THE HOME OF SATISFACTION

Dry for Crops.

George Shrader and John Yardley came up this morning from their home in Rock Bluffs precinct called here by the necessity of getting some mabbine repair parts. Mr. Shrader states that the hot weather and the drouth is affecting the pasture to some extent but is doing no damage to wheat or corn in his estimation. He believes that corn will make a good crop if rain comes in a week or ten days and as to wheat he looks for a better crop than was prophesied some days ago. Mr. Shrader is at present engaged in haying but he hopes to be able to bring his family and enjoy the Fourth of July with the Plattsmouth folks. He is feeling quite well again and has been able to do his work on the farm with very little inconvenience. He is a fine man and the Journal is pleased to acknowledge him as one of its good friends.

Death at Union.

A special from Union dated July 1, says: "Mrs. Mickle passed away last night at the home of her mother, Mrs. Barbara Taylor, after an illness of three years. She was born one and one-half miles southwest of this village in 1878, and has since made this her home. Her husband, Marion Mickle, died about eight years ago. Besides her mother she leaves seven sisters and three brothers. The remains will be taken to Weeping Water.

Accident at Oreadpolis.

Arthur Dean, a workman on the pile driver force of the Missouri Pacific, on the new bridge at Oreadpolis, yesterday sustained severe injuries while at his work. He was standing under a pile which was being lifted into place by the steam driver when the chain holding the pile slipped and the monster log of wood fell to the ground. Fortunately it was very high from the ground when the accident happened and it did not catch Mr. Dean with full force. As it was it threw him to the sand and broke one rib on the right side. Dean had a cant hook and was assisting in the operation of elevating the pile and as it came down the cant hook failed to hold it with the unfortunate effect as above stated.

A surgeon was called from this city who advised the removal of the young man to a hospital at Omaha which was done within a short time. He was taken to an Omaha hospital at 5 o'clock accompanied by his brother where his injuries can receive more care than in the boarding cars.

Yardmaster, Charles S. Johnson of the Burlington departed on the early train this morning for Omaha where he expects to meet his wife and return home with her. Mrs. Johnson has been in an Omaha hospital for some days and is now well enough to be removed to her home in this city, something which the public will be glad to learn.

OUR OWN STATE OF NEBRASKA

Facts That Should Be Scattered Broadcast Over the World.

Japan, with forty millions of people, enjoys a trade and commerce amounting to about \$400,000,000 a year. This includes what Japan sells to other nations as well as what Japan buys from other nations. In 1909 Nebraska raised from her soil and produced manufactured articles from Nebraska raw products, the enormous total of \$650,000,000. With 3 per cent of Japan's population, therefore, Nebraska produced and added to the wealth of the world 60 per cent more than Japan produced and purchased from other nations. The total volume of Japan's production and purchase was little more than half of what the single state of Nebraska raised from the soil and sold direct, or converted into manufactured articles in her own factories.

There are fewer than six states that produce more food products than they consume, and Nebraska is one of the six. Upon these five or six states nations depend for their food supplies. Yet, with all of this remarkable record less than one-third of the tillable land of Nebraska is under cultivation. Millions of acres of the richest soil in the world lie within the confines of Nebraska and have never been touched by the plow. Other millions of acres with desultory cultivation have produced in an abundance that has been the marvel of the agricultural world.

Why go into the desolate and frigid regions of the far northwest to undergo the hardships of pioneers, far removed from railway facilities, and then be able to secure only wheat lands, when Nebraska, with six thousands miles of railroad and a splendid live stock and market within her borders, offers without hardship and at a reasonable price land that will not only produce wheat far exceeding the average, but will produce in abundance every other crop that grows in the temperate zone.

Nebraska wheat lands will produce vastly more wheat to the acre than the wheat lands of the Canadian northwest, and in addition will grow richer every year by the proper rotation of crops and produce abundantly of corn, oats, rye, barley, alfalfa, speltz, broom corn and sugar beets. Nebraska's crop averages are the highest of any state in the union. Compared with productivity, nearness to market, railroad facilities and everything else that goes to make life worth living, Nebraska farm lands are selling at a lower price than tillable land is selling anywhere else on the North American continent.

