One would think the Laxative idea in a cough syrup should have been advanced long before it was. CAN YOU FIGURE THIS OUT?

Remarkable Mixup in Relationship Keeps a New York Town Guessing.

If the people of Gouverneur ever begin to figure out the relationships that are likely to grow out of the several marriages between members of the Brown and Price families, says the New York World, the harvest of lunatics will be appalling. When in 1900 Francis L. Brown, widower, and Flecta M. Price, widow, each with three children, were married, there was some speculation as to how the two sets of youngsters would assimilate into one family. Not a few pessimists wagged their heads and sagely prophesied that there would be a grand "bust-up" sooner or later.

Brown, with his wife and the six children, took up his home on the Prince farm, and there, despite the croakers, all lived in harmony year after year. And as for assimilation, young Earl Brown and his stepmother, Alice Price, fell in love and were married two years ago. The second step in amalgamation, with the promise of consequent genealogical complications, was made yesterday, when Eugene Price, brother of Alice Price-Brown, married Lena Brown, sister of Eugene Price's brother-in-law, the said Lena taking as her husband her own brother-in-law, having by the marriage of her brother to Alice Price, her step-sister, become the sister-in-law of her step-sister, and by her own marriage the sister-in-law of her full brother, to say nothing of being double sister-in-law to the aforesaid Alice Price-Brown. Lena's father and her step-mother are, through her marriage, her father-in-law and her mother-in-law, and the same rule applies to all four of the children who have married.

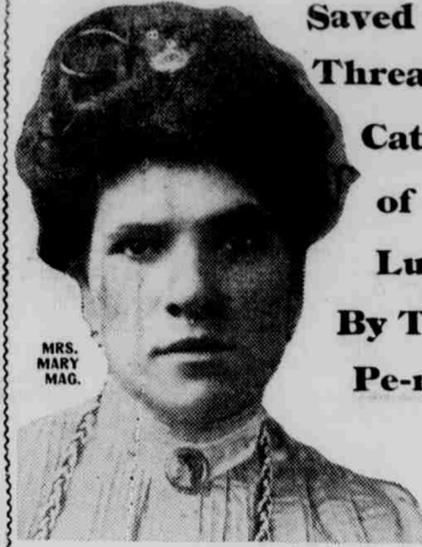

The foregoing is a base for calculations, if any one dares to discount the future and place the relationships of the children that may come to Alice Price-Brown and Lena Brown-Price and the children of these children. There is still left unmarried one child of each set, a boy and a girl. They are too young to marry, but they have shown such a strong attachment for each other that the outcome of their fondness will no doubt result in a wedding.

A Prohibition Ajmal.

One of our horse dealers went up to South Omaha the other day and purchased several very fine looking animals, which he had shipped here. One of our dealers in liquors and beers needed just such a horse as one of them for his wagon, and this animal filled the bill to a dot. The horse had every appearance of doing the work, and a bargain was reached, with a proviso of course, that the horse would do the work. He was harnessed and hitched to the aforesaid wagon, when, lo, and behold, he would not budge an inch with it. What appears so very strange about the horse is that he will work either single or double hitched to a buggy, but refuses to pull a beer wagon. This animal must have formerly been owned by a prohibitionist, as this is one of the strangest freaks ever known by old horsemen, and his action even stumps the owner, who has been a dealer in horse flesh in this city for many years.

MRS. MARY MAG.

Saved From Threatened Catarrh of the Lungs By Taking Pe-ru-na!

Mrs. Mary Mag, 423 College Ave., E. Pittsburg, Pa., writes:

"Last spring I had a very severe cold which settled on my lungs. I went to the doctor for some time, but his medicine did me no good.

"Having read in the paper some testimonials of the value of Peruna, I decided to try it, and at the same time wrote to Dr. Hartman for advice. I took five bottles of Peruna and am now entirely cured.

"Before taking Peruna I was so run down that I could do no work and could not stand on my feet. My head ached and I could not sleep—I would wake up and cough. In the morning, on rising, I would cough for at least ten minutes. I was alarmed.

"But, thanks to Peruna, I am now enjoying good health. I would not be without Peruna. I keep it in the house and give it to my little boy when he has a cold."

A NEGLECTED cold is generally the first cause of catarrh.

Women are especially liable to colds. These colds occur more frequently during the wet, sloppy weather of winter and spring than any other time of the year. Often they are not considered serious and so are allowed to run on, or they are treated in such a way as to only palliate the symptoms, while the cold becomes more deep-seated and the patient finally awakens to the fact that she has a well-developed case of catarrh.

By reason of their delicate structure the lungs are frequently the seat of a cold, especially if there is the slightest weakness of these organs. The treatment of catarrh of the lungs is also more difficult and discouraging than catarrh of any other organ of the body.

It would be wise, therefore, to guard against it by every precaution possible. Peruna has been found the most reliable of all remedies for coughs, colds and catarrh, by reason of the fact that it goes at once to the very seat of the trouble.

It searches out every crevice, every duct of the body. It quickens and equalizes the circulation of the blood, thus relieving the congested mucous membranes. It exercises a healing and soothing effect upon the mucous membranes, no matter whether they are the more exposed membranes of the head and throat, or whether they line the remotest cells of the lungs.

A word to the wise woman is sufficient. Take Peruna at the first appearance of a cold.

WOMEN SHOULD BEWARE OF CATCHING COLD.

PE-RU-NA THE REMEDY FOR CATARRH OF THE LUNGS.

Twelve Years for One Cent.

After spending twelve years of his life in prison for the theft of one cent from the government, Elsworth DeFrance, a young Nebraskan, has just been released from the government prison at Sioux Falls, S. D. Twelve years ago when 18 years old DeFrance got drunk and held up the mail carrier near Gordon, Neb. DeFrance got one cent, but was arrested and sentenced according to federal laws, which prescribe a life term for robbing a mail carrier.

DeFrance was friendless and was soon forgotten. The judge who sentenced him intended to recommend a pardon after two years, but died suddenly, and the other court officials were succeeded by others who did not know DeFrance. The prison chaplain at Sioux Falls became interested in DeFrance, learned his story, and appealed to President McKinley, who commuted the sentence to 15 years.

Three years were taken off for good behavior.

Three little rules we all should keep. To make life happy and bright, Smile in the morning, smile at noon, Take Rocky Mountain Tea at night. —Gering & Co.

A Good Citizen Leaves.

C. W. Banning, a citizen of Nehawka precinct, departed with his family this week for his new home near Pleasanton, Neb., to which point he orders the Journal. The Journal wishes him and his family good health and prosperity in their new home, and may Charley do a power of good for the cause of the principles he so ably advocated in his old home is the prayer of the Old Reliable.

Kills Grey Wolf.

One day this week Walter Barker succeeded in trapping a large grey wolf, and arming himself with a shot gun and revolver he proceeded to dispatch the captive. He shot the wolf six times with the revolver and several times with the shot gun, during a chase of several miles, before it was finally killed. Walter brought the scalp to the county clerk today, and received the \$5.00 bounty for such wolves.
