A Pleasant Gathering.

From Monday's Daily—
The pleasant home of Claus Jess, south of the city, was yesterday the scene of a delightful party, a number of the friends of Mr. and Mrs. Jess, coming out during the early afternoon and spending the remainder of the day with them. As is always the case with visitors at this home, there was plenty of everything in the way of amusements, all present finding something to his or her particular taste and later on there was an elegant course of refreshments, to which all did ample justice. As Mrs. Jess is noted for her ability to prepare a feast of good things for her friends, there is no doubt of their thoroughly enjoying it. In the evening the party departed for their several homes, having thoroughly enjoyed themselves and extending their best wishes to the host and hostess.

Those who were present included Messrs. and Mesdames J. H. Tams, H. Tams, Peter Madsen, Henry Ofc, Chas. Haffke, A. J. Kanka, Misses Anna and Bertha Tams, Maggie Jess, and Master Leroy Hanka.

On Result of Late Election.

It doesn't pay always to be too sure of the result of an election. This is demonstrated this afternoon by a party which was gathered at the home of Mrs. L. B. Egenberger to eat, drink, and be merry. The party is one composed entirely of ladies, all being members of the ex Grand Chiefs association of the Degree of Honor. The occasion for all the festivity was the certainty of all the Bryanite ladies that their hero would win and the equal certainty of the Taffites that Wm. H. would be the man. Finally the bantering led to a bet between the two factions on the result, the losers to prepare and serve a sumptuous feast for the winners. Of course everyone knows who won and this afternoon the losers with true Bryanite grit are treating the winners royally, the entertainment being at Mrs. Egenberger's. It is quite needless to remark that the feast is a fine one for these good democratic ladies are right there when it comes to preparing good things to eat. The entire membership of the association is expected to be present and a right royal time is to be had. The democratic ladies are all right, just the same whether they win or lose.

OF INTEREST TO STOCKMEN

A Determination to Wipe Out the Great White Plague.

Below is printed a letter received this morning from Agricultural Experiment Station of the State University, the same being signed by A. T. Peters, head of the Animal Pathology department. It relates to the campaign now being waged upon tuberculosis throughout the country. This is a highly important matter and every farmer or dairyman should take a deep interest in it. The determination to wipe out the great white plague is growing every day and for the welfare of the nation every encouragement should be given the fight. Let our farmers and dairymen send in their request for tests as Mr. Peters requests and let the good work go on. The letter is as follows: My Dear Sir:

Knowing that you are interested in the tuberculosis campaign, we wish to state that we are now in a position to test herds of cattle free of charge. We have been fortunate enough to secure some assistance from the government, the Bureau of Animal Industry having stationed two veterinarians with the Department of Pathology to co-operate with us in this work. Therefore any dairyman or farmer wishing to have his dairy or breeding stock tested should send in his name and address to the Department of Animal Pathology, Nebraska Agriculture Experiment Station, Lincoln, Nebraska, and state how many head he wants tested. Hoping that you can give this space in your valuable paper and thereby draw attention to this valuable work, I remain Yours very truly, A. T. Peters.

Will Prevent Death From Bloat.

Scotts Bluffs Herald: F. E. Everett one of our leading farmers and stockmen thinks he has hit upon a contrivance which will effectually prevent death in the case of cattle affected with alfalfa bloat. The thing is extremely simple, being nothing more than a slightly curved bit with an open hollow groove near each end on the upper side of the bit. These grooves permit the gas to escape from the mouth when the animal is bloated. The bit is intended to be worn all the time and in no way prevents the animal from eating all it wishes. It will more than likely prevent bloat but with the use of the bit it quickly escape and no harm will ensue. Mr. Everett has tried one of these bits on a calf he has had on an alfalfa pasture during the past summer, and, while the calf bloated, the bit permitted the ready escape of the gas and the animal has thrived better than some of the rest. Mr. Everett has a great deal of confidence in the success of this appliance and has applied for a patent which no doubt be granted.
