Lecture Course Closes

The closing number of the lecture course was given in the church Tuesday evening, and it can truthfully be said that it was the last, but by no means the least. Many of those present claim it by far the best number on the list. The promoters of this worthy enterprise will just about come out even financially, with a lot of hard work to their good, and it has been rumored that will not make an effort to secure another course for the coming season. This is certainly wrong, the same parties interested in the closing series should put their shoulder to the wheel, and make the coming season a success in every particular. It will be much easier than the series just closed. You should not give up a worthy enterprise like this now.

Do Not Crowd the Season.

The first warm day of spring bring with them a desire to get out and enjoy the exhilarating air and sunshine. Children that have been housed up all winter are brought out and you wonder where they all came from. The heavy winter clothing is thrown aside and many shed their flannels. Then a cold wave comes and people say that grip is epidemic. Colds at this season are even more dangerous than in mid-winter, as there is much more danger of pneumonia. Take Chamberlain's Cough Remedy, however, and you will have nothing to fear. It always cures, and we have never known a cold to result in pneumonia when it was used. It is pleasant and safe to take. Children like it. For sale by F. G. Fricke & Co.

SHOULD A HORSE BE CLIPPED?

The clipping of a horse in the early Spring is now conceded by all leading veterinarians to be as essential to a horse's well being as shoeing him or giving him a comfortable bed to lie on. Some years ago a Buffalo street car company tested the value of clipping in the following manner: They owned 500 horses, and 250 of these were clipped early in the Spring and 250 were not clipped. A careful record was kept of results and it was found that of the 250 horses unclipped horses 153 were afflicted with coughs and pneumonia, while of the 250 clipped not one case of sickness was reported.
