Frank Spencer had the misfortune to have his left hand come in contact with a horse's foot, breaking one of his fingers.

J. C. Zimmerer and wife entertained the following Sunday: M. Myers and family, H. A. Straub and family, Wm. Kohl and wife.

Married in Omaha.

A marriage license issued yesterday at Omaha to Leonard Openhausen, aged 21, and Miss Mary Warner, aged 19, both of Mynard, revealed to the many friends of these young people that they had quietly stolen away yesterday to Omaha and got married. The young folks boarded the morning Burlington train for that city at this place yesterday morning along with several personal friends and made the trip to Omaha where they had the knot tied. They arrived at the Burlington station just a few moments before the train left, having carefully timed their arrival so that parties here would know nothing of their intentions. They are very popular young people of the precinct and have many good friends in that locality who will wish them the best of luck upon their matrimonial venture.

The groom is a well known young man of this county who has made himself a reputation for industry and thrift and who is regarded as a very bright and capable man.

The bride is the daughter of Mr. and Mrs. Charles Warner and is a very popular young lady. She has many attainments of much merit and is justly considered one of the belles of her neighborhood. The young folks returned to this city last evening and later went to their home in the country. They will make their residence near here and engage in farming.

SHIPPING OUT NEW MACHINES

Olson Machine Company Starts Filling Orders.

The Olson Photo company yesterday and today has been busy making shipments of machines out of the factory to various points and the real work of the plant is now well under headway. President and manager, G. R. Olson, is more than well pleased with the progress which the plant has made and the success attending his efforts to get the machines on the market. He sent out a world of advertising matter regarding the merits of the machine and the result has been most gratifying. He has a total of over four hundred inquiries regarding the machine and its work and from these inquiries it is evident the sale of the machine will be very good indeed.

The first machine from the factory went out yesterday afternoon and it is billed to a prominent photographer of Reading, Pa., one who studied the printing sent him and examined the pictures of the machine and became convinced it was a winner. He ordered one and buys it outright without asking trial. The second machine went to Gary, Ind., where a similar condition existed while the third goes to Lynn, Mass., where the live wire who received the printed matter saw its advantages and ordered one without discussion. This shows that the machine is now installed in three excellent locations where its work will tell and where it will have an influence upon the market.

The machines which have been

shipped out are all the electric light model and operate upon a continuous current. The daylight only machines have not yet met with a heavy sale but the general demand seems to be for a machine to print by electric light and this is the strong feature of the Olson machine. The machine itself is a beautiful appearing piece of machinery with a handsome oak finish and with nickled parts which form a pleasing contrast to the eye. Mr. Olson is confident the sight of the machine will aid largely in selling it and is proud of the high class appearance it puts up.

It is being carefully packed for shipment and goes enclosed in good strong boxes which will stand the tear of handling and deliver the machine in good shape.

It is the intention of Mr. Olson to take several models of his machine with him to Milwaukee, Wis., where he will attend a convention of photographers from Canada, Mexico and the United States, this gathering being in the nature of an international convention. This will be in session on July 12 and is the banner photographic event of the year. Mr. Olson proposes to show models of his daylight machine, his electric light machine and his combination machine on the floors of the convention and is confident the wonderful work which it does will appeal to all who will be there. He also expects to attend a convention to be held in Boston, Mass., on July 26, when the New England photographers will assemble and to exhibit the machine before them.

The Olson factory is one of the institutions which Plattsmouth can well be proud of. Organized and financed by Plattsmouth brains and capital, it bids fair to pay its promoter and the business men behind it good money on their investment.

without any great length of time. The worth of the Olson patent has been proven and with the general knowledge of it which will soon be spread abroad, it cannot help but sell to every up to date photographer. The Olson Photograph company of this city is using and has been using the machine in practical work for so long a time that there is no question of its usefulness or its fitness for the work and when outside photographers learn this they will be quick to patronize the factory and order its wares.

WEN AND WOMEN WANTED.

The Government pays Railway Mail Clerks \$800 to \$1,200, and other employees up to \$2,500 annually

Uncle Sam will hold examinations throughout the country for Railway Mail Clerks, Custom House Clerks, Stenographers, Bookkeepers, Department Clerks and other Government positions. Tell some deserving Rheumatic sufferer, that there is yet one simple way to certain relief. Get Dr. Shoop's book on Rheumatism and a free trial test. This book will make it entirely clear how Rheumatism pains are quickly killed by Dr. Shoop's Rheumatic Remedy—liquid or tablets. Send no money. The test is free. Surprise some disheartened sufferer by first getting for him the book from Dr. Shoop at Racine, Wis. All dealers.

THE INJURED WILL RECOVER

But Some of Them Will be Laid Up for Some Days.

Little news has been received today from the gentlemen injured in the automobile accident of last Tuesday near Humboldt but such news as has come in is favorable for the recovery of all of the parties. There is practically no doubt now of the recovery of William R. Cross, Senator Banning or either Prof. Cheney or L. R. Upton, the two latter having slight injuries while the former are more severe. Messrs. Cross and Banning will be laid up to a greater or less degree for some time to come, especially Mr. Cross who sustained a great many broken bones.

This morning's papers contain dispatches from Humboldt to the effect that Mr. Pierson's injuries are not nearly so bad as thought at first and that he will recover. He has been resting quietly since the accident but has suffered considerably from shock. He is not believed to be hurt internally now and the first reports of his injuries are regarded as much exaggerated owing to the excitement incident to the accident. It is believed that he can be moved to his home at Union in a short time, although his bruises are so severe that he will not be able to get about with any comfort for quite a while. This will be cheerful news for the many friends of the gentleman who had been badly worried over the first reports which indicated a very serious condition.

