

## EDUCATION BOARD FILES ITS REPORT

### Asks For Large Sums to Satisfy Institution Needs.

### NO LOWERING OF STANDARDS.

Woom's Building at State University is Designated as Most Pressing Need There—Considerable Portion of Additional Support Fund Requested is For Increase in Salaries.

Des Moines, Oct. 3.—The state board of education filed its first report with the governor. It made many recommendations for the improvement of the institutions in its charge, declaring that it proposes not to lower the standard in any particular. In respect to appropriations needed by the educational institutions, the board makes the following recommendations:

University.

First—The so called special support fund of \$25,000 per annum granted by the Thirty-third general assembly should be made permanent, and the fund of \$15,000 per annum for books and bindings for the libraries should be increased to \$17,500, and be made permanent.

Second—That there should be a renewal of the appropriation for general equipment and supplies of \$7,500.

A renewal of the appropriation for land of \$17,500.

A renewal of the appropriation for paving sidewalks and improvements of grounds, \$3,000.

And the following additional appropriations should be granted:

General equipment and supplies	\$25,000
Land	32,500
Sidewalks and improvements of grounds	5,000
There should also be an equal increase in repair and contingent fund of	5,000
<b>Total</b>	<b>\$68,000</b>

Third—That there should be an increase of the annual appropriations as follows:

College of liberal arts	\$ 50,000
College of applied science	5,000
College of law	3,000
College of medicine	21,000
College of dentistry	2,500
College of pharmacy	2,000
Fine arts	7,000
Library support	2,500
Administration	1,500
Miscellaneous	5,000
<b>Total</b>	<b>\$100,000</b>

Grand total, \$168,000.

A considerable portion of the additional support fund must of necessity go to increases in salaries.

**State College of Agriculture.**

The askings for the state college of agriculture and mechanic arts may be summarized as follows:

First—That the so called special fund of \$2,500 per annum granted by the Thirty-third general assembly be made permanent.

Second—That there should be a renewal of the appropriation of \$7,500 per annum for the equipment of departments, and a renewal of the appropriation of \$3,750 per annum for sidewalks and grading.

The following increases are asked in the annual support funds of the state college:

Educational support fund	\$ 50,000
College extension	10,000
Agricultural experiment station	15,000
Engineering experiment station	5,000
Good roads	5,000
Two-year agricultural course	25,000
<b>Total</b>	<b>\$110,000</b>

The following special appropriations are asked:

Additional department equipment, including furnishings for domestic technology building, gymnasium and veterinary hospital	\$ 60,000
Public grounds improvements	6,000
Heating plant	43,000
Judging pavilion and abattoir laboratory	50,000
Poultry laboratory	6,000
<b>Total special askings</b>	<b>\$165,000</b>

Only one-half of which sum, or \$82,500, shall be used each year of the biennial period making total for each year, \$192,500.

A woman's building at the state university is designated as the most pressing need there.

**Railroad Pays Fire Damage.**

Boone, Ia., Oct. 3.—The Milwaukee Railway company has just settled for a fire which occurred at Statesboro, Mo., time ago. The fire destroyed a mill at that place was destroyed by fire and the evidence proved that the fire was started by a spark from a passing locomotive. The insurance on the mill amounted to \$5,000 and the company which carried the insurance notified the railroad company that it would be expected to stand for the amount of the insurance. The railroad mailed a check to Nielson & Dueland for \$5,000.

**Stocking the Rivers With Fish.**

Des Moines, Oct. 3.—George A. Lincoln, state fish and game warden, will be ready very soon to start out with his special car to distribute young fish to the rivers of the state. He intends to start out in about a week if he can secure the fish from the Mississippi river bayous.

## KIRBY TO PLEAD GUILTY

Farmhand Who Tried to Rob Bank Will Not Resist Charge.

