COMPETITION IN TELEPHONE SERVICE

An important hearing was on in the supreme court this week which goes deeply into the question of competitive service on the part of telephone companies. It goes farther than this. It is a question whether there shall be any competition in that service, for if it is held that the sales of competing lines is not in violation of statutes and public rights, then the way is left open for a gradual absorption of all competing lines and an ultimate one system that will hold the public at its mercy in character and diversity of service and the rates for the same.

tion and comfort to thousands. Competition has been the life of telephone development in Nebraska.
