

## Not Sisters

Now and again you see two women passing down the street who look like sisters. You are astonished to learn that they are mother and daughter, and you realize that a woman at forty or forty-five ought to be at her finest and fairest. Why isn't it so? The general health of woman is so intimately associated with the local health of the essentially feminine organs that there can be no red cheeks and round form where there is female weakness.

Women who have suffered from this trouble have found prompt relief and cure in the use of Dr. Pierce's Favorite Prescription. It gives vigor and vitality to the organs of womanhood. It clears the complexion, brightens the eyes and reddens the cheeks.

No alcohol, or habit-forming drugs is contained in "Favorite Prescription." Any sick woman may consult Dr. Pierce by letter, free. Every letter is held as sacredly confidential, and answered in a plain envelope. Address: World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N. Y.

## Woman's Auxiliary Session.

The woman's auxiliary of the diocese of Nebraska opened its annual meeting at Trinity cathedral Tuesday evening. After a business session and address by Bishop Williams and by Mrs. William G. Sloane of South Omaha, president of the auxiliary, the election of officers took place. Those chosen are:

President—Mrs. A. K. Gault, Omaha.

First Vice President—Mrs. Albert Noe, Omaha.

Second Vice President—Mrs. A. E. Marsh, Blair.

Third Vice President—Miss Jean Morton, Nebraska City.

Fourth Vice President—Mrs. J. C. Bousfield, Auburn.

Vice presidents in charge of organization and visitation—Mrs. Livingston, Plattsmouth; Mrs. Dora Wigenhorn, Ashland.

Vice president in charge of Junior auxiliary—Miss Hilliard, Omaha.

Secretary of Junior auxiliary—Miss Edith Earl, Omaha.

Vice president in charge of the united offering—Miss Jessie Royce, Omaha.

Vice president in charge of the diocesan box—Mrs. John Williams, Omaha.

Vice president of the babies' branch—Mrs. Clinton Miller.

Vice president in charge of the diocesan library—Mrs. J. W. Van Nostran, Omaha.

Among the delegates from out of town are: Mrs. Guy Brown, Mrs. Bayley, Mrs. Harley, Mrs. Camp, Mrs. Wiggins, Lincoln; Mrs. Kue, Beatrice; Mrs. Wolfe, Mrs. Kayes, Neligh; Miss Wright, Miss Davis, Wyoming; Miss Morton, Nebraska City; Miss Robb, Wyoming; Mrs. Hoffman, Neligh; Mrs. McCoy, Fairbury; Mrs. Burleigh, Miss Jenson, Falls City; Miss Taylor, Central City; Miss Cotton, Miss Cline, Auburn; Miss Young, Miss Harris, Lincoln; Mrs. Marsh Blair and Mrs. Mosier, Beatrice.

In the afternoon the woman's auxiliary listened to three strong addresses.

The Rev. W. H. Moore spoke eloquently upon "The United Offering" and its uses.

The Rev. Frances Randall told of work among the Indians at Genoa school and of the affection and obedience of the little Indian boys and gave a fascinating lecture of the field for work there.

Archdeacon Wentworth put deep feeling into history of labor among the mountaineers of Kentucky. The people came out through the Cumberland gap from Virginia and were driven by the Indians into the fastness of the mountains and held there for forty years. They have some of the best blood of the colonies in their veins, but their environment is pitiable. They realize it and wish opportunities for their children—Omaha World-Herald.

## Herman's Sons Gather.

John Mattes, Jr., replying to addresses of welcome at yesterday's meeting of the Sons of Herman grand lodge suggested that a more reasonable tolerance in the excise rules of the city would be appreciated. He felt that the severe restrictions, from the standpoint of the Sons of Herman, were not exactly pleasing to the visitors. He said that while all members were not in sympathy with conditions existing in Lincoln they were law-abiding citizens and willing to live up to the laws even though it were a difficult task.

The meeting is the biennial gathering of the lodge. Sessions are being held in Plattsmouth verin hall, Ninth and M streets. The only business taken up yesterday were reports of officers and appointment of committees. Reports of officers showed a good growth in the organization for the past two years. The total number of membership in the state is now 2,700 with total assets amounting to \$50,000.