Council Bluffs, Ia., Oct. 3.—Kirby, the Oakland (Ia.) farmhand who attempted to rob the McClelland bank last week and was shot and captured by young Walter Julius, is still wearing the bullet in his left arm, deposited there by the lad. He is occupying a cell in the county jail, but says he would not try to escape even if there was nothing to prevent him. Dr. Hanchett will try to extract the bullet today. The wound has been well cared for, but the arm is very much swollen and painful.

Assistant County Attorney Ross went before Justice Gardner and swore to an information charging Kirby with attempted robbery. Kirby says a trial will be merely a formality, for he intends to plead guilty. Kirby's wife made anxious inquiries about him and seemed terribly crushed over the wild attempt he had made to better the condition of his family. It was said that the family was likely to become a county charge for a while at least.

## YOUNG WIFE KILLS SELF

Deaf Mute Girl Fires Bullet into Her Heart at Council Bluffs.

Council Bluffs, Ia., Oct. 3.—Winifred Redfield, a deaf mute, ended her life by firing a bullet into her heart at the home of her mother, Mrs. Samuel Barnhart. Two years ago she was married to Elmer Redfield, a deaf mute printer of Omaha. Her husband was kind and loving and they were very happy until a year ago, when the young husband suddenly developed an appetite for intoxicants, when his love turned to indifference. His conduct became such that about six months ago his wife was forced to leave him and returned to her mother's home in Council Bluffs.

## "HOG" SPECIAL STARTS ON TRIP

Train on Rock Island Carries Corps of Lecturers.

Des Moines, Oct. 3.—A special train of several cars, with agricultural and domestic science experts from the Iowa state college on board, left the Rock Island station this morning to spread among the farmers of the state valuable up-to-date information concerning the hog.

The demonstration trip will last for nearly two weeks, ending at Weston, Saturday, Oct. 15. The train will make thirty minutes stops at 137 stations on the Rock Island lines. The people at each station will be seated in the cars, where the specialists will lecture to them and they may see the exhibits and demonstrations.

The train is furnished to the state college by the Rock Island railway. The agricultural commissioner of the Rock Island company is on the train and lectures with the state college experts. There are seven of the college lecturers, two of whom are domestic science teachers. Virginia Purmort of the domestic science department is with the train.

The lecturers will speak on the most profitable methods of raising hogs and the uses of pork products and the by-products. There are various exhibits showing model hog houses, yards, feeding appliances and feeds. Special attention will be given in the lectures to the prevention of losses from cholera. A bulletin on raising hogs will be given to each man who visits the train.

The two domestic science teachers will give lectures and demonstrations on old and new ways of cooking and dainty ways of serving bacon, ham, sausage, salt pork and other pork foods. There will be exhibits of edible products secured from hogs. Each woman who attends the lectures will be given a book of pork cooking recipes.

## TO FIGHT FOR BIG ESTATE

Heirs Will Contest Legacy Left to Lenox College.

Monticello, Ia., Oct. 3.—Since Monticello has shown no disposition to enter a legal contest for the Arch Livingston property, near Hopkinton, the indications point to a big legal battle between Lenox college and the heirs. The prize is 240 acres, valued at \$25,000, and \$6,000 in cash. The heirs will attempt to show that Mr. Livingston was not in a mental condition to make a will when he signed the paper, and that a representative of the college took advantage of his mental and physical condition, when his vitality was at a low ebb, and induced him to make such a will as he would not have done under other conditions.

## Hand of Corpse Moved.

Iowa City, Ia., Oct. 3.—Searched had the undertaker started to prepare fields for the supposedly dead body of Mrs. Joseph Joza at her home on North Gilbert street, when her right hand was suddenly seen to rise from its posture on the edge of the coffin, and lift itself several inches from the boards. The undertaker secured a physician and other aid and an attempt was made to bring the woman to life. For several hours the persons worked over her, but death had conquered. Only after two thorough examinations, however, was the undertaker permitted to continue his work.

