TO CONSOLIDATE SOLDIERS' HOMES

Proposition on Foot to Make Milford Soldiers' Home a Hospital.

There is a well grounded plan on foot to consolidate the soldiers' home at Milford with that at Grand Island and convert the Milford institution into a hospital for the treatment of dipso-manics. A caucus of the democratic members of the senate was held last night and this was one of the principal topics discussed. No conclusion was arrived at however.

A bill has already been introduced in the legislature providing for the establishment of a separate institution for the treatment of those who are addicted to the liquor and drug habits. By the terms of the bill the new hospital is to be located by the board of public lands and buildings and is to be given a name which shall in no manner indicate the purpose of the establishment.

The Milford Home was ordered built by the legislature of 1899 and at every session since there has been more or less talk of consolidating it with the Grand Island establishment. While the location is considered excellent, there has been many legislators who argued that two establishments of this kind are unnecessary and that one could be conducted with much less expense and with great satisfaction and benefit.

Ever since the enactment of the law for the state treatment of dipso-manics the state hospital for the insane has been over crowded with this class of patients and it has been for a great deal of the time impossible to comply with that section of the law which provides that persons under this statute shall not be kept in the same ward with those who are committed as insane. There is not sufficient room for them.—Lincoln News.
