South Dakota The Land of Plenty

Rich soil, a mild climate, and abundance of water have made South Dakota one of the best agricultural states in the Union. The soil of Lyman County is unusually rich. It is a black loam with a yellow clay subsoil. The extension through Lyman County recently built by the

Chicago, Milwaukee & St. Paul Railway

has opened up a part of that state hitherto sparsely settled. Land is now selling at the rate of from \$8 to \$15 an acre, and it is altogether probable that valuations will increase 100 to 200 per cent within a year. South Dakota offers great opportunities for the small investor. A book on South Dakota for two cents postage.