## LOS ANGELES IN STATE OF PANIC

### Discovery of Two More Bombs Creates Consternation.

### BOMB FOUND AT OTIS HOME.

Infernal Machine Discovered in Zeehandelaar Residence—Effort Suspended to Destroy Auxiliary Plant of Nonunion Paper—Times Building Destroyed With Loss of Twenty.

Los Angeles, Oct. 3.—Following the explosion which destroyed the buildings and plant of the Los Angeles Times, with loss of a score of lives, an attempt was made to destroy the residence of Harrison Gray Otis, publisher of the Times, by means of an infernal machine. A suspected effort to blow up the auxiliary plant of that paper and the finding of a powerful infernal machine in the residence of Secretary Zeehandelaar of the Merchants' and Manufacturers' association has wrought this city to an intense state of suspense and excitement. General Otis and the other responsible heads of the paper unequivocally charge the Times building disaster and the narrowly averted attempts at further destruction of life and property to labor union sources.

The present trouble involving the Dietz family which led to the shooting is the result of a quarrel Dietz had with Bert Horel, a school supervisor of Winter, over the rent for a building used for school purposes. The quarrel took place on Sept. 7, when Dietz shot Horel through the neck, the wound not proving fatal, however.

A warrant was sworn out for Dietz' arrest, but he has prevented service by threatening to shoot. Knowing Dietz' record as the defender of Cameron Dam, deputies have been careful about approaching him.

With equal emphasis the leaders of union labor here and throughout the state repudiate the accusations and have offered all aid in their power in the effort to detect the culprits.

For twenty years, following a quarrel with the typographical union which resulted in making the Times a non-union paper, General Otis has fought unionism with every resource at his command. He has been ably seconded in this fight by the Merchants' and Manufacturers' association, whose secretary was the object of frustrated dynamiting.

## At Least Twenty Killed.

The death list of the Times disaster will probably total at least twenty. There are four known dead and sixteen missing whose bodies almost to a certainty lie in the still smoking ruins of the Times building.

The dead: Harvey C. Elder, assistant city editor; J. Wesley Reeves, secretary to Assistant General Manager Chandler; R. L. Sawyer, telegrapher; Harry L. Crane, assistant telegraph editor.

The missing: J. C. Gallier, linotype operator; W. G. Tunstall, linotype operator; John Howard, printer; Grant Moore, machinist; Ed Wasson, printer; Elmer Frink, operator; Eugene Carr, Don E. Johnson, operator; Ernest Jordan, operator; Frank Underwood, linotype operator; Charles Gulliver, compositor; Carl Saalada, linotype operator; Howard Courdaway, linotype operator; Charles Haggerty, pressman; Henry Lees, compositor.

In addition there are about twenty injured, some of whom may die.

The original suspicion of the police that the disaster was due to a heavy charge of a high explosive was practically confirmed by the finding of the other bombs and the statements of those persons in the building or near by at the time of the explosion.

## Six Bodies Recovered.

Three hundred workers digging unceasingly for two days in the ruins have unearthed six of the nineteen bodies buried under tons of debris. The shovel brigade is still at work.

No clue to the outrage has been uncovered. But three arrests have been made. Mayor Alexander increased the city's offer of reward to \$10,000. This, together with the offers of local newspapers and labor organizations, whose leaders have pronounced a determination to assist in the search for the criminals, raises the total amount of proffered rewards to \$18,500.

## BLUEJACKETS ARE DROWNED

Tender Load of Sailors of New Hampshire Overboard—29 Missing.

New York, Oct. 3.—Several sailors from the battleship New Hampshire were drowned by the upsetting of a tender in the North river off One Hundred and Fifty-second street.

A list was given out of twenty-nine men who were supposed to have perished. Appended to the list are the names of eleven men who are still absent, but who were not recognized as having been on the swamped boat.

The sailors were returning to the New Hampshire after shore leave and more than 100 of them, it is estimated, had crowded aboard the tender, which was being towed to the battleship. About 300 yards off the shore the craft either swamped or was upset, and the entire load of jacks was precipitated into the water. Boats were immediately put out from the New Hampshire and wherever a bobbing head showed a man was rescued.

