Deafness Cannot be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CHENEY & CO., Toledo, O. Sold by Druggists, 75. Take Hall's Family Pills for constipation.

Goes Back to the Farm.

It will be remembered that not many weeks since, our old friend, John Hobscheidt, sold his farm near Murray, and concluding to remove to Plattsmouth, sold all his live stock, farm implements, etc., and came with his family to this city with the calculation of making this his future home. He had evidently farmed too long, and farm life had become more enticing than that of the city. A good bargain was offered him in the purchase of a farm near the one he disposed of recently, and John didn't do a thing but buy it, and he is now removing to his new home today. The Journal hopes its old friend and the family will be as prosperous on the new farm as they were on the old one, and that they will be happy and contented the balance of their days.

EFFECTS OF TWO-CENT RATE TO CONTINUE EXPERIMENTS

Rate Clerks Consider Short Line Mileage Rates of Nebraska Roads.

Competitive railroad fares is a subject under discussion at a meeting of rate clerks in Chicago, representing Nebraska roads. Whether the long lines shall make the short line mileage where two roads are in direct competition for the same business, is to be decided upon, and whether fares shall be cut in such cases to get business, says the Lincoln Journal.

Since the two-cent railroad rate law went into effect the companies have been charging full mileage for all local tickets. This has cut down the Burlington's Beatrice business to almost nothing, and has materially reduced the Rock Island's Lincoln-Omaha business. The Union Pacific has suffered from the change in a number of places, where its lines are longer than the lines of the Burlington or the Northwestern. If the roads conclude to equalize fares on the basis of short line mileage the old conditions will be restored. If they do not it is said the Burlington and the Rock Island may make a material change in their time cards. As the business goes now the Burlington gets almost all of the Omaha business and the Union Pacific gets almost all of the Beatrice business. It is said the Burlington has more train service than is needed to handle the business between Lincoln and Beatrice at this time, and that the Rock Island's local trains between Omaha and Lincoln are not getting the business they once did.

A ticket agent says that more Omaha tickets are sold now than ever before, but that fewer Iowa tickets are sold. Passengers pay the local fare to Omaha and purchase their Iowa tickets from that place. This, they say, will increase the showing for Nebraska business at the expense of the total receipts at such offices as Lincoln.

Whether the Nebraska rate basis shall be allowed to figure in interstate rates is another question to be taken up by the rate makers, and it is believed that this will prove the hardest task of all, because it will involve rates from all of the Missouri river gateways.

Congressman Pollard Has Secured Permit From Department.

Congressman Pollard has made arrangements with the agricultural department to continue the demonstration work in spraying fruit trees in this district that was begun last year. Samples of sprayed and unsprayed fruit were shown at the State Fair last fall which clearly proved the value of this work. The following orchardists will co-operate with the department in the several counties:

Michael Meliza, Verdon; Albert Steak, Burchard; Horace Shafer, South Auburn; Ira E. Atkinson, Havelock; Nelson Overton, Nebraska City.

Experiments will also be carried on in the development of an improved variety of corn, and also in developing a variety of both wheat and oats that will give a better yield and will be rust resistant. Still other experiments will be made with forage crops—emmer and winter barley. The former is said to be similar to alfalfa. The following parties will co-operate with the department in these cereal experiments:

Emer—spring and winter: John Gonzales, Elmwood, and J. M. Armstrong, Auburn.