That the five gentlemen escaped death is regarded as little less miraculous. There is hardly an instance on record where a car going at the high speed this one was, was wrecked and the occupants escaped without loss of life. That Messrs. Banning, Pierson and Cross escaped after being pintoned under the heavy machine is looked upon as astonishing and automobilists are at a loss to explain it.

According to dispatches in the morning papers from Humboldt the cause of the accident was running at too high speed. The theory which the driver, Prof. Cheney holds that there was a defect in the steering gear, does not seem to have taken hold of the people in the locality of the accident who lay the trouble

purely and simply on too fast running.

Mr. Pierson's injuries so far as ascertained consisted of a broken collar bone and a fractured rib in addition to the numerous cuts and bruises which he sustained. These injuries it was thought were complicated by internal injuries but a later examination revealed this was not the case.

Steps to regulate the speed of autos on the roads in the country will be speedily accentuated by a few more injuries of the character which these men sustained as they furnish a bright object lesson upon the insanity of driving over country roads at so great a speed. Cool, calm judgment have dictated slower time over a dirt road as it is at times liable to throw a machine and from what is said it seems safe to say none of the parties in this wreck will be caught driving at top speed in the very near future.

A Serious Accident.

While coming up from Murray last evening, we met on the train George W. Braezele, the proprietor of the Oxford hotel at Avoca. He had one of his eyes all bandaged, and on inquiry we learned that he met with quite a serious accident yesterday morning, while assisting on the reconstruction of a bridge near the depot in that village. It seems he was driving a large spike, when the same flew back, the point striking him in the left eye. It went into the eye several inches and had to be pulled out. He was en route to see Dr. Gifford at Omaha, accompanied by a brother from Talmage and Dr. B. F. Brendel, of Murray. While Mr. Braezele was suffering considerable pain, it is thought that Dr. Gifford will be able to relieve him and possibly save the eyesight. It is truly hoped so.

Pain anywhere stopped in 20 minutes sure with one of Dr. Shoop's Pink Pain Tablets. The formula is on the 25-cent box. Ask your doctor or druggist about this formula! Stops womanly pains, headache, pains anywhere. Write Dr. Shoop, Racine, Wis., for free trial bottle to prove value. All dealers.

C. H. Vallery came in this afternoon from his home in the precinct and was a passenger on train No. 23 for the north. He had an exciting time catching the train, being hurried down to the Burlington station by William Volk in his auto after the train had pulled into the station.

In sickness, if a certain hidden nerve goes wrong, then the organ that this nerve controls will also surely fail. It may be a Stomach nerve, or it may have given strength and support to the Heart or Kidneys. It was Dr. Shoop that first pointed to this vital truth. Dr. Shoop's Restorative goes directly to those falling inside nerves. The remarkable success of this prescription demonstrates the wisdom of treating the actual cause of these falling organs. A simple five or ten days test will surely tell. Try it once and see! Sold by all dealers.

Guests of Judge Ramsey.

Mrs. W. A. Davis of Weeping Water and Mrs. Boyd of Seattle, Wash., her mother, who is making her an extended visit, have been in the city for several days visiting with Judge B. S. Ramsey and wife. Mrs. Boyd departed this morning for Glenwood, Whiting, Des Moines and Earlham, Ia., and Hills, Minn., at all of which points she has relatives and where she expects to make visits before returning to her home. Mrs. Davis will accompany her as far as Glenwood and possibly to other Iowa points before returning home. Mrs. Davis is an intimate personal friend of Judge Ramsey and wife and many years ago was a pupil in the country school which Judge Ramsey taught in this county. Her daughter, Miss Mabel Davis, is one of the teachers in the local schools and last winter boarded with Judge and Mrs. Ramsey.

Appendicitis.

Dr. F. Tanager of London says appendicitis is the use of preservatives. Not that the preservatives themselves are dangerous to health, but the decomposed food they disguise does. We wish to call the attention of our readers to that especially during the hot season and wish to impress upon them the necessity of buying perfectly fresh foodstuffs. Many diseases of the bowels can be prevented. As soon as you will notice the slightest indisposition you should use Triner's American Elixir of Bitter Wine. This remedy will drive out the impurities and the waste matter and will bring the digestive organs to a healthy activity. It is very valuable in diseases of the stomach and the intestines, in nervousness, abdominal pains, constipation, and loss of bodily strength. At drug stores. Jos. Triner, 1333-1339 So. Ashland ave., Chicago, Ill.

False Report.

The Journal learns that an unfounded report is being circulated out in the county to the effect that there are many cases of contagious disease in this city and people are warned not to come here. This paper positively asserts there is no truth in the rumors and that neither diphtheria nor scarlet fever are epidemic here. The diseases are actually non-existent here and the public can come to this city assured of absolute safety from contagion.

Eddie Shoemaker, a prominent resident from the neighborhood of near Avoca, is in the city today looking after business and gave the Journal a pleasant call, leaving \$1.50 and told us to send the Journal along.

Fly Season is Screen Season

Flies are here. Old screens look rusty and dingy. New screens cost much more than a new coat of paint. Give old screens a coat of

SHERWIN-WILLIAMS SCREEN ENAMEL

and make them look like new. Sherwin-Williams Screen Enamel does not gum up the wire. It leaves a fair gloss that prevents dust, dirt and moisture from remaining on the screen. Easy to apply.

Made in two colors—black and green. Put up in 1/2 pint, pint and quart tins.