Mayor Love delivered an address of welcome on behalf of the city and President Selleck, of the commercial club, spoke for the club. G. F. Beschorn spoke for the local lodge and John Mattes, Jr., grand president, replied to the addresses.

F. J. Freitag, of South Omaha, first vice president, expressed the thanks of the lodge to Mr. Selleck for his address. At the close of the address a vote of thanks was taken and each speaker was presented with a delegate's badge as a souvenir of the occasion.

No sessions were held last evening. A theater party was arranged and the delegates attended the Lyric in a body. The first business session will be held today, at which will be the election of officers to serve for the coming two years. Present officers are:

John Mattes, Jr., of Nebraska City, president; Fred Volpp, of Scribner, grand treasurer; Carl Rhode, of Columbus, grand secretary; F. J. Freitag, of South Omaha, first vice president.—State Journal.

Have you ever used the celebrated "Forest Rose" flour? Try it when you buy the next sack. At all leading dealers.

## GOOD-BYE TO HALLEY'S COMET

### Large Number of Citizens are Disappointed by Comet.

Ouster proceedings were instituted last night by old Mother Earth against one Halley and his comet and today old Mother Earth is in full possession of the office which she has held for so many thousand years. Those who gathered at the council chamber to witness the meeting up of the earth and the comet last night were much disappointed for there was not a thing in all the heavens to indicate that the seven billion mile traveler was anywhere about.

The people all over the country were out in force to witness the strange and unusual phenomena of passing through a comet's tail and the more timid were some worried over the prospects for trouble while the event was on but all were doomed to disappointment. Not a glimpse of the celestial visitor was had and there was not a thing unusual in the heavens save an aurora which was observed in the north and much of the beauty of that was lost in the bright moonlight. The expected showers of meteorites or "falling stars" as they are some times called, also failed to come through as expected and the night was peaceful and calm.

In fact, last evening was one of the prettiest seen here this year and if the passing of the earth through the comet's tail would produce more of them the people would be well satisfied to have Halley hang around and exhibit his comet whenever he felt so disposed. Many of the parties which gathered to see the expected sensation stayed up until a very late hour and scanned the heavens for some little token of undue things but only fair Luna, was in the market with the goods.

The superstitious who had expected the earth to be destroyed by a great collision had their fears for their pains and today they are resting comfortable, knowing that the comet is headed away from the earth and will not come back again for seventy-five years when most of us will long since have been gathered to the bosom of our fathers. From all over the country come reports of observing parties but in all cases little was seen which would be intelligent to the laymen. To the scientists the day and night were fruitful for observation, the clear skies giving them splendid opportunities for observing the strange visitor and its habits and for gathering data as to its materials.

There is some diversity of opinion as to when the earth entered the comet's tail among the astronomers but it is generally placed at between ten and eleven o'clock at night. At the time of entry the observers at Yerkes observatory at Williams Bay, Wis., estimated the speed of the earth at a little more than forty-six miles per second and that the earth would travel through the tail in a little over five hours. At this observatory excellent photographs were taken and many accurate records of meteoric phenomena and atmospheric conditions were observed. At this observatory sixteen cameras especially constructed for photographing the skies and fourteen telescopes were pointed at the comet and the sky every foot of which was covered. Hundreds of exposures were made. The brilliant northern lights which were observed here as noted above, at about 9:30 p. m., were also seen at that point and Prof. Mitchell of New York who was observing there, announces them as most brilliant and to be the direct result of the comet's approach. He also announced this as the most important observation made so far.

One of the most important discoveries to be made by the various observers was that of huge sunspots on the sun. From St. Louis no less than thirty sun spots were observed, one of which was estimated to be 15,000 miles across. These spots according to Father Martin S. Brennan, astronomer at Kenrick seminary, one of the most noted observers in the country, indicate violent solar eruptions. There were three groups of the spots, one of twenty-six, one of three and one lone spot. The largest sun spot ever seen, according to Father Brennan, was in August, 1848. It was 182,000 miles in diameter. Father Brennan, was in August, believe the spots had any connection with the comet. Father Brennan states that the spots are unusual at this time of the year but need cause no uneasiness.

