

CALUMET

BAKING POWDER

The wonder of baking powders—Calumet. Wonderful in its raising powers—its uniformity, its never failing results, its purity.

Wonderful in its economy. It costs less than the high-price trust brands, but it is worth as much. It costs a trifle more than the cheap and big can kinds—it is worth more. But proves its real economy in baking.

Use CALUMET Baking Powder at all Grocers.

GOOD ROADS MEETING AT LINCOLN, TO-DAY

Quite a Number of Representatives From Cass County Will Attend.

From Tuesday's Daily.

County Commissioners M. L. Friedrich and C. E. Heebner left this morning for Lincoln, in company with T. H. Pollock, president, and J. P. Falter, director of the Plattsmouth Commercial club, to attend the state good roads meeting at Lincoln. The commissioners are guests of the Commercial club and their expenses to the meeting will be defrayed by the club.

The object of the meeting at Lincoln is to plan for the improvement of the main thoroughfares of the state leading from the principal towns of the state to the state capital, as well as the county roads leading to the county seat towns from the interior of the county. Nearly all of the states in the Mississippi valley have recently passed laws looking toward the improvement of the highways of the state, and it has come to be the opinion of the business interests of the state that the money paid in for taxes can be spent in no better way than improving the means of communication between the towns and the country, and thus facilitate the transportation of farm products to market.

A Girl's Wild Midnight Ride.

To warn people of a fearful forest fire in the Catskills a young girl rode horseback at midnight and saved many lives. Her deed was glorious, but lives are often saved by Dr. King's New Discovery in curing lung trouble, coughs and colds, which might have ended in consumption or pneumonia. "It cured me of a dreadful cough and lung disease," writes W. R. Patterson, Wellington, Tex., "after four in our family had died with consumption, and I gained 87 pounds." Nothing so sure and safe for all throat and lung troubles. Price 50c and \$1.00. Trial bottle free. Guaranteed by T. G. Fricke & Co.

Passes Good Examination.

In conversation with Mr. H. T. Batten, he informs us that he has received his papers from the Government showing the examination and the grade percentage, at the time he made application for the position as fireman at the new postoffice building. Mr. Batten passed this examination almost perfect, his percentage being 9800, only two points short of perfect. As yet there has been no appointment made, and as Mr. Batten has every reason to believe that he has passed a better examination than the other applicants, he thinks there is a chance of his securing the permanent position. Mr. Batten has had a great deal of experience as fireman, having been employed in the B. & M. shops here for several years, and we believe he has given excellent satisfaction. We are informed that the permanent appointment will be made within a few days.

The Power of the Hour!

Is Very Plainly Seen to Be a Gasoline Engine. No matter what the work is that you have, whether it be pumping water, sawing wood, grinding feed, making electric lights, etc., the gasoline engine is very rapidly taking the place of any other power for this class of work.

We don't believe there is a person in this community that would send away for an engine, if he didn't think he could save money. You will certainly have no trouble in finding a cheap engine if price is what you are looking for, and if you will look them over carefully, take note of the few pieces that they put on them to operate the mechanism, you can very plainly see why they are cheaper. The fact is, if they put more parts to their engine they certainly would have to get more money. There is no patent on the device of simplicity (as it is so called), on cheap engines. It is just simply making an engine just as cheap as possible in order to undersell his competitor. If you ever have an opportunity just take a look at the machine shops, railroads, large power plants, etc., and see if you can find any cheap grades of engines in their use. They certainly ought to be good judges of engines.

We are agents in this part of the county for Fairbanks-Morse engines and would only be too glad to show you the difference between this engine and any engine of inferior make and cheaper price and show you where they make the difference in price.

This engine can be had in any horse-power from 1 H. P. to 500 H. P., and upright or horizontal, and can also be had to burn any kind of fuel, such as illuminating gas, natural gas, kerosene, naphtha, gasoline, etc.

Before you fully decide to buy you had better see the Fairbanks-Morse and if you don't think it better than the rest, we cannot then expect you to buy this make.

Write or call for a 65-page catalogue and prices.
