THE election Tuesday was one of the most quiet ever held in Plattsmouth. The lid was down tight and around the saloons it had the appearance of Sunday.

members of the legislature entirely. They seem to have been doing more work without it than they did when they were receiving \$5.00 per day. But, oh, how they have hustled to get home. They are not very anxious to stay at the copital when there is no \$5.00 per day in sight. They have already remained a week to pay their own expenses.

SENATOR CARMACK of Tennessee expressed a whole lot when he said: "I am weary of a condition of things where a man whose business it is to make laws must hold his office by the consent of the man whose business it is to break the laws." The great corporations of the country whose business it is to evade or break the laws are the people by whose grace the law makers are elected.

THE sylph-like Taft is down at Panama and the country may hear of the rapid and satisfactory work being done upon the canal site. So far the only thing about the whole matter which are not subject to change without notice are the general direction of the ditch, which is to be east and west, and the two oceans to be connected by it, the Atlantic and Pacific. All else is nebulous and characterized by the masterly inactivity in essentials which so clearly differentiates the party which "doesthings" and does the treasury.
