey and Tar many imitations are offered for the genuine. These worthless imitations have similar sounding names. Beware of them. The genuine Foley's Honey and Tar is in a yellow package. Ask for it and refuse any substitute. It is the best remedy for coughs and colds. F. G. Fricke & Co.

Eagle

From the Beacon.

Charlie Brown has given up his place in the barber shop in Pawnee City to assist his father in the drug store and at the switch board.

Wm. Royer sold his 80 acre farm one mile and a half north of town to Ed Carr this week. Mr. Royer expects to

go farther west where land is not so high.

A meeting of the village council was held Monday evening at which time Wm. Doran was granted a license for a pool hall for another year. A license was also granted to Bert Hudson to run a pool hall.

Mrs. J. M. Ray returned home last Friday from Lincoln where she has been having her eyes treated for several weeks. We are glad to state that she is much better and the doctor thinks her sight will not be impaired from the trouble.

Ivan Marshall came up from Weeping Water Friday to visit his sister Ruth, who teaches the Union school southeast of here. Miss Marshall's school closed last Friday for one month to give the older scholars an opportunity to hush corn without losing time in their school work.

In last week's issue we said that a meeting of the stockholders of the Eagle Telephone company had been called to consider a proposition submitted by the Automatic company. This was a mistake. It should have read a meeting of the board of directors of the Eagle Telephone company had been called.

Nehawka

From the Register.

John Blair, of near Murray, caught wild geese on his way home last week. He saw it in a corn field and ran it down. He hasn't hardly regained his breath yet.

Mrs. Ada Kesler, of Albany, Indiana, arrived in our village last Friday, and is visiting at the home of Mrs. Agnes Reynolds and family. She will make an extended visit.

Grandpa McBride has suffered a relapse and is unable to leave his room. Old age has commenced to assert its relentless sway, but we hope the angel will postpone its unwelcome visit for many years.

Last Saturday Miss Gertie Pitman and younger sister made this office a pleasant call. This was the first meeting of our correspondent and the editor. Gertie reports her sister, Lora, as almost free from the attack of fever.

John S. Buck and wife, of Washington, are here on a visit to Mr. Buck's mother, Grandma Buck. They visited at Mr. Wolph's a day or two, Mrs. Cross accompanying them. Mr. Buck will go to Kansas to visit his sister, Mrs. Gates, and on his return will renew his acquaintances with Nehawka friends. John is an old timer as he came to Nebraska in 1855.

The mention was made last week about Falls City getting three car loads of flour to Scotland, across the ocean. Of course the difference in the distance cuts very little ice, but the local dealers might not think it proper to send such amount to our sister city, however if Falls City people had eaten Nehawka flour only they might have landed a congressman. Who knows?

Impoverished Soil

Impoverished soil, like impoverished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products.

If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system.

There is no fat food that is so easily digested and assimilated as

Scott's Emulsion of Cod Liver Oil

It will nourish and strengthen the body when milk and cream fail to do it. Scott's Emulsion is always the same; always datable and always beneficial. Here the body is wasting from any cause, either in children or adults.

We will send you a sample free.

Be sure that this picture in the form of a label is on the wrapper of every bottle of Emulsion you buy.

SCOTT & BOWNE
CHEMISTS
409 Pearl St., New York
50c. and \$1.00.
All Druggists.

HOPE FOR THE SICK.

A VICTIM OF LA GRIPPE.

Mrs. Henrietta A. S. Marsh, 709 W. 16th St., Los Angeles, Cal., President Woman's Benevolent Ass'n, writes:

"I suffered with la grippe for seven weeks, and nothing I could do or take helped me until I tried Peruna.

"I felt at once that I had at last secured the right medicine and I kept steadily improving. Within three weeks I was fully restored, and I am glad that I gave that truly great remedy a trial. I will never be without it again."

In a letter dated August 31, 1901, Mrs. Marsh says: "I have never yet heard the efficacy of Peruna questioned. We still use it. I traveled through Kentucky and Tennessee three years ago, where I found Peruna doing its good work. Much of it is being used here also."—Henrietta A. S. Marsh.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Takes Their Eye.

When lovely women cross the street,
If it's a windy day,
Men should be looking at the skies,
But they're not built that way.

So Called.
"What is the legislature wrangling about?"
"A bill to suppress disreputable saloons."
"Sort of a 'joint' debate, I take it."

The Last Resort.
"He had pawned everything else he had, so as a last resort he put himself in soak."
"How could he possibly do that?"
"He jumped in the lake."

Autumn.
Comes autumn with its paints and brush,
Its colors bright and glowing,
And other artists puts to blush
With its tremendous showing.
The forest is a crimson flare
Of red and yellow shading,
And in the meadows everywhere
Is goldenrod parading.

The tree tops in the ancient wood
Their banners gay are flying
To celebrate in merry mood,
Although the year is dying,
And in the valley down below
And in the distant hollow
The yellow and the purple glow
Far as the eye can follow.