At Pasadena, Cal., the same observations were made by Dr. George B. Hale, observer at Carnegie observatory. Dr. Hale asserts the strong magnetic fields which the disturbances on the sun would create might disturb the earth's magnetic field and cause storms but he did not believe them to be responsible for the recent earthquakes.

Contrary to expectation there was no interruption to wireless tele-

graphy or to the land wires although these would naturally be affected in some degree by the aurora which was observed.

In the south "Comet Day" was the cause of great excitement among the negroes. Atlantic, Ga., reports that dealers in conjure bags in the negro districts harvested a fortune. These bags were supposed to ward off all danger of the comet. Churches were crowded with negroes and there was a general suspension of business throughout that section by all negroes who refused to work until the danger was over. The same reports comes from practically all over the south. From Neenah, Wis., comes the report that many farmers in that section had taken their lightning rods down from their dwellings and barns as a precaution against drawing dangerous substances from the skies.

In Chicago for several days before the time for the comet's arrival great agitation existed among the foreign element over it. Especially was this true with Russian emigrants who had received letters from that country telling them of the coming of the end of the earth. Many Catholic priests, according to the Chicago Tribune, reported that they had had many confessions on that account one of them telling of a man who had confessed for the first time in fourteen years. In the congested districts of the large cities the same conditions existed but today there must be much happiness over the discovery that no danger existed.

Prof. Jacoby of Columbia university is the only discordant note to be heard among the astronomers today. He declares the earth did not enter the comet's tail until this morning and he does not expect to see much tonight but tomorrow is the big show. His interview follows:

New York, May 18.—Prof. Harold Jacoby of Columbia university will not remain near his telescope during the period of contact between the earth and the comet's tail tonight. He is convinced that absolutely no phenomena worth observing will be noted. "These comet parties that are being organized to sit out the comet's passage will have a lonesome job," he said in an interview given out today.

"The next we shall see of the comet will be such a sight as will really set the people on edge who view it. Tonight we shall not be able to see the comet because it will set with the sun. The same will be true on Thursday. But there will be a great sight in the western sky on Friday night. That is the real night for comet parties.

If the Stomach, Heart, or Kidneys are weak, try at least, a few doses only of Dr. Shoop's Restorative. In five or ten days only, the result will surprise you. A few cents will cover the cost. And here is why help comes so quickly. Dr. Shoop does not drug the Stomach, nor stimulate the Heart or Kidneys. Dr. Shoop's Restorative goes directly to the weak and failing nerves. Each organ has its own controlling nerve. When these nerves fail, the depending organs must of necessity falter. This plain, yet vital truth, clearly tells why Dr. Shoop's Restorative is so universally successful. Its success is leading druggists everywhere to give it universal preference. A test will surely tell. Sold by all dealers.

## A Cruel Joke.

Some wag last night took advantage of the confiding nature of our good friend Albert D. Despain and played a cruel and unusual joke on him. Knowing of Albert's warm interest in natural phenomena and expecting that he would be on the quiver, so to speak, for any strange development which the heavens might yield all incident to the passage of the earth through the comet, this wag laid in a supply of sky rockets of assorted sizes and colors which he planned to let loose about the time the sensation was supposed to be at its height. So at about midnight the rockets were fired up and sent soaring into the heavens to impress Albert and many others with the idea that a great flight of meteors had taken place. The bait took and Mr. Despain was the proudest man in town this morning as he believed that he had had a grand sky meeting pulled off for his own especial benefit. He described in detail to reporter how the meteor soared and crackled through the atmosphere, bursting into a myriad of pieces and even insinuated that he believed he would take a spade and go out and dig up some of the remains. When he reads this he will find that his meteors were only rockets and were sent up to make it be a joke from the people.

A touch of rheumatism, or a twinge of neuralgia, whatever the trouble is, Chamberlain's Liniment drives away the pain at once and cures the complaint quickly. First application gives relief. Sold by all dealers.