The possibilities of Nebraska's soil are beyond estimate. Already it produces more corn to the acre than any other state, and more wheat to the acre than any other state. Intensive cultivation will add immeasurably to the yield. Eighty acres of corn land in Nebraska are not only more profitable than five times that many acres of wheat land in Manitoba or Alberta, but easier cultivated and surrounded by an infinitely greater number of comforts of life. And, too, the eighty acres of Nebraska corn land are no harder to secure than the two or three hundred acres of wheat land in chilly Canada.

Nebraska has room and a welcome for thousands of homeseekers. It has fertile lands that are cheap only in price awaiting the energy of the industrious homeseeker.

If you want to locate in a state upon land that will produce more of everything than land in any other state; if you want to locate in a state blessed by superior educational facilities; if you want to locate in a state where the energy of the husbandman is rewarded bountifully; if you want to locate in a state where ambition may have its full fruition; if you want to locate in a state where the climate is superb and the death rate the smallest of any state in the union; if you want to locate in a state where you can begin with practically nothing and build a comfortable fortune upon the yield of the soil—if you want to locate in such a state as this, come to Nebraska.

There is only one trouble about properly advising the glories of this great young state—the truth reads so like fiction that it is difficult to make the world believe. But the facts and the figures are at hand to prove every claim advanced for Nebraska. The Bureau of Labor and Industrial Statistics will be glad to submit them to you. To those who contemplate leaving Nebraska in response to the glittering allurements of the northwest's promoters we offer the advice given by the elder Mr. Weller to his son, Samivel, "Don't." To those of the east and of other lands who contemplate seeking a new home we would suggest, "Consider Nebraska, study her possibilities of

the future and her record of the past."

"We came unto the land whither thou sentest us, and surely it floweth with milk and honey."

That is Nebraska. The cities are not walled, and there are no giants of Anak. On the contrary, the people of Nebraska await with a hearty welcome all whom come to her confines with the intention and desire to build homes and add to the wealth production of the world.

Trip to Kansas.

Judge H. D. Travis and L. B. Egenberger returned yesterday from a trip of several days duration to the western part of Kansas. The gentlemen during their trip visited Ness and other counties in that part of the state and returned highly pleased with the prospect. Judge Travis asserts that never before has western Kansas been so blessed as this year. It has the greatest crops in its history and there are fields of golden yellow wheat stretching away for miles on every hand. The yield of wheat in that section is something which is really amazing and which surprised both the judge and Mr. Egenberger. The average will be not less than 30 to 40 bushels to the acre and it is of fine quality. The farmers of that part of the country are jubilant over the results of the year and feel that western Kansas has been duly vindicated. The oats crop is another which is of unusual excellence this year and corn never before has such brilliant prospects. The rainfall this spring and summer has been very generous and this has produced the fine crops spoken of. The day the gentlemen were there a heavy rain fell which came just exactly when it could do a great deal of good and they were enabled to see the country at its prime. Prices for land all over that section continue on the uplift and it is the fond belief of the landowners of that locality that it will soon rise to heights which the most sanguine had not expected. Judge Travis owns several hundred acres in the vicinity of Waukeenee, Kas., and this land has advanced with strides and bounds until today he could dispose of it at a handsome increase on the original investment. However, he does not intend to sell it as it is paying him fine returns on his investment. A number of other Cass county people are interested in the land in that locality and they agree with him that it good property to hold.

