#### TALKS WITH COLONEL STEEVER

Notice Served to Mexican Government That Bullets Must Not Come Across Rio Grande During Any Fighting-American Taken Captive.

El Paso, Tex., Feb. 5.-General Pasqual Orozco, who is now in Juarez, is expected to put a quietus on the muthous conditions that have prevailed across the Rio Grande for several days. Lie came to El Paso and held a conference with Colonel E. Z. Steever, commanding the American troops

El Paso street car officials anmounced that traffic between the two cities would be resumed soon. This depends upon Colonel Steever granting permission to Americans to cross the international border. Colonel Steever says he will raise the ban on international traffic as soon as he is assured that peace has been restored. it is believed Orozco will be able to give this assurable at once.

Orozco expressed regret at the unfortunate occurrences in Juarez. Colonel Steever gave formal notice

Mexican Consul Llorente, in El Paso, that he would take such steps as he deemed necessary to protect American interests if there should be a repctition of events of last May, when bullets fired in Juavez during the batthe killed and wounded citizens in El

Co'onel Steever received orders from the secretary of war, which were brief, but pointed, merely instructing kim to "notify the authorities in fuarez to prevent firing into United States territory."

Woman Falls Exhausted Seeking to Climb to Safety-Young Man Turns Back to Give Aid and Act Costs Him His Life-Others Endangered.

Niagara Falls, N. Y., Feb. 5.-The great ice bridge that has choked the river channel between the cataract and the upper steel arch bridge below the falls for the last three weeks broke from its moorings at noon and went down the river, taking with it to their death a man and a woman, said to be Mr. and Mrs. Eldridge Stanton of Toronto, and Burrell Heacock, seventeen years old, of Cleveland. Four other persons were on the ice at the time, but managed to get ashore in safety. The bridge was considered safe. For weeks the great fields of ice had been coming down the river, piling up against the barrier until it was from sixty to eighty feet thick, and under the influence of zero weather the great mass had become firmly anchored to the shore. The jam was about 1,000 feet in length, and in some places a quarter of a mile in breadth.
