# Every Two Minutes

Physicians tell us that all the blood in a healthy human body passes through the heart once in every two minutes. If this action becomes irregular the whole body suffers. Poor health follows poor blood; Scott's Emulsion makes the blood pure. One reason why

is such a great aid is because it passes so quickly into the blood. It is partly digested before it enters the stomach; a double advantage in this. Less work for the stomach; quicker and more direct benefits. To get the greatest amount of good with the least possible effort is the desire of everyone in poor health. Scott's Emulsion does just that. A change for the better takes place even before you expect it.

We will send you a sample free. Be sure that this picture in the form of a label is on the wrapper of every buttle of Emulidon you buy.

#### THE INDEPENDENT IN OMAHA HOPE

New 'Phones Will Have Their Exclusive Homes in the Metropolis.

Work has already been begun on the preliminaries looking to the construction of the new independent telephone plant in Omaba. Messrs. Parmele and Pollock of Plattsmouth were in the city Saturday conferring with their local associates, and stated that no time would be last. Mr. Pollock's statement to the World-Herald is as follows:

"The Omaha independent telephone exchange will be in actual operation in less than a year from the day that construction work is begun. Our engineer will go over the whole city and prepare the plans for the entire system. It is practically settled that we will have four buildings for the exchanges-one central exchange down town, two branch exchanges in the residence sections, and one branch exchange in South Omaha.