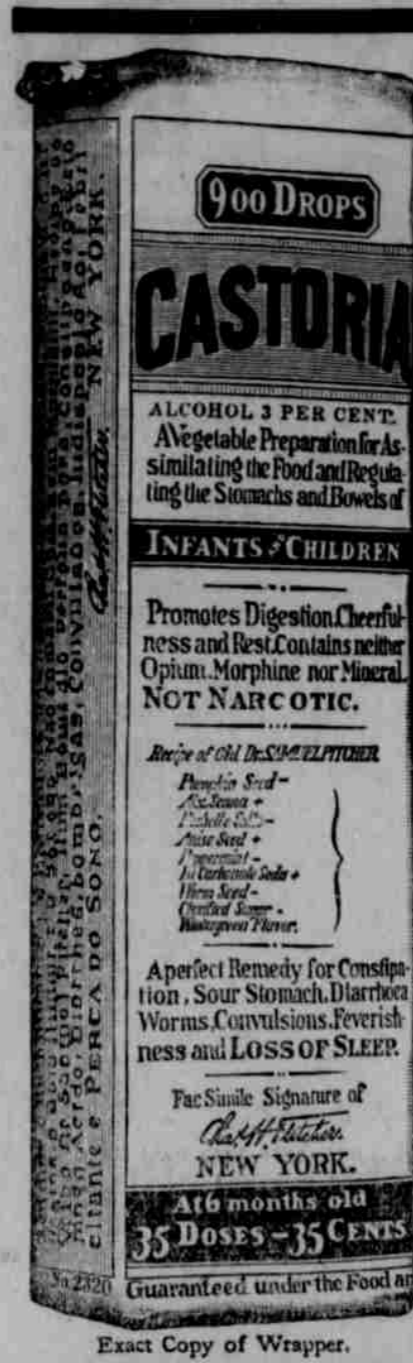

In Police Court.

Judge Archer yesterday afternoon held a seance with George Poissail, Jr., who was accused by Fred Ohm of hitting him, the said Ohm, a severe and resounding blow upon the bare face with his, the said Poissail's fist. The difficulty arose over the Reinhackle matter, Mr. Poissail asking Ohm if there was no way by which Louis could be rescued from the toils of the law. Mr. Ohm remarked that he knew of no way unless Mr. Poissail went and took Louis from the donjon keep which remarked kind a riled Poissail who swatted Ohm a mighty swat upon the open works. Mr. Ohm being a man of discretion promptly fled with Mr. Poissail hot footing it in pursuit. D. L. Amick, one time police chief of the town here interferred and asked Mr. Poissail to desist from his reckless pursuit of the fleeing Ohm which is some electrical name, and this was done. Then hurried Ohm of the electrical name, to Judge Archer with his tale of woe. Judge Archer filed his complaint and sent Chief Rainey after Poissail whom he landed without much grief. The young man stood trial and after listening to the testimony in the case, Judge Archer found him guilty of fighting and sentenced him to \$5 and costs worth of his celebrated brand of justice. Which latter D. L. Amick stood security for and the young man went on his road rejoicing.

Orange Tree Bears Fruit.

F. J. Hennings and wife from near Cedar Creek are in the city today attending to business matters and visiting with friends. Mr. Hennings is responsible for the statement that a small orange tree which Mrs. John A. Hennings owns is in bearing this year, the first time. The tree stands about three feet from the ground and is exactly like an orange tree of the south. The one orange which it is bearing this summer is about the normal size and looks just as an orange grow in tropic climes. It is a remarkable curiosity and well worth seeing and Mrs. Hennings is quite proud of it.

Mystic Encampment No. 31, I. O. O. F. last evening held a regular meeting at their rooms in the Odd Fellows block and gave a candidate the third degree—the highest in the order. Immediately following the ceremonies the encampment sat down to a fine repast furnished by the successful candidate who was gratified at achieving his one ambition, that of becoming an Odd Fellow of the highest degree.

CASTORIA

THE CENTAUR COMPANY, NEW YORK CITY.

Will Wed.

The engagement of Miss Etta Hasemeler and Mr. William Gordon has been announced in Los Angeles. The wedding will occur next month at the home of the prospective bride's parents, Dr. and Mrs. J. A. Hasemeler. This will be an item of interest to Miss Etta's many Louisville friends. Mr. Gordon is a prominent broker of Los Angeles.

The above item from the Louisville Courier will prove interesting reading to the many friends of Miss Hasemeler in this city. For many years the young lady lived at Louisville and was frequently a visitor in this city. She is a very prepossessing young lady and one who made friends with all whom she met. They unite in congratulations to her upon her entrance upon matrimonial seas and trust she will enjoy a long and happy married life.

Fish Car in Town.

The state fisheries car with many, many kinds of fish in it, came in this morning with Superintendent W. J. O'Brien in charge. The car is en route to Louisville where Mr. O'Brien expects to stock the fine fish pond of Charles A. Richey with various kinds of carp, cropples, channel cat, bass and sich. Mr. O'Brien believes that Mr. Richey will have one of the finest ponds in the middle west when it is fully stocked up. The pond is at Louisville and it is the general understanding that it is to be open to the public under certain restrictions by Mr. Richey.

REPORT OF THE CONDITION OF THE FIRST NATIONAL BANK

At Plattsmouth, in the State of Nebraska, at the close of business June 30, 1910.