No Miracle.
"Did I understand that he claimed to be able to cast out devils?"
"No; he is just an artist at throwing would-be sons-in-law out through the window."

Great Possibilities.
"What was it Sampson slew so many with?"
"The jawbone of an ass, I believe."
"Oh, yes, I was just thinking what he might have done if he had had an automobile."

Sluggish Liver a Foe to Ambition.
You cannot accomplish very much if your liver is inactive, as you feel dull, your eyes are heavy and slight exertion exhausts you. Orino Laxative Fruit Syrup stimulates the liver and bowels and makes you feel bright and active. Orino Laxative Fruit Syrup does not nauseate or gripe, and is mild and very pleasant to take. Orino is more effective than pills or ordinary cathartics. Refuse substitutes. F. G. Fricke & Co.

Pain may go by the name of rheumatism, neuralgia, lumbago, pleurisy. No matter what name the pains are called, Hollister's Rocky Mountain Tea will drive them away. 35 cents, Tea or Tablets. Gering & Co.

Beilin's Dust Catchers.
An investigation is going on in Berlin as to the danger of the dust of the streets causing sickness, says the San Francisco Chronicle. The royal board of health at various places in the city—for instance, at the Opera platz and near Unter den Linden and other localities—has had erected so called dust catchers. This apparatus consists of round boxes about one and a half feet high, put on a post at a height of six feet above the ground. The boxes are left open to collect the dust flying in the air. After some time the boxes are closed, and the dust collected is analyzed to see what substances dangerous to health are contained in the street dust.

And Now It's Motor Boots.
Motor boots are the latest startling production of continental inventors. A young Swiss engineer is said to have succeeded in manufacturing a pair of boots endowed with motive power of their own. The new invention consists of a pair of stout boots, each of which is nothing more or less than a miniature motor car mounted on four wheels. The boots are worked by petrol on a new plan, which the inventor keeps secret. It is claimed that an ordinary pedestrian can travel all day over average country roads at a pace of twelve miles an hour without experiencing the least fatigue.

BEHRING'S DISCOVERY

Famous Physician Confident He Has Cure For Consumption.

EXPERIMENTS PROMISE MUCH.

By New Method of Treating Tuberculosis He Has Succeeded in Rendering Animals Immune, and They Can Probably Be Cured When the Disease Is Fully Developed.

Whatever may be the practical value of Dr. Behring's new treatment of tuberculosis, the announcement of his discovery has created a sensation both in scientific circles and with the general public, says a Paris cable to the New York Herald.

"The exact facts are that I have been studying for a long time a new method of treating tuberculosis and think I have broken fresh ground," said Dr. Behring in speaking of his discovery. "There are certain animals which contract this malady with great facility and have hitherto proved refractory to all attempts at vaccination.

"I have finally succeeded in rendering them immune as regards the bacillus and probably can even cure them when the disease is fully developed in them."

"Experiments on mankind have not yet been made, but there is ground for hope in this respect, the path I am following being totally different from those explored up to the present."

Dr. Behring went on to indicate that he found the germ of his new departure in works on pathology written by the French scientists Bayle, Laennec, Lebert and Robin in the early part of the last century.

He noticed that they classified tuberculosis in two categories, one characterized by gray transparent granulation, known as Bayle's granulation, and the other, which developed toward suppuration. Virchow's discoveries have created a tendency to class both categories as one and the same thing.

Dr. Behring says this tendency is erroneous. His studies have convinced him that the old distinction established by the French pathologists is well founded and may be found in results. He continues:

"Bayle's granulation does not contain a microbe. It is not accompanied by suppuration. The other species of tuberculosis, on the contrary, swarms with microbes. A minute investigation on the evolution of both species in the lungs and spleen has led me to wonder whether the cure of the malady might not be found in the malady itself.

"By means of a process which I shall explain later I utilize Bayle's granulation to eradicate the evolution of the other form of lesion, the one that is really dangerous, the one that contains microbes, suppurates and results in purulent consumption of the lungs."

Discussing this matter editorially the medical editor of the European edition of the Herald says:

"Every one was struck by the sensational communication made to the Matin by Professor Behring. The matter in question is nothing less than the discovery not only of the means of prevention of tuberculosis, but of a cure for that disease. Dr. Behring will not make this discovery known before a year has elapsed. He reserves for himself the right of exploitation during a certain period which will enable him to prosecute other researches.

"This news is of a nature to hold out marvelous hopes to unfortunate consumptives in the future. But how sad for the present sufferers, who know that a decisive remedy will be made known when they can no longer profit by it!"

"Immediately after Dr. Behring's communication the Herald made an inquiry. Without going so far as to make an affirmative statement, for the reason that what it knows has been learned through indiscretions, it is in a position to state that a portion at least of Dr. Behring's remedy comes from the milk of cows previously rendered immune against tuberculosis. As it is scarcely probable that this milk can be used in its natural form there is some reason for believing that serum alone is employed and it could scarcely be utilized in any other way than that of subcutaneous injections."

Every one was struck by the sensational communication made to the Matin by Professor Behring.
