the secretary of the treasury, that the estimates of the expenses of the government for the fiscal year ending June 30, 1911-that is, for the next fiscal year-are less by \$55,663,000 than the total of appropriations for the current ascal year and less by \$04,000,000 than the estimates for that year. So far as the secretary of the treasury is able to form a judgment as to future income, there will be no deficit in the year ending June 30, 1911. but a small surplus of \$712,000.

In the present estimates the needs of the departments and of the government have been cut to the quick.

For the purpose of securing information which may enable the executive and the legislative branches to unite in a plan for the permanent reduction of the cost of governmental administration the treasury department has instituted an investigation by one of the most skilled expert accountants in the United States. The object of the investigation is to devise means to in crease the average efficiency of each employee. There is great room for improvement toward this end, not only by the reorganization of bureaus and -departments and in the avoidance of duplication, but also in the treatment of the individual employee.

ly happens that two employees receive not in the Philippines. the same salary when the work of one is far more difficult and important and exacting than that of the other. Superior ability is not rewarded or en

Civil Pensions.

As the degree of efficiency in all the departments is much lessened by the retention of old employees who have out lived their energy and usefulness it is indispensable to any proper system of economy that provision be made so that their separation from the service shall be easy and inevitable. It is im possible to make such provision unless there is adopted a plan of civil pensions. We cannot, in view of the ad vancing prices of living, hope to save money by a reduction in the standard of salaries paid. Indeed, if any change is made in that regard an increase rather than a decrease will be neces sary, and the only means of economy will be in reducing the number of employees and in obtaining a greater average of efficiency from those retained in the service.

Frauds In the Collection of Customs. I regret to refer to the fact of the discovery of extensive frauds in the collection of the customs revenue at New York city, in which a number of the subordinate employees in the weighing and other departments were directly concerned and in which the beneficiaries were the American Sugar Refining company and others. The frauds consisted in the payment of du ty on underweights of sugar. The gov ernment has recovered from the Amer ican Sugar Refining company all that it is shown to have been defrauded of The sum was received in full of the amount due which might have been recovered by civil action against the beneficiary of the fraud, but there was an excess reservation in the contract of settlement by which the settlement should not interfere with or prevent the criminal prosecution of every one who was found to be subject to the

Criminal prosecutions are now pro ceeding against a number of the gov ernment officers. The treasury department and the department of jus tice are exerting every effort to discover all the wrongdoers, including the officers and employees of the compa nies who may have been privy to the fraud. It would seem to me that an investigation of the frauds by con gress at present, pending the probing by the treasury department and the department of justice, as proposed might by giving immunity and other wise prove an embarrassment in securing conviction of the guilty parties Maximum and Minimum Clause In Tariff Act.

Two features of the new tariff act call for special reference. In order that the maximum duty shall be charged against the imports from a country it is necessary that the executive shall and on the part of that country not only discriminations in its laws or the practice under them against the trade of the United States, but that the dis criminations found shall be unduethat is, without good and fair reason. No one is seeking a tariff war or a condition in which the spirit of retaliation shall be aroused

Tariff Readjustment.

The new tariff law enables me to appoint a tariff board to assist me in con nection with the department of state in the administration of the minimum and maximum clause of the act and also to assist officers of the government in the administration of the entire law. I believe that the work of this board will be of prime utility and importance whenever congress shall deem it wise again to readjust the customs duties. If the facts secured by the tariff board are of such a character as to show generally that the rates of duties imposed by the present tariff law are excessive under the principles of protection as described in the platform of the suc cessful party at the late election I shall not hesitate to invite the attention of congress to this fact and to the necessity for action predicated there on. Nothing, however, halts business and interferes with the course of pros perity so much as the threatened revision of the tariff, and until the facts are at hand, after careful and deliberate investigation, upon which such revision can properly be undertaken, if seems to me unwise to attempt it.

War Department.

In the interest of immediate economy I have required a reduction in the estimates of the war department for the coming fiscal year which brings the total estimates down to an amount forty-five millions less than

the corresponding a dimutes for bit year. This could be ac our lished only by cutting off new projects and rate pending for the period of one year all progress in military matters. For the same reason I have directed that the army shall not be recruited up to its present authorized strength. These measures can hardly be more than temporary, for I am sure that the interests of the military establishment are seriously in need of careful consideration by congress.

The secretary of war calls attention to a number of needed changes in the army, in all of which I coneur, but the point upon which I place most emphasis is the need for an elimination bill providing a method by which the merits of officers shall have some ef fect upon their advancement and by which the advancement of all may be accelerated by the effective elimination of a definite proportion of the least

The military and naval joint board have unanimously agreed that it would be unwise to make the large expendi tures which at one time were contem plated in the establishment of a naval base and station in the Philippine 1slands and have expressed their judg ment, in which I fully concur, in favor of making an extensive naval base Under the present system it constant at Pearl Harbor, near Honolulu, and

The Navy.

The return of the battleship fleet from its voyage around the world in more efficient condition than when it started was a noteworthy event of in terest alike to our citizens and the naval authorities of the world. The marked success of the ships in steam ing around the world in all weathers on schedule time has increased respect for our navy and has added to our na tional prestige.

It is a regrettable fact that the higher officers are old for the responsibilities of the modern navy, and the admirals do not arrive at flag rank young enough to obtain adequate train ing in their duties as flag officers.

Owing to the necessity for economy In expenditures, I have directed the curtailment of recommendations for naval appropriations so that they are thirty-eight millions less than the corresponding estimates of last year, and the request for new naval construction is limited to two first class battleships and one repair vessel.