## HUNDRED AND FIFTY MINERS ENTOMBED

Explosion in Mexican Mine is Cause of Disaster.

Eagle Pass, Tex., Oct. 3.—One hundred and fifty miners, possibly more, are entombed and believed to be dead in mine No. 2 at Palau, Mexico, in the Las Esperanzas mining district, as the result of two explosions, presumably because of an accumulation of gas. The men entombed are mostly native and Japanese miners, although the number includes several Americans.

At the time of the first explosion the entire night shift, estimated at from 150 to 300 men, were at work. Of these none has reached the surface and probably are dead.

The second explosion occurred shortly after a rescue party, composed largely of Americans, had descended. That they were killed is thought certain.

Latest reports place the known dead at seventy-two. Only two bodies have thus far been recovered, owing to the presence of poisonous gases.

## CARELESSNESS IN THE USE OF FIREARMS IN CITY

There has been entirely too much promiscuous shooting of fire arms within the city limits of late. Almost every day in some part of the city the report of a gun is heard, and no one apparently knows the reason, nor how near some one comes to being seriously, if not fatally, injured.

Only last week a young lady residing on High School Hill was sitting at her piano, and while turning over her music heard the report of a gun to the south of her residence, and almost simultaneously a shot, or bullet, crashed through the window only a short distance above her head. Where the bullet came from, or who fired the gun is not known, but the young lady had a close call for her life. It would seem that one should at least be safe when sitting in their own parlor. The criminal carelessness of some persons may result in the death of an innocent person, and the only way to prevent such things is to arrest and punish every person firing off a gun within the city limits. Accidents of this sort are frequent enough in the sparsely settled country districts, and should certainly be guarded against in a thickly populated city.

**Floyd Gibson Injured.**

Floyd Gibson, son of D. Gibson, formerly in the music store in this city, was run down last Friday, near his home at Missouri Valley, by an automobile and severely, if not fatally, injured.

The little boy was on his way from school in the evening, when another child of about his age seized his hat and threw it across the street, and the little boy dashed after his hat, not noticing an approaching automobile, got directly in front of it and was run over before the machine could be stopped. The car was not being run fast and the driver did not expect the child to run in front of his car, and could not stop in time to save the boy. No blame was attached to the operator of the auto.

The little boy was picked up unconscious and carried to the hospital and medical aid summoned. Mrs. H. G. Van Horn departed for Missouri Valley this morning to visit Mr. and Mrs. Gibson and assist them in caring for the little fellow.

**A Good Position.**

Can be had by ambitious young men and ladies in the field of "wireless" or railway telegraphy. Since the 8 hour law became effective, and since the wireless companies are establishing stations throughout the country there is a great shortage of telegraphers. Positions pay beginners from \$70 to \$80 per month, with good chance of advancement. The National Telegraph Institute operates six official institutes in America, under supervision of R. R. and Wireless officials and places all graduates in positions. It will pay you to write them for full details at Cincinnati, O., Philadelphia, Pa., Memphis, Tenn., Davenport, Ia., Columbia, S. C., or Portland, Ore., according to where you wish to enter.

**Injured in a Swing.**

The grandson of Mrs. Pillsby, while swinging yesterday in the yard near the house, received quite a serious injury to his side and leg. The boy was swinging by a single wire suspended from the limb of a tree, and to get plenty of momentum, got his position on a box and made a spring into the air. The wire did not work even, and the boy was thrown against the tree in his descent, which tore the clothing from his body and also took the skin off his side at the same time, and bruised the lad to some extent. His cries brought the folks from the house and raised the neighbors.

The boy's injuries were dressed and he will have a sore spot on his side for several days.

**R. C. Jahrig and wife, who were called here by the death of Mrs. Jahrig's father, Mr. Julius Doehring, returned to their home at Sheridan, Wyoming, this afternoon. Mrs. Julius Doehring accompanied her daughter to Sheridan, where she will visit for a time.**