## CHURCH SUPPERS UNDER THE BAN

### Bishop A. L. Williams Condemns Money Raising in This Way

The practice of churches in giving entertainments, suppers and affairs of the kind for the purpose of raising money was attacked by Bishop A. L. Williams, in an address before the forty-third annual council of the Diocese of Nebraska at Trinity Cathedral yesterday afternoon.

"It seems to me an unchurchly appeal, when an effort is made to give a contributor to the cause a material return for his money," said the bishop. "The gift without the giver is bare."

Bishop Williams also took occasion to call the attention of the clergy of the diocese to the regulation concerning the marriage of divorced persons. He demanded that they should adhere strictly to the canon of the church.

While the bishop offered criticism in no uncertain terms his address was marked by a note of optimism. He spoke with earnestness of the material and spiritual progress of the church in this state.

"There is a growing sense of the duty of the wealthy to leave in their wills bequests for church and charities," said the bishop. "The time is close at hand, when it will be deemed as much a duty as to provide for one's family."

The council session opened in Trinity Cathedral with an ordination service, John D. Rice being ordained deacon by Bishop Williams, who also preached the sermon.

At the close of the service, the council began its business session in the crypt of the cathedral.

Rev. William H. Moor and Rev. John Albert Williams were re-elected secretary and assistant, respectively.—Omaha Bee.

As told in the Journal yesterday the delegates attending the convention from St. Luke's church in this city are W. J. White, J. Edwin Barwick and Harry S. Austin. Canon H. B. Burgess is also in attendance.

A book on Rheumatism, and a trial treatment of Dr. Shoop's Rheumatic Remedy—liquid or tablets—is being sent free to sufferers by Dr. Shoop of Racine, Wis. You that are well, get this book for some discouraged, disheartened sufferer! Do a simple act of humanity! Point out this way to quick and certain relief! Surprise some sufferer, by first getting from me the booklet and the test. He will appreciate your aid. All dealers.

## More Improvements.

J. E. McDaniel today had the work commenced upon quite an improvement in his place of business, the Budwaiser. The improvement consists of the installing in place of some fine French plate glass mirrors which are to run around the west side of the room from the door in the west side to the corner door on Main and Fourth streets and which will fill in the short space on the east from the window to the door to the upstairs. The space to be covered on the west is some thirty feet. The mirrors come in sections of five feet three inches in length by twenty inches wide and are very handsome affairs. These mirrors will be set in a solid frame of oak which will rest upon the wainscoting, the top of the frame standing two feet above the top of the wainscoting. This will make Mr. McDaniel's place by far the handsomest in interior finishing in the city or in fact, in the state. The mirrors face the bar and they will afford a very large and complete view of the interior of the room. It is an improvement well worth mentioning and is in line with Mr. McDaniel's policy of development and improvement. The work was commenced today, a representative of the Midland Glass company of Omaha being here to put the mirrors in place while the carpenter work is being done by Messrs. Albert Despain and Henry Jess. The cost of the new furnishings will be several hundred dollars but it is money well invested as it increases the handsome appearance of the interior far beyond the expenditure.

## Back From the Pen.

Sheriff Quinton last evening returned from Lincoln where he went after C. J. Baker whose sentence for bigamy was reversed by the supreme court. He brought back his man and Baker is now in jail again. It is understood his counsel will make application to have bail fixed for him and that he will try to arrange to furnish it. The hearing will be had before Judge Travis to fix the amount of the bond.

FOUND—An automobile lamp on Lincoln avenue. Owner may have same by calling on R. H. Patton and paying for this notice.

## REMNANT DAY!

Special low prices on Remnants tomorrow. You can save money by buying Friday.

Remnants of Calico—best grades, all lengths. Per yard only..... 5c

Remnants and Mill-Ends of Gingham, big lot to choose from—extra good patterns. Come early. Per yard..... 7½c

Remnants of White Goods, nice lengths for Waists or Children's Dresses at just half price.

Remnants of Percale, Table Linens, Dress Goods, Linings, Silkaline, Towling, Curtain Swisses and many others too numerous to mention at

LESS THAN HALF!

E. A. WURL

WE CLOSE AT 7 O'CLOCK.

PROMPT DELIVERY