The secretary of the navy bas inau gurated a tentative plan involving cer tain changes in the organization of the navy department, including the navy yards, all of which have been tound by the attorney general to be in me cordance with law. I have approved the execution of the plan proposed be cause of the greater efficiency are economy it promises.

Department of Justice-Expedition 1 Legal Procedure.

The deplorable delays in the admi' Istration of civil and criminal law have received the attention of committees. the American Bar association and many state har associations as well a: the considered thought of judges and jurists in my judgment, a change is public procedure, with a view to re ducing its expense to private litigants in civil cases and facilitating the dispatch of business and final decision in both civit and criminal cases, constitutes the greatest need in our Ameri can institutions I do not doubt for one moment that much of the lawless violence and cruelty exhibited in tench ings are directly due to the uncertain ties and injustice growing out of delays in trials, judgments and the car cutions thereof by our courts.

I therefore recommend legislation providing for the appointment by the president of a commission with author ity to examine the law and equity procedure of the federal courts of first instance, the law of appeals from those courts to the courts of appeals and to the supreme court and the costs Imposed in such procedure upon the private litigants and upon the public treasury and make recommendation with a view to simplifying and expediting the procedure as far as possible and making it as inexpensive as may be to the litigant of little means.

The platform of the successful party in the last election contained the fol-

Injunctions Without Notice.

"We believe that the rules of proce dure in the federal courts with respect to the issuance of the writ of injunction should be more accurately defined by statute and that no injunction or temporary restraining order should be issued without notice, except where irreparable injury would result from defay, in which case a speedy hearing thereafter should be granted."

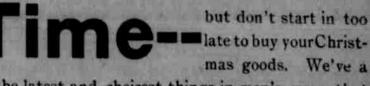

I recommend that in compliance with the promise thus made appropriate legislation be adopted. Moreover, every such injunction or restraining order issued without previous notice and opportunity by the defendant to be beard should by force of the statute expire and be of no effect after seven days from the issuance thereof or within any time less than that period which the court may fix unless within such seven days or such tess period the in junction or order is extended or re newed after previous notice and op portunity to be heard.

Anti-trust and Interstate Commerce

Laws. The jurisdiction of the general gov ernment over interstate commerce has led to the passage of the so called "Sherman anti-trust law" and the "in terstate commerce law" and its amendments. The developments in the operation of those laws call for a discussion and some suggestions as to amendments. These I prefer to embody in a special message

Postoffice Department - Second Class

Mail Matter. The deficit every year in the postoffice department is largely caused by Take Your Time-but don't start in too

fine large assortment on hand now of the latest and choicest things in men's wear that the market affords, but don't depend on this too long. However this you can depend on, that if you buy your gift here, it will go GOOD. Nothing has been permitted to enter our lines except the very best and most reliable kinds. Look over this list by way of settling your mind on what to get: Men's lounging robes and house coats, \$5 to \$10. Men's silk or knit mufflers, all kinds, 25c to \$5. Men's kerchiefs, silk or linen, initial or plain 15c to \$1. Handkerchief cases, made of fine Ooze leather, \$1 to \$3. Collar and cuff cases, made of fine Ooze leather, black or tan, green or golden brown, satin lined \$1 to \$3. Men's plain color Bengaline ties, 4-in-hand or strings, 5 for \$1.00, assorted shades-the biggest tie bargain in town; others 35c, 50c, 75c, \$1.00 and \$1.50. Link buttons and tie pin sets in single boxes 50c to \$1.50. Men's fancy vests \$1 to \$5. Men's and boy's leather gloves and mittens 25c to \$5. Holeproof hosiery-assorted shades in Christmas boxes, \$1.50 and \$2 per box. Leather grips and suit cases \$3.50 to \$15. Sweater coats for men and boys, 50c to \$5. If you don't see it in this list, come in, we have it, if it belongs to men's wear.

E. Wescott's Sons

THE HOME OF SATISFACTION

the low rate of postage of 1 cent a pound charged on second class mail matter, which includes not only newspapers, but magazines and miscellaneous periodicals. The actual loss growing out of the transmission of this second class mail matter at 1 cent a pound amounts to about \$63,000,000 a year. The average cost of the transportation of this matter is more than 9 cents a pound. The statistics of 1907 show that second class mail matter constituted 63.91 per cent of the weight of all the mail and yielded only 5.19 per cent of the revenue.

The figures given are startling and show the payment by the government of an enormous subsidy to the newspapers, magazines and periodicals. A great saving might be made, amounting to much more than half of the loss, by imposing upon magazines and periodicals a higher rate of postage.

Postal Savings Banks.

I believe postal savings banks to be necessary in order to offer a proper inducement to thrift and saving to a great many people of small means who do not now have banking facilities and to whom such a system would offer an opportunity for the accumulation of capital. They will furnish a satisfactory substitute, based on sound principle and actual successful trial in nearly all the countries of the world, for the system of government guaranty of deposits new being adopted in several western states which, with deference to those who advocate it, seems to me to have in it the seeds of demoralization to conservative banking and certain financial disaster.

Ship Subsidy.

Following the course of my distinguished predecessor, I carnestly recommend to congress the consideration and passage of a shin subsidy bill. Interior Department-Nov. Missico and for the Burlington's Lincoln traffic Miss Mary E. Foster,

Speaking generally, the country is in a high state of prosperity. There is every reason to believe that we are on the eve of a substantial business expansion, and we have just garnered a harvest unexampled in the market value of our agricultural products. The high prices which such products bring mean great prosperity for the farming community; but, on the other hand, they mean a very considerably increased burden upon those classes in the the Blind at Nebraska City, which community whose yearly compensation speaks volumes for the excellent does not expand with the improvement manner in which the school has been in business and the general prosperity. conducted and which is well worth Various reasons are given for the high reprinting.
