THE OLSON PHOTOGRAPH PRINTING MACHINE COMPANY IS PROGRESSING

While Not Making a Big Noise of What It is Doing The Company is Moving Along at a Fair Gait Under Circumstances.

The Journal is pleased to learn that the Olson Photograph Printing Machine company are meeting with that deserved success to which it is entitled. Orders for machines are coming in daily from all parts of the country, both for the smaller as well as the large machines. The smaller machine is designed for amateur photographers and is sold at prices within the reach of all who desire to make their own postal cards. The larger one is especially for regular photograph galleries, and all who have purchased and used them say it is impossible for any well regulated photograph emporium to get along without them. Testimonials are coming in from every direction, and it is a pleasure for the Journal to know what great satisfaction and the general good results they are giving.

This enterprise is purely a home enterprise, patented by a home man, owned and controlled by Plattsmouth money; and while there has not been much blowing about what the company is doing, the goods are manufactured here and bear the Plattsmouth brand upon every machine

sent out, which is no little advertising for our city. These machines are sent to every state in the union, and the demand for them is so great that they can scarcely be put up fast enough to supply the market, all of which our business men and those who have a special interest in Plattsmouth should feel proud.

The Olson company should receive greater encouragement than they have heretofore received and they should have a larger manufacturing establishment than they have at present. And we trust the time is not far distant when, should this home enterprise need financial aid to assist in enlarging their plant, that our people will be prepared to assist the company in putting up a building of their own.

The Journal has no authority to thus speak, but is simply speaking of the possibilities of the future. The Olson Photograph Printing Machine company is an enterprise worthy of retention, and our people should believe as we do in the matter of "keeping what we have got, and get all we can" in the way of building up Plattsmouth.

A DELIGHTFUL SURPRISE TO MR. FRED W. NOLTING

Mr. Fred W. Nolting, who resides five miles west of this city, was made the victim of a most delightful surprise last evening, when about seventy-five neighbors and friends came in on him. The occasion was in the nature of a farewell, as Mr. Nolting and his most estimable family will remove from this community to a farm two and one-half miles south of this city on next Tuesday, and the friends and neighbors are very sorry to learn of their departure from their midst, but trust that they will like their new home. Mr. Nolting was completely surprised at first, but soon recovered and entertained the guests in his usual genial manner. The few hours were very pleasantly spent at various diversions, interspersed with social conversation, and the occasion will long be remembered by those who were fortunate enough to be present. The guests had come laden with well filled baskets, and during the evening a fine lunch was prepared, which was served at the proper time and to which all did ample justice.
